Educational Prospectus.

THE Calcutta Medical College Session, 1886-87, will commence on the 23rd June next. Students who may be desirous of commencing their studies are requested to apply to the Principal between the hours of 11 A.M. and 4 P.M. on or before that date.

2. Ten (10) free presentations will then be awarded. These are given to students according to their relative position in the University, B.A., B.L. and F.A. Examinations, preference being given to those who have passed the highest examination.

3. No person shall be enrolled as a matriculated student of the College who has not previously passed the First Arts Examination of the Calcutta University, or some one of the preliminary Arts Examination of the United Kingdom recognised by the British General Medical Council.

4. All matriculated students of the College are required to pay Rs 15 on entrance, Rs. 30 for the summer session on the 23rd June, and Rs 30 for the winter session on 1st November of each year.

5. Students who have failed to pass their final examination, and who, under the regulations of the University, are required to attend a further course of lectures and of hospital practice before being allowed to present themselves again for examination, will pay for such further course an annual fee of Rs. 45 in two instalments of Rs. 30 and Rs. 15, payable at the beginning of the summer and winter sessions respectively.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following:—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student, shall be deducted.

8. Any person not being a matriculated student of the College, who may be desirous of attending any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 6.

If such student has passed the Entrance Examination of the University, he may receive certificates of attendance at lectures, provided the Professors are satisfied that he has attended the full course of lectures, and has mastered the subjects taught.

A student who has not passed the Entrance Examination will be entitled to no certificates of any kind.

9. College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospital Apprentice and Female Certificate class.

A gold medal and certificates of honour are awarded to the best students in each subject.

Goodeve and Macnamara silver medals are given to 1st-year student in Anatomy and Chemistry.

10. College scholars, who receive less than Rs. 20 per mensem, are not required to pay Rs. 30 per session.

The holders of the Doorga Charan Laha and all other scholarships will be required to pay fees as a matriculated student. These scholars may pay their fees in advance, or have their scholarship money deducted till the full amount is received.

11. Any student holding a Medical College scholarship will be permitted to draw the stipend of the said scholarship at any recognized Medical School in the United Kingdom, provided he furnishes from the head of such school a certificate of good conduct and diligent prosecution of his studies.

12. The class assistants of Pathology, Physiology and Comparative Anatomy can be held only by matriculated students of the College.

PUBLIC WORKS DEPARTMENT, BENGAL.

DISTRICT ROAD FUND.

NOTIFICATION No. 169.

The 30th April 1886.

THE following accounts and reports of the Road Committees of the districts of Hazaribagh, Lohardugga, Manbhoom, and Singhbhoom, for the cess year 1884-85, together with the remarks thereon of the Commissioner of Chota Nagpore, are published for general information.

D. B. HORN,

Under-Secy. to the Govt. of Bengal.

No. 60D.R., dated Hazaribagh, the 29th December 1885.

From—LIEUT.-COL. C. H. GARBETT, Chairman, District Road Cess Committee, Hazaribagh.

To—The Commissioner of Chota Nagpore.

I HAVE the honour to submit the following report on the operations of the District Road Fund during the year ending 30th September 1885.

2. Two meetings were held during the year under report, and there was sufficient attendance at both of them to form a quorum. A large number of members having ceased to be such under sections 133 and 115 of the Cess Act, and three of the members having died, the list of members was revised, and the Committee reconstructed during the year with the sanction of Government.

3. A summary of the business transacted at the meetings is given below—

- (1)—Preparation of the budget estimate, and determination of the rate of cess for 1885-86.
- (2)—Audit of annual accounts, and consideration of the Annual Report for 1884-85.
- (3)—Passing estimates of different works for 1884-85.
- (4)—Distribution of village road grants.
- (5)—Revision of the list of members.
- (6)—Consideration of the proposal for construction of cart serais in certain places.
- (7)—Consideration of the Government letter (No. 1639T.M., dated 12th October 1884.) regarding the transfer of cantonment roads to the Road Cess Department and other miscellaneous matters.

4. Major E. G. Lillingston, Deputy Commissioner, having been transferred from the district, the office of the Chairman was held by Lieutenant-Colonel C. H. Garbett from the 2nd July to the end of the year.

5. The term of two years having expired since the appointment of Baboo Girendra Nath Mitter, he was, on the recommendation of the Committee, re-appointed as Vice-Chairman.

6. The Sub-Committee met every month to audit the accounts.

7. *Branch Committee.*—There is only one Branch Committee, namely, at Giridi.

8. There were eight meetings held during the year, and the attendance of the members is reported to have been fair.

9. The demand on account of cess on lands and mines during the year amounted to Rs. 45,284 against Rs. 45,389. The decrease, Rs. 105, was the result of new valuation of mines.

10. The total amount recoverable during the year, including the arrears of last year, was Rs. 47,042, out of this amount Rs. 45,046 was collected, the balance outstanding at close of the year being Rs. 1,996. Besides the collections stated above, Rs. 50 was collected as advance for the next year.

11. The outstanding balance at close of the year was a little larger than that at the end of the previous year. This appears to be due to high prices of food-grains throughout the year. The general result of collections may, however, be said to have been satisfactory, as the percentage of collections on current demand was above 95 per cent.

12. *Original works.*—The arches on the Lalabandh bridge, on the Hazaribagh and Chattrra road, were constructed during the year. The earthwork on the Burhee and Gawan road up to Douchanch, which was commenced last year as a *quasi-relief* work, was resumed this year, and about $\frac{3}{4}$ ths of the work completed.

13. *Repairs.*—The metalled roads aggregating to about 37 miles, have been duly maintained. For want of funds not more than two miles of the Chowparun and Chattrra road instead of five could be renewed during the year. This road has increased in importance since the opening of the Gya Railway, as all the traffic from Balumat *via* Chattrra passes through this road into the Gya Railway station *via* Chowparun and Dabbee. The fair-weather roads have also been duly kept up, and are open to wheel traffic.

14. It is desirable that the surface of the important fair-weather roads should be gravelled as funds are available for the purpose.

15. The earthwork on the fair-weather roads was partially done during the rainy season. Having to depend solely on cultivators for labour, it is difficult to secure their services during the rainy season, as they are then fully engaged in cultivation.

16. *Village roads.*—Rs. 7,000 was provided in the budget for village roads during the year. Out of this amount Rs. 6,530-8-2 was expended; namely, Rs. 3,763-2-5 in the head-quarters sub-division, and Rs. 2,767-5-9 in the Giridi sub-division. The works in the head-quarters sub-division were executed under the supervision of the District Engineer, and those in the Giridi sub-division under the supervision of the Branch Committee. The number of village roads having been considerably increased of late, they could not be kept up as efficiently as they used to be kept before. The most important ones only are properly repaired, and the others only partially. They are all, however, reported to be fit for sagger and cart traffic.

17. The Sub-Divisional Officer of Giridi reports that several of the roads repaired under the Branch Committee during the year have not yet been inspected by him, but that he intends to do so during his cold-weather tour.

18. *Trees.*—No new trees were planted during the year; those planted during the previous years were maintained by establishment of malies.

19. *Nursery Gardens.*—A small nursery garden is kept up in the office compound only. The mahogany plants, 85 in number, which were in the nursery, are being transplanted on road side.

20. *Staging Bungalow.*—There is only one staging bungalow under the Road Cess Committee, namely, at Ramghur. It yielded a receipt of Rs. 95. The cost of maintenance and repairs of the building during the year was Rs. 405-2-9.

21. All works, except the maintenance of trees, were done through contractors. The District Engineer reports that want of good and active contractors is much felt, very probably owing to the scarcity of labour which is daily increasing. The most able-bodied men are taken away to the tea gardens in Assam by Emigration Agents, and to Burmah by the Revenue Survey Department. The Sub-Divisional Officer of Giridi reports that the works done by the contractors under the Branch Committee were not on the whole satisfactory.

22. *Establishment.*—The several establishments employed under the Committee have worked well during the year.

Mr. A. H. Ganizer was the District Engineer throughout the year.

GERENDRA NATH MITTRA,
Vice-Chairman, Road Cess Committee.

No. 263, dated Ranchee, the 20th February 1886.

From—The Chairman, District Road Cess Committee, Lohardugga,
To—The Commissioner of Chota Nagpore.

I HAVE the honour to submit herewith the annual accounts and report on the working of the Road Cess Act, IX (B.C.) of 1880, for the cess year ending the 30th September 1885

3. During the year under report there were seven meetings of the District Committee, of which six were special and one ordinary. Four special meetings were adjourned for want of a quorum. The average attendance was the same as in the previous year. It will be observed that the attendance both of official and non-official members of the District Committee during 1884-85 was very unsatisfactory; for out of six official and twelve non-official, three official and six non-official members did not attend six consecutive meetings, and consequently their names had to be struck off the list under section 115, Act IX (B.C.) of 1880. No new members have yet been appointed in their places. Regarding Palamow Branch Road Cess Committee, the attendance of the members was unsatisfactory.

4. The accounts of the year were duly examined and audited by a sub-committee consisting of the Vice-Chairman and two other English-knowing members appointed under section 179 of the Cess Act, and were passed as correct.

5. The increase in the amount of collection under the head of cess on land is principally due to the realization of arrears outstanding at the close of the preceding year. The increase under the head fees, fines and forfeitures is due to the collection of process fees under the Public Demands Recovery Act.

6. The cess was levied at the maximum rate. There was no difficulty in collecting it at head-quarters. In the Palamow sub-division also the payments appear now to be more punctually made than before. The tenure-holders seem to be beginning to see that the recovery by the certificate procedure is speedy and certain, and that it is better to pay up punctually.

7. The road cess is not unpopular in the district: the people now understand that the money is only spent for their benefit.

8. *Original works.*—One permanent masonry bridge of two spans of 20 feet has been constructed during the year under report. Materials have been collected for the construction of a permanent masonry bridge of four spans of 25 feet each. On the Ranchee and Palkote road a timber-tapped bridge has been finished. In addition to the above some expenditure was incurred in making survey on the Daltongunge and Moharajgunge road.

9. *Plantation.*—The work of tree-planting has been extended over 28 miles of roads. The total length planted out up to end of the year is 9½ miles. The trees planted are thriving. Two small nurseries have been started in which to rear trees before transplanting on the roadsides.

10. *Repairs.*—The *Ranchee-Lohardugga road*, 47 miles.—This very important road, over which a very heavy traffic passes, has been kept in fine order. In places it has been gravelled, and this will be continued as funds permit, for it will be a great saving in the end. Ordinary earthwork without gravelling is of no use on such a road, whether traffic is very considerable.

The *Lohardugga and Chatra road*, about 46 miles to the boundary of the district.—This also is a very important road. Formerly it used only to be maintained to Balumath, about 10½ miles from the district boundary, the portion between Balumath and the boundary being neglected. During 1884-85, however, the whole road has been taken in hand, and at the close of the year only a small portion required to be completed before opening the road for wheeled traffic.

The *road from Rooroo to the head-quarters sub-division boundary towards Daltongunge*, about 23 miles.—This road leaves the Ranchee and Lohardugga road at Kuroo, and with that road forms what we may call the "Grand Trunk" road of the district: it is the direct road to the Palamow sub-division head-quarters at Daltongunge. It crosses the proposed line for the Benares-Cuttack line of railway, and is a most important line of communication in every way. It crosses the Amjharia ghât than which I have not seen a better ghât road in India. The whole of this road to the head-quarters sub-division boundary has been kept in repair. But some extensive original work in the shape of re-alignment to avoid the Murgi Jharra ghât is required.

Ranchee-Bundgaon road, about 38 miles to the district boundary.—This is the chief road to Chyebassa, the head-quarters of the Singhbhum district, and crosses the Bengal-Nagpore line of railway at Chakurdurpur where there is to be station. Ordinary repairs and a little bridge work have been done to this road.

Ranchee Terai road, about 50 miles in this district.—This is another most important road. Its name should be changed to Ranchee and Chandil road. It is the nearest route from Ranchee to the Chandil station on the Bengal-Nagpore Railway. Besides ordinary maintenance works, one bridge has been raised and approaches repaired. There has been a good deal of patching and alterations going on this road, but it is now going to be surveyed throughout, and then altered once for all as our funds may admit. But to put this road into the state which it should be considering its importance will be quite beyond the means of the Road Cess Committee, and it is hoped that some assistance will be given from Provincial Funds.

Ranchee-Palkote road.—This road *viâ* Kurra and Bassia is mostly only a track. The diversion from 12th to 39th mile, started in the cess year 1883-84, was completed during the year under report; but this diversion adds to the distance, and at present is not used at all by travellers. Slight repairs have been done on the 1st to 11th miles only.

Ordinary repairs have been executed on the roads mentioned in the margin. Funds have not been available for the proper repair of the bridges and culverts on these roads, and which I found in a shocking state.

Khunti, Kamdera, Ranchee-Palamow,
Ranchee-Gula, Ranchee-Pithoria.

Little has been done to these roads. A large sum of money has been spent on re-alignments out of repairs, but in the Palma-Lohardugga and Bundu-Jhalda roads these have been abandoned as unnecessary, and as adding considerably to the length of the roads. The Lohardugga-Sambalpur road is a very important one, as it is the only route for carriage of the traffic from Surguja to the south towards Lohardugga and Ranchee. The road is over 80 miles in length, and it is beyond the means of the Committee to put this length of road in repair. For 17 miles from Lohardugga the road is now maintained.

Lohardugga, Sambalpur, Palma,
Lohardugga, Bundu-Jhalda.

11. *General remarks*—The most important question now before the Road Cess Committee is the construction of feeder roads to the Bengal-Nagpore Railway. As this question has been fully treated in my letter No. 219, dated 5th February 1886, it need not find any place in this report. The work done in the year under report was satisfactory. Rupees 5,995 had to be transferred from original works to repairs. Considering the small fund the Committee has at its disposal, it is not in my opinion advisable to spend large sums of money in building large and costly bridges. At present what is much more urgently required is the completion of the roads by doing the necessary earthwork and opening feasible ghâts.

12. *Village road repairs.*—About eight village roads were maintained and two newly opened. The number of the village roads is increasing: it will be necessary to increase the allotments.

13. *Accounts.*—The monthly accounts of the road fund and of the District Engineer's office were examined by the Vice-Chairman alone. It is said that it was found difficult to procure the attendance of two other members to examine them.

14. The Local Auditor inspected this and the District Engineer's office on the 15th September 1884, and has just finished his inspection for the current year.

15. The establishments required under the Road Cess Act are—

- (a)—Establishment for collection of revenue.
- (b)—Committee's office establishment.
- (c)—Engineering establishment.

16. The establishment for collection of revenue at head-quarters consists of one head-clerk and accountant, one assistant clerk, one mohurir and one peon. These officers also do the work connected with the Committee's office, for which there is no separate establishment. The establishment under the sub divisional officer of Palamow consists of one clerk, one mohurir, and one peon.

Remarks on the establishment.—The accountant and head clerk, Baboo Nuudo Lal Chatterjee, is reported by the Vice-Chairman to have discharged his duties satisfactorily as in the previous year.

17. The District Engineer, Baboo Jogendro Nath Ghose, is reported to have always given satisfaction in his work as in the preceding year. My predecessor, Collector Samuells, had, I believe, a very high opinion of him.

18. The District Engineer reports that the establishment noted in the margin, Three sub-overseers, one clerk, employed under him, have worked well. He particularly notices the service of Baboo Preyo Nath Mittra, overseer, Palamow, and Mohesh Chandra Paul, sub-overseer of the Lohardugga Circle. I have lately had an opportunity of judging of these two officers myself, and concur in the opinion expressed.

19. The roads, bridges, and culverts mentioned in the budget estimate for 1885-86 (sanctioned by Government) are the works proposed to be taken in hand during the ensuing year 1885-86.

20. The works have all been executed by contract during the year under report, and the small sums advanced to the contractors have been adjusted, except in a few disputed cases.

21. Baboo Ashutosh Gupta, Assistant Magistrate and Collector, was Vice-Chairman throughout the year.

Annual Report of the District Road Cess Committee of Manbhoom for the cess year 1884-85.

1. *Working of Cess Act, IX (B.C.) of 1880.*—The demands, collections, and balances of 1884-85, as compared with the previous year, is shown in statement A. The result of the year on the whole contrasts very favourably with that of the past year. The percentage of collections to demand of cesses on land is above 99, to 93 of the previous year. There is a trifling decrease in the percentage of collections of cesses on mines. The balance at the end of the year has been considerably reduced, represented by the figures 1 to 7 of the previous year. There were no remissions during the year.

The total demand on account of cesses on mines, &c., for the year under report was Rs. 2,963 against Rs. 2,602 during 1883-84, this increase being due to the enhanced rates.

The total collection made previously in advance, as shown in column 7 of Statement A, was Rs. 137, against Rs. 500 during the year previous. The difference is due to the fact that in 1882-83 collections were made according to the enhanced demand under the revaluation which was subsequently quashed and ordered to be revised by the Board, consequently pending revision the collections which were made under the enhanced demand had to be adjusted with reference to the demand under the old valuation, and the surplus was carried to the credit of the succeeding year.

The following is an explanation of the balance, Rs. 676 :—

	Arrear. Rs.	Current. Rs.
Since collected		138
Immoveable property has been attached and 25th November has been fixed for sale		246
Processes have been issued for arrest and attachment of moveable property	9	123
Inquiry is being made for property	160	
Total	169	507

The last balance, the whole of which is arrear balance, is entirely due from persons working coal mines, stone and ghooting quarries : most of them have given up the work, and their whereabouts cannot be traced. A large portion of this balance, it is presumed, will have to be remitted.

Working of the Committee.—A meeting was convened every month, and there was no meeting without a quorum.

The following is a summary of the work done by the Committee during the year under review :—

(1). Passing of annual accounts and report for cess year 1883-84, and discussion over Government Resolution on the Chota Nagpore Administration Report for the past year on the subject of railway feeder roads. The Committee, in the first instance, resolving to forward a map of the district to the Engineer-in-Chief, Bengal-Nagpore Railway (before preparing scheme of feeder roads), to ask him to make the line of railway through the district. Also consideration over a project laid before the meeting by the Chairman for taking in hand at once the unfinished famine road between Manbazar and Raghoonathpore, with the object of affording work to the poorer classes of people in pergunnah Bagdah and its neighbourhood, owing to the extensive failure of the high land paddy crop. The Committee approving of the proposals generally, and agreeing to a transfer of the necessary funds from other works (in the event of Government refusing assistance), to be paid for from next year's income.

(2). Discussion over the Commissioner's letter No. 253 DR, dated 19th February 1885, declining to sanction the expenditure of any road fund money on the improvement of a bund at Paroi, near Poucha, on the road between Manbazar and Raghoonathpore. The Committee still maintaining their opinion as to the desirability of undertaking the improvement of the said bund and also regarding the construction of a staging hut at Paroi, near Poucha.

(3). Discussion over District Engineer's letter No. 62, dated 7th April 1885 praying that the Committee will place on record their views regarding his application for increased pay and allowances, as he had on three occasions been recommended for the increase of pay, without meeting with success: the members unanimously being of opinion that the District Engineer's application was reasonable, and resolving that, with the sanction of higher authority, his pay be raised from Rs. 150 to Rs. 250, and that his salary at the latter rate be provided in the next year's budget, to be drawn from 1st October 1885.

(4). Passing the usual monthly accounts, and nominating a member to fill up a vacancy in the Committee, owing to the death of one of its members.

(5). Consideration over District Engineer's letter No. 92, dated 1st May 1885, submitting rough sketches of the lands required for the construction of a cart serai at Chandankiari on the Raghoonathpore-Hazaribagh road, and for the extension of the existing serai compound at Jaypore on the Purulia-Ranchee road.

(6). Passing of the budget estimate of receipts and expenditure for cess year 1885-86.

(7). Passing usual road fund monthly accounts, and re-appointment of a member for the standing Audit Sub-Committee, owing to death of one of the members of the Audit Sub-Committee.

3. *Branch Committees.*—None in this district, maintenance of village and other roads in the Govindpore sub-division being under the management of the sub-divisional officer, who draws cheques against allotments made in budget annually. The cheques, &c., being signed and countersigned by the Chairman and Vice-Chairman of the sudder sub-division.

4. *Working Establishment.*—There have been no changes during the year under report. Baboo Nunda Gopal Banerjee, District Engineer, performed his duties to my entire satisfaction. He is hardworking, painstaking and intelligent; is always on the "move" looking after district works, and having been here some time thoroughly understands every part of this district. He is, in my opinion, well deserving of the increased pay for which he has applied. Mr. G. V. Thompson still continues as A.

has discharged his duties satisfactorily. Mr. Thompson has also applied for an increase to his salary. At a recent meeting the members unanimously agreed that he was deserving of this increase. The subordinates in the District Engineer's office discharged their duties efficiently, and at no time were any complaints made against any of them.

5. *Works done during the year.*—In Appendix B is shown abstract of all works done during the year under review and their respective cost.

(a). *Sudder sub-division.*—There was no provision for any original work. The works were chiefly restricted to the maintenance of all the finished roads in the district; muddy portions of the Purulia-Chyebassa, Purulia-Bankura, Purulia-Manbazar, Jhapra-Govindpore, Raghonathpore-Raneegunj, Raghunathpore-Bankura, and Chara branch roads were improved by gravelling. The roads from the Damudah junction towards Koilapal and Barrabazar, from Raghonathpore towards Hazaribagh, from Purulia to Chass, and from Manbazar towards Bankura, were also taken up and generally repaired to make them fit for wheeled traffic, and some cheap stone culverts constructed in most of them. The old famine road from Manbazar to Raghonathpore was taken in hand this year and repaired to some extent as far as Hura.

(b). *Village roads.*—Several of these were repaired and improved by constructing rough stone and wooden culverts in most of them.

(c). *Cart serais.*—Those constructed in previous years were kept in repair and a new one was constructed at Chandankiari along the Raghunathpore-Hazaribagh road.

(d). *A Nursery.*—For young plants was started in 1882-83 in the sudder station, and was maintained in very good order. A large number of young plants were transplanted along the different roadsides during the rains.

(6). *Govindpore sub-division.*—The road from Govindpore towards Toondi was greatly improved by making the road fit for cart traffic, and excepting a very short bit about three-fourths of a mile, the line is open for carts all the way between Toondi and Govindpore. The village road from Govindpore to Jherria had become very bad lately, and was improved to some extent by the construction of some cheap stone culverts. The Rajgunj and Nowaghar village road was also generally improved, as far as funds permitted. The cart serais in the sub-division (along the Grand Trunk road) were maintained in very fair order. Some improvements were done to the staging bungalow at Nirsha by an out-house, &c.

Vice-Chairman, District Road Cess Committee.

*Memorandum showing in detail the balance at credit of Deposits on 30th September 1885.—Nil.**Form of Audit Certificate.*

WE hereby certify that the books and accounts specified below,* prescribed for the Road Cess Office and for the office of the District Engineer, are duly kept up, and that they have been posted for the year 1884-85, and they have been duly scrutinized by the Sub-Committee.

Also that the Treasury Officer's abstract of the accounts of the Committee for the year has been duly received and checked with the cash and pass-books, and found to agree therewith, with the exception of a discrepancy of one pie in the closing balance, which the Treasury Officer will reconcile after communication with the Accountant-General, Bengal.

That the vouchers for the payments of the year have been cancelled. That no advances were made during the year, that none but duly sanctioned expenditure has been incurred, and that in the case of original works the register of monthly expenditure shows clearly the amount of sanctioned estimate, the grant for the year, and generally that the work of the office has been performed with a due observance of the rules prescribed by Government.

H. W. HILL,
Vice-Chairman.

* Road Cess Office:—(1) cash book; (2) cash abstract; (3) register of monthly receipts and expenditure; (4) account of deposits; (5) account of advances.

District Engineer's Office:—1. Accounts, viz.:—(1) files of contract certificates; (2) files of bills for purchases or purchase lists; (3) files of day-books; (4) files of establishment bills; (5) files of acquittance rolls. 11. Books, viz.:—(1) imprest cash book; (2) register of bills passed; (3) register of works and repairs; (4) register of tools and plant.

Explanatory Note.

THE excess expenditure of Rs. 70-11-1 under head of "Establishment and Contingencies of Office of Collection" is owing to unforeseen charges having occurred in connection with the revision of late revaluation.

2. The excess of Rs. 3-7-11 under head of "Establishment and Contingencies of Committee's Office" was on account of some petty miscellaneous charges.

NANDA GOPAL BANERJEE,

District Engineer, Manbhoom.

PURULIA,
12 21st December 1885. }

SINGBHOOM DISTRICT.

Annual Report of Road Operation during the cess year 1884-85.

No. 1.—Chyebassa-Midnapore road, 71 miles.—Eleven miles of this road were thoroughly repaired, and surface repairs, wherever necessary, over the remaining portion were executed. The two timber platform bridges at Gobindpur and Khokero could not be renewed, as the Superintending Engineer suggested certain alterations in the design and the

During the coming year it is proposed to complete the above bridges and to construct some new bridges and culverts.

No. 2.—Nursingurh-Baharagorah road, 21 miles.—Four miles of this road were realigned and completed by digging side trenches and clearing jungles. During the cess year 1885-86 repairs to culverts and to such parts of the road as have been greatly damaged have been provided for.

No. 3.—Burrakur road, 31 miles nearly.—Thorough repairs of earthwork done over 12 miles of the road. As for the remaining portion the surface was dressed and levelled wherever it was found necessary to do so. Gravel was collected and stocked on road side for improving the muddy portions of the 4th and 5th miles.

The Tangrain bridge timber platform was substituted by two 16-foot span arches.

During the year 1885-86 it is proposed to construct one bridge, and improve the ramps of the Sanjye river.

No. 5.—Chyebassa-Ranchee road up to Bandgaon, 44 miles.—Eleven miles of this road thoroughly repaired, and the remaining portions needed no repairs. Three culverts repaired.

During the coming year it is intended to rebuild two culverts that are partly broken, and to improve the ramps of the Sanjye and build one or two culverts.

Nos. 10 to 21.—Village roads in the Government Kolhan.—Ten miles of the line from Jaggernathpore to Joypore, and thence to Kharbond, have been realigned; the realigned portions had trenches cut on both sides of it and was cleared of jungles. The remaining portion was repaired wherever necessary.

During the cess year 1885-86 it is proposed to realign 4 miles.

No. 22.—Chakulia-Baharagorah road.—Two miles of this were realigned, and urgent repairs executed here and there. During the cess year 1885-86, it is proposed to complete the realigned portion and construct one wooden culvert and repair another.

Petty surface repairs have been executed to the roads noted below:—

No. 4.—Khursowan road.
 „ 6.—Gurjan road.
 „ 7.—Jyntgaurh road.
 „ 8.—Bamaughati road.

No. 9.—Seraikela Chukerdhampur road.
 „ 24.—Kalkapore police-station road.
 „ 25.—Roboghat road.
 „ 26.—Chiroo Ghagree road.

No. 23.—Goodri road, 44 miles.—Two miles of this road have been realigned, and surface repairs have been executed to the remaining length. During the coming year the repairs to the culverts are proposed, as also thorough repairs to 10 miles of the road from Sauna.

No. 6.—Garjun road, 51 miles.—During the coming year the line of operations proposed to be followed on this road will be similar to that on the Goodri road.

Shelter-houses.—During the cess year 1885-86, it is proposed to run up 15 neat huts on the several roads to provide for the shelter of the working staff, as at present there exist no manner of inspection bungalows or rest-houses throughout the district, except one staging bungalow on the Bandgaon road. Under these circumstances, the necessity for the construction of such huts cannot be over-estimated.

Arboriculture.—The two miles of the Burrakur road from the Rorho northwards were planted on both sides with fruit trees, numbering 400, the distance apart between the trees being not less than 50 feet.

The existing plants on the Midnapore road, Jyntgaurh, Burrakur, and Bandgaon roads, were fenced in wherever necessary, and the dead ones replaced.

Establishment.—The existing establishment consists of one sub-overséer and a chaprassee. During the year 1885-86, it is proposed to strengthen the establishment by two road sircars and one more chaprassee. The total length of the roads within the district being upwards of 500 miles, it is hardly necessary to mention that the existing establishment is hopelessly insufficient, and so long as it is not strengthened, it is simply impossible to carry out works.

W. L. SAMUELLS,

CHYERASSA,
The 30th November 1885.

Chairman, District Road Committee.

Explanatory memoranda to accompany the Annual Accounts for the year 1884-85.

IN this year's accounts the balance on the 30th September 1884 in the hands of the Road Cess Deputy Collector is shown as Rs. 734-8-6 instead of Rs. 735-15-8, wrongly shown in last year's accounts, for the amount Rs. 735-15-8 was not in the hands of the Deputy Collector, but was in the treasury at the disposal of the Deputy Collector, of which Rs. 734-8-6 only was drawn by him and spent. The balance Re. 1-7-2 was left in the treasury.

2. *Administration.*—The budget allotment under the head of Administration for this year has been exceeded by Rs. 3-15, only because the pay of the clerk for the Committee's office was increased from Rs. 10 to Rs. 25 a month from July 1885.

3. By mistake a sum of Rs. 90 has been shown in the accounts as spent under the head of Original Works on the Mignapore road. This amount was spent upon repair works of the same road, and has accordingly been shown here under the head of "Repairs."

4 (a). *Repairs*—The budget allotment for the repairs of the Kalkapore police station road has been exceeded by Re. 1-8 only—a nominal sum—and so needs no explanation.

(b) The budget allotment for the repairs of Robo ghat road has been exceeded by nearly 50 per cent. This was due to some urgent repairs on the same road which could not be foreseen when the budget estimates were framed.

W. L. SAMUELLS,

Chairman, District Road Committee.

No. 282D.R., dated Ranchi, the 11th March 1886.

From—C. C. STEVENS, Esq., c.s., Commissioner of Chota Nagpore,

To—The Secretary to the Government of Bengal, Public Works Department.

I HAVE the honour herewith to submit in original the annual reports and accounts of receipts and expenditure of the District Road Funds of the several districts of this division for the cess year ending 30th September 1885.

2. The reports and accounts were received in this office on the dates noted below :—

Hazaribagh	...	...	...	...	3rd January 1886
Lohardugga	...	...	...	...	22nd February 1886.
Manbhoom	...	...	...	...	10th January 1886.
Singbhoom	...	...	...	...	11th December 1885.

* * * * *

4. The total receipts of the division for the year under report, including advances and deposits, amounted to Rs. 1,59,512-15-5. This, together with the unexpended balance of the previous year (Rs. 27,939-14-4) gave a total income of Rs. 1,87,452-13-9 available for expenditure during the year. Out of this sum the total disbursements, including advance and deposit re-payments, amounted to Rs. 1,50,853-2-4, leaving a balance in hand of Rs. 36,599-11-5 when the year closed.

5. Out of the total disbursements shown above, Rs. 78,952-15-10 were spent under the head of "Repairs" and Rs. 18,419-1-9 on "Original works." The expenditure in connection with repair works in the district of Lohardugga was the largest, being Rs. 35,574-9-1. In Hazaribagh the disbursements under this head amounted to Rs. 24,245-13-7. The metalled roads, aggregating about 37 miles, have been duly maintained in this district. Fair-weather roads have also been kept up and are open to wheeled traffic. In Manbhoom Rs. 12,361-12-8 were spent in gravelling some of the more important roads to make them fit for wheeled traffic; cheap stone culverts were also constructed in most of them. In Singbhoom Rs. 6,770-12-6 were expended in re-aligning and thoroughly repairing some of the important roads.

6. The total disbursements under the head of "Original works" in the Hazaribagh district during the year under review amounted to Rs. 9,994-6-2, of which Rs. 7,995-6-8 were spent on the Burhi and Gawan road, and the remainder Rs. 1,998 15-6 on the construction of the arches on the Lalabandh bridge on the Hazaribagh and Chuttra road. Under this head Rs. 7,716-11-7 were also spent in the district of Lohardugga in the construction of one permanent masonry bridge, and in finishing a timber top bridge on the Ranhee and Palkote road. It is said that materials have been collected for the construction of a permanent masonry bridge. In Manbhoom there was no provision in the budget for any original work. In Singbhoom Rs. 738 were spent in arching a wooden platform bridge at the village of Tangrain and in metalling the Burrakar road.

7. *Village Roads.*—Village roads in the districts of this division have been maintained so far as funds permitted.

8. *Planting of Trees.*—Attention has been given by every District Committee to arboriculture. New trees have been planted along roadsides, and those planted in previous years have, in most cases, been carefully maintained.

9. The subordinate establishments of the different departments of the Road Cess Office are reported to have given satisfaction in the discharge of their respective duties.

Separate accounts, under section 10 of Act XI of 1859, were opened in respect of the 3 shares from which arrears are due. These shares were once put up to sale for arrears of revenue on the 5th January last, and the bid at which the said shares were knocked down was below the amount due to Government. Against this sale an appeal was preferred to the Commissioner of the division, who upset the sale on the 19th March last on grounds of illegality, and directed to take steps under section 14 of the sale law. Accordingly a notice was served upon the proprietors, but no one paid the arrears. Hence the entire mehal is now advertised for sale.

Tipperah Collectorate, the 7th April 1886.

F. H. B. SKRINE, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned escheated property situate in the district of Chittagong will be put up to sale at the camp of the Deputy Collector near the Police station, Mirkiserai, on the 20th May 1886, corresponding with 7th Joisto 1293B.S., Thursday.

The purchasers will be subject to the following conditions of sale.

CONDITIONS OF SALE.

Firstly.—The tenures will be sold to the highest bidder above the upset price. The purchaser will acquire the entire proprietary right of Government in such tenure.

Secondly.—If the amount of purchase money do not exceed Rs. 100 the whole amount ...

Thirdly.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the tenure to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale. The Deputy Collector will have power to put up the several lots singly or together, as may be found desirable at the time of sale.

Chittagong Collectorate, the 7th April 1886.

A. MANSON, Collector.

NOTICE is hereby given that the lease of the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Commissioner of the Sundarban, has been applied for by Huri Mohun Basar, and will be sold at 12 o'clock noon on the 2nd August 1886, Monday (18th Shraban 1293 B.E.), at the Sundarban Commissioner's Office at Alipur, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

2. The lease of the land will be granted subject to the conditions which are specified below, as well as to the general terms annexed to the rules for the sale of leases of waste lands, dated 12th November 1879.

Conditions.

That the lands shall be subject to all existing rights of all way and water and all other easements.

That the right of using all streams and channels in any way navigable shall be reserved to public, as also the use of a towpath, not less than 25 feet in width, on each side of every such stream and channel.

That no charge shall be made for wood and timber standing on the land at the time it is leased, nor for any wood which may be cut and burnt to effect clearances, or which may be used on the lands. But for wood and timber exported for sale, a duty shall be levied at such rate and in such manner as may from time to time be prescribed by Government.

That the Government reserves to itself the right to all minerals in the land, together with such right of way and other reasonable facilities as may be requisite for working, getting and carrying any such minerals. It also retains its proprietary right in the land, and only confers on the lessees an occupancy right which shall be hereditary and transferable.

HOOGHLY,
The 20th April 1886.

THE name of Khetra Gopal Biswas, Kurnulgachi Middle English School, is struck off the list of successful candidates for the Middle English Scholarship Examination, published in the *Calcutta Gazette* of the 14th April 1886, for having used unfair play in the examination-hall.

CHANDRA MOHAN MAJUMDAR, *Offg. Assistant Inspector of Schools, Presidency Divn.*
CALCUTTA, the 8th May 1886.

Educational Prospectus.

THE Calcutta Medical College Session, 1886-87, will commence on the 23rd June next. Students who may be desirous of commencing their studies are requested to apply to the Principal between the hours of 11 A.M. and 4 P.M. on or before that date.

2. Ten (10) free presentations will then be awarded. These are given to students according to their relative position in the University, B.A., B.L. and F.A. Examinations, preference being given to those who have passed the highest examination.

3. No person shall be enrolled as a matriculated student of the College who has not previously passed the First Arts Examination of the Calcutta University, or some one of the preliminary Arts Examination of the United Kingdom recognised by the British General Medical Council.

4. All matriculated students of the College are required to pay Rs. 15 on entrance, Rs. 30 for the summer session on the 23rd June, and Rs. 30 for the winter session on 1st November of each year.

5. Students who have failed to pass their final examination, and who, under the regulations of the University, are required to attend a further course of lectures and of hospital practice before being allowed to present themselves again for examination, will pay for such further course an annual fee of Rs. 45 in two instalments of Rs. 30 and Rs. 15, payable at the beginning of the summer and winter sessions respectively.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following:—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. EXHIBITIONS.

Simla, the 6th May 1886.

No. 1857 Ec.

The following papers relating to the opening of the Colonial and Indian Exhibition, London, on the 4th instant, by Her Majesty the Queen-Empress, which have been received by telegraph from His Royal Highness the Prince of Wales, Executive President of the Royal Commissioners, are published for general information:—

COLONIAL AND INDIAN EXHIBITION.

Address by His Royal Highness, the Executive President, to Her Majesty the Queen, on the occasion of the opening of the Exhibition.

MAY IT PLEASE YOUR MAJESTY,—As Executive President of the Royal Commissioners appointed by Your Majesty's Royal Warrant of the 18th of November 1884, for the promotion of an Exhibition of the British Colonial and Indian Empire, and subsequently incorporated by Your Majesty's Royal Charter of the 10th September 1885, I humbly beg leave to lay before you a brief statement of our proceedings up to the present time. The general interest manifested in the display made by Your Majesty's Colonial and Indian Empire at the Paris Exhibition of 1878 led me, as President of the British Commission, to express a hope that an opportunity might soon occur by which Your Majesty's subjects in

England would be enable to witness the marvellous development which, under your beneficent rule, their brethren and fellow-subjects had attained throughout so many portions of the globe. It was, therefore, with the highest gratification that I accepted Your Majesty's gracious invitation to assume the Executive Presidency of this Commission, the appointment of which by Your Majesty has been the means of making this hope a reality. The invitations which we were empowered by Your Majesty to issue to the Colonial Governments and to the Government of India were forwarded towards the close of the year 1884, and from the answers received it at once became apparent that this undertaking had obtained warm and hearty sympathy throughout Your Majesty's dominions. In your Majesty's dominion of Canada, throughout your Australasian, African, West Indian, and Eastern Colonies, in your Mediterranean Possessions and elsewhere, grants were voted, Commissions formed, and Executive Commissioners appointed. That the work of preparation was undertaken with enthusiasm and attended with success, is evident from the complete and varied collections which at present fill the buildings through which Your Majesty has just passed. The response received from the Government of India was also of the most cordial character. His Excellency the Viceroy caused, through the Revenue and Agricultural Department, instructions to be issued to every district of Your Majesty's Indian Empire for the collection of objects illustrative of the arts, manufactures, and resources of that great realm. These collections, which now adorn a large section of the Exhibition, have been supplemented by generous contributions from their Highnesses the Princes of India, by collections the formation of which we ourselves have authorised, and by the contributions of private Native exhibitors. We are desirous of bringing under Your Majesty's notice our deep appreciation of the hearty co-operation of the Colonial Governments in this Exhibition, and of taking this exceptional opportunity of stating how greatly we are indebted to the Commissions appointed by these Governments and to the Executive Commissioners on whom the superintendence of the entire work of installation has devolved. We further desire to record the valuable assistance which we have received from Your Majesty's Viceroy, from the Supreme Government of India, and from the various officials who have so ably and thoroughly carried out their instructions. Our grateful thanks are also due to the Colonial Governments, to the Government of India, to the Corporation of the City of London, to many City Companies, and to the firms and individuals who have contributed to the guarantee funds. The fact that the list of subscribers not only includes those whose interests are likely to be specially affected by the Exhibition, but also comprehends every class of the community, supplies a gratifying proof of the universal sympathy and interest which this undertaking has aroused. We venture to avail ourselves of this opportunity to convey to Your Majesty our dutiful and loyal acknowledgments of the interest which Your Majesty has been pleased to take in our labours, proved as it is by Your Majesty's presence here to-day; nor can I resist a reference to a similar ceremonial presided over by Your Majesty, but a few paces from this spot, thirty-five years ago. On that memorable occasion, the first of its kind, the Prince Consort, my beloved and revered father, filled the position which I, following in his footsteps at however great a distance, now have the honour and gratification of occupying. Your Majesty alone can fully realise with what deep interest my beloved father would, had he been spared, have watched, as their originator, the development of the Exhibitions both in this country and abroad, and with what especial pleasure he would have welcomed one having for its object the prosperity of Your Majesty's Empire, the interests of which he had so much at heart. In the great Exhibition of 1851 Your Majesty's Colonial and Indian Possessions were indeed represented, but their importance was then but little realised, and their present greatness was at that time unforeseen. During the years that have elapsed since 1851, few greater changes have been wrought than the marvellous development of the outlying portions of your Majesty's Empire. It is our heartfelt prayer that an undertaking intended to illustrate and to record this development may give a stimulus to the commercial interests and intercourse of all parts of Your Majesty's dominions: that it may be the means of augmenting that warm affection and brotherly sympathy which is reciprocated by all Your Majesty's subjects; and that it may still further deepen that steadfast loyalty which we, who dwell in the Mother-country, share with our kindred who have elsewhere so nobly done honour to her name.

Reply of Her Majesty the Queen-Empress.

I receive with the greatest satisfaction the Address which you have presented to me on the opening of this Exhibition. I have observed with a warm and increasing interest the progress of your proceedings in the execution of the duties entrusted to you by the Royal Commission, and it affords me sincere gratification to witness the successful result of your judicious and unremitting exertions in the magnificent Exhibition which has been gathered together here to-day. I am deeply moved by your reference to the circumstances in which the ceremony of 1851 took place, and I heartily concur in the belief you have expressed that the Prince Consort, my beloved husband, had he been spared, would have witnessed with intense interest the development of his ideas, and would, I may add, have seen with pleasure our Son taking the lead in the movement of which he was the originator. I cordially concur with you in the prayer, that this undertaking may be the means of imparting a stimulus to the commercial interests and intercourse of all parts of my dominions by encouraging the arts of peace and industry, and by strengthening the bond of union which now exists in every portion of my Empire.

ODE ON THE OPENING
OF THE
COLONIAL AND INDIAN EXHIBITION

BY

LORD TENNYSON, POET LAUREATE.

Welcome ! welcome ! with one voice
In your welfare we rejoice,
Sons and brothers that have sent
From Isle and Cape and Continent
Produce of your field and flood,
Mount and mine, and primal wood,
Works of subtle brain and hand,
And splendours of the morning land,
Gifts from every British zone.
Britons hold your own !
May we find, as ages run,
The mother featured in the son !
And may yours for ever be
That old strength and constancy,
Which has made your fathers great
In our ancient Island State,
And where'er her flag may fly.
Glorying between sea and sky,
Makes the might of Britain known !
Britons hold your own !
Britain fought her sons of yore :
Britain failed ; and never more,
Careless of our growing kin,
Shall we sin our fathers' sin—
Men, that in a narrower day,
Unprophetic rulers they,
Drove from out the mother's nest
That young eagle of the West
To forage for herself alone.
Britons hold your own !
Sharers of our glorious past,
Brothers, must we part at last ?
Shall not we, through good and ill,
Cleave to one another still ?
Britain's myriad voices call :
Sons, be welded each and all
Into one Imperial whole,
One with Britain heart and soul,
One life, one flag, one fleet, one throne !
Britons hold your own !
And God guard all !

Chittagong Collectorate, the 13th March 1886.

A. MANSON, Collector.

NOTICE is hereby given, under section 6, Act XI of 1859, that the undermentioned Estates, in the district of Tipperah, will be put up to public and unreserved sale at the Collector's office of that district on the 20th day of May 1886 for arrears of revenue and other demands, which, by the Regulations and Acts in force, are directed to be realized in the same manner as arrears of revenue due on the 28th day of September 1885 :—

Separate accounts, under section 10 of Act XI of 1859, were opened in respect of the 3 shares from which arrears are due. These shares were once put up to sale for arrears of revenue on the 5th January last, and the bid at which the said shares were knocked down was below the amount due to Government. Against this sale an appeal was preferred to the Commissioner of the division, who upset the sale on the 19th March last on grounds of illegality, and directed to take steps under section 14 of the sale law. Accordingly a notice was served upon the proprietors, but no one paid the arrears. Hence the entire mehal is now advertised for sale.

Tipperah Collectorate, the 7th April 1886.

A. MANSON, Collector.

NOTICE is hereby given that the lease of the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Commissioner of the Sundarbans, has been applied for by Huri Mohun Basar, and will be sold at 12 o'clock noon on the 2nd August 1886, Monday (18th Shraban 1293 B.E.), at the Sundarban Commissioner's Office at Alipur, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

2. The lease of the land will be granted subject to the conditions which are specified below, as well as to the general terms annexed to the rules for the sale of leases of waste lands, dated 12th November 1879.

Conditions.

That the lands shall be subject to all existing rights of all way and water and all other easements

That the right of using all streams and channels in any way navigable shall be reserved to public, as also the use of a towpath, not less than 25 feet in width, on each side of every such stream and channel.

That no charge shall be made for wood and timber standing on the land at the time it is leased, nor for any wood which may be cut and burnt to effect clearances, or which may be used on the lands. But for wood and timber exported for sale, a duty shall be levied at such rate and in such manner as may from time to time be prescribed by Government.

That the Government reserves to itself the right to all minerals in the land, together with such right of way and other reasonable facilities as may be requisite for working, getting and carrying any such minerals. It also retains its proprietary right in the land, and only confers on the lessees an occupancy right which shall be hereditary and transferable.

J. ELLISON, Deputy Collector in charge.

NOTICE is hereby given that the proprietary right of Government to the undermentioned lands, known as Government Lottery Committee lands, situated in the town of Calcutta, will be put up to sale by public auction at the Calcutta Collectorate at 12 A.M. on the 21st June 1886, corresponding with 5th of Ashar 1293.

The purchaser will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The lands to be sold to the highest bidder above the upset price. The purchaser of the lands will be considered as the proprietor of the lands, and the entire proprietary right of Government in such lands will be transferred to him subject to the payment of Government revenue of 3 annas per kattah.

2nd.—The sale to be subject to existing leases.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid at once.

4th.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that be a close holiday, then by the noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the land to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance

GOVERNMENT OF BENGAL, MUNICIPAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS—(No. 26.)

AFRICA—NORTH-EAST COAST.

GULF OF ADEN.

GULF OF TEJUREH.

Port of Obokh.

(1) Buoys marking entrance to Port.

The Officer Commanding the French Gun-boat *Meteor* through the French Consul at Aden has given notice that the *two small* buoys, which hitherto marked the entrance to the port of Obokh have been replaced by *two large nun* buoys, each surmounted by a *staff* and *ball*.

The *buoys*, which are easily discernible at a considerable distance, are moored about 12 feet from the edge of the Reefs; the *black* buoy on the port hand, entering the harbour, and the *red* buoy on the starboard hand.

(2) GHUBBET KHARAB.

Reef in large pass.

Also that information has been received of the existence of a reef lying in the middle of the Large Pass, at the entrance to the Ghubbet Kharab, Gulf of Tejureh, on which the French despatch boat *Penguin* recently struck.

A depth of two feet, at low-water spring tides, was found over it.

As the precise limits of this reef have not yet been ascertained, vessels are, for the present, recommended to use due caution when proceeding in or out of the Large Pass.

Educational Prospectus.

THE Calcutta Medical College Session, 1886-87, will commence on the 23rd June next. Students who may be desirous of commencing their studies are requested to apply to the Principal between the hours of 11 A.M. and 4 P.M. on or before that date.

2. Ten (10) free presentations will then be awarded. These are given to students according to their relative position in the University, B.A., B.L. and F.A. Examinations, preference being given to those who have passed the highest examination.

3. No person shall be enrolled as a matriculated student of the College who has not previously passed the First Arts Examination of the Calcutta University, or some one of the preliminary Arts Examination of the United Kingdom recognised by the British General Medical Council.

4. All matriculated students of the College are required to pay Rs. 15 on entrance, Rs. 30 for the summer session on the 23rd June, and Rs. 30 for the winter session on 1st November of each year.

5. Students who have failed to pass their final examination, and who, under the regulations of the University, are required to attend a further course of lectures and of hospital practice before being allowed to present themselves again for examination, will pay for such further course an annual fee of Rs. 45 in two instalments of Rs. 30 and Rs. 15, payable at the beginning of the summer and winter sessions respectively.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following:—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student shall be deducted.

8. Any person not being a matriculated student of the College, who may be desirous of attending any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 6.

If such student has passed the Entrance Examination of the University, he may receive certificates of attendance at lectures, provided the Professors are satisfied that he has attended the full course of lectures, and has mastered the subjects taught.

A student who has not passed the Entrance Examination will be entitled to no certificates of any kind.

9. College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospital Apprentice and Female Certificate class.

A gold medal and certificates of honour are awarded to the best students in each subject.

Goodeve and Macnamara silver medals are given to 1st-year student in Anatomy and Chemistry.

10. College scholars, who receive less than Rs. 20 per mensem, are not required to pay Rs. 30 per session.

The holders of the Doorga Charan Laha and all other scholarships will be required to pay fees as a matriculated student. These scholars may pay their fees in advance, or have their scholarship money deducted till the full amount is received.

11. Any student holding a Medical College scholarship will be permitted to draw the stipend of the said scholarship at any recognized Medical School in the United Kingdom, provided he furnishes from the head of such school a certificate of good conduct and diligent prosecution of his studies.

12. The class assistants of Pathology, Physiology and Comparative Anatomy can be held only by matriculated students of the College.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned escheated property situate in the district of Chittagong will be put up to sale at the camp of the Deputy Collector near the Police station, Mirkisera, on the 20th May 1886, corresponding with 7th Joisto 1293 B.S., Thursday.

The purchasers will be subject to the following conditions of sale.

CONDITIONS OF SALE.

Firstly.—The tenures will be sold to the highest bidder above the upset price. The purchaser will acquire the entire proprietary right of Government in such tenure.

Secondly.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once, unless otherwise specially directed by the Deputy Collector holding the sale.

Thirdly.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the tenure to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale. The Deputy Collector will have power to put up the several lots singly or together, as may be found desirable at the time of sale.

Separate accounts, under section 10 of Act XI of 1859, were opened in respect of the 3 shares from which arrears are due. These shares were once put up to sale for arrears of revenue on the 5th January last, and the bid at which the said shares were knocked down was below the amount due to Government. Against this sale an appeal was preferred to the Commissioner of the division, who upset the sale on the 19th March last on grounds of illegality, and directed to take steps under section 14 of the sale law. Accordingly a notice was served upon the proprietors, but no one paid the arrears. Hence the entire mehal is now advertised for sale.

Tipperah Collectorate, the 7th April 1886.

Hooghly Collectorate, the 14th May 1886.

RADHA SYAM SINHA DE, for Collector.

NOTICE is hereby given that the proprietary right of Government to the undermentioned lands, known as Government Lottery Committee lands, situated in the town of Calcutta, will be put up to sale by public auction at the Calcutta Collectorate at 12 A.M. on the 21st June 1886, corresponding with 5th of Ashar 1293. The purchaser will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The lands to be sold to the highest bidder above the upset price. The purchaser of the lands will be considered as the proprietor of the lands, and the entire proprietary right of Government in such lands will be transferred to him subject to the payment of Government revenue of 3 annas per kattah.

2nd.—The sale to be subject to existing leases.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid at once.

4th.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that be a close holiday, then by the noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the land to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e., from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

INSTRUCTIONS.

1. *Dhubri and Goalundo route to Assam.*—(a).—When emigrants are to proceed *via* Dhubri, the person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year before the Hospital Assistant at Jaipore Hât, and the Embarkation Agent at Dhubri, who will endorse his remarks on the way-bill, and then either make it over to the master of the steamer should the batch proceed to destination by water, or return it to the person in charge should the batch proceed to destination by land. In the former case, the master must be careful, when emigrants are being finally landed, to make over the way-bill to the Debarkation or final Inspecting Officer concerned for its return with his remarks endorsed thereon to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta. In the latter case, the person in charge must, on arrival in the district or sub-division in which the garden where the labourers are to work is situate, place the emigrants, with their way-bill, before the Magistrate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta.

(b).—When emigrants are to proceed *via* Goalundo, the person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year before the Embarkation Agent, or, in his absence, the Magistrate at Goalundo, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Dhubri, must place the way-bill before the Embarkation Agent at Dhubri for his endorsement after inspection of the emigrants, and on the completion of the voyage, or when any batch is about to be landed at its destination, make over the document to the Debarkation or final Inspecting Officer concerned for its return with his remarks endorsed thereon to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

2. *Goalundo route to Cachar or Sylhet.*—(a).—When emigrants are to proceed by steamer, the person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route; and throughout the year before the Embarkation Agent, or, in his absence, the Magistrate at Goalundo, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the completion of the voyage, or when any batch is about to be landed at its destination, must make over the way-bill to the Debarkation or final Inspecting Officer concerned for its return with his remarks endorsed thereon to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

(b).—When emigrants are to proceed by country boat, the person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year, before the Embarkation Agent, or, in his absence, the Magistrate at Goalundo, the Sub divisional Officer at Narsinghganj, and the Magistrate of the district or sub-division in which the garden where the labourers are to work is situate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent or Magistrate concerned in the embarkation for information and transmission to the Superintendent of Emigration at Calcutta.

3. *Calcutta route to Chittagong*—When emigrants are to proceed to Chittagong or Chittagong Hill Tracts *via* Calcutta, the person in charge must place them for inspection, with their way-bill, before the Superintendent of Emigration at Calcutta, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Chittagong, must place the way-bill before the Magistrate at the place of disembarkation, who will, after endorsing his remarks thereon and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Superintendent of Emigration at Calcutta, for information.

4. *Treatment of emigrants on the journey.*—The person in charge must take every care of the emigrants during the journey. He must give them a cooked meal before they start; and if the journey is likely to occupy more than six hours, he must distribute biscuits and sugar in the proportion of two biscuits and one ounce of sugar to each emigrant of and above ten years of age, and one biscuit and half an ounce of sugar to each emigrant under the age of ten years; and if more than eight hours, dry provision must be supplied, such as choora, suttoo, and the like, in such quantity as may be determined by the Superintendent of Emigration or other authorised officer. It must be seen that the clothing provided is worn by the emigrants whenever the weather renders such a precaution necessary. At the close of every day's march, or of a train journey, the emigrants must be properly housed, and provided with a cooked meal and wholesome supply of water for drinking and ablution purposes.

5. *Any special instructions.*

6. *Obedience to instructions.*—The instructions on the way-bill must be strictly complied with; and any failure to do so, or ill-treatment of any emigrant, will render the person in charge of the batch liable to punishment under the provisions of section 148 of Act I of 1882, or in case he is a licensed person, to cancellation and refusal of license thereafter.

(1) Buoys marking entrance to Port.

The Officer Commanding the French Gun-boat *Meteor* through the French Consul at Aden has given notice that the *two small* buoys, which hitherto marked the entrance to the port of Obokh have been replaced by *two large nun* buoys, each surmounted by a *staff* and *ball*.

The *buoys*, which are easily discernible at a considerable distance, are moored about 12 feet from the edge of the Reefs; the *black* buoy on the port hand, entering the harbour, and the *red* buoy on the starboard hand.

(2) GHUBBET KHARAB.

Reef in large pass.

Also that information has been received of the existence of a reef lying in the middle of the Large Pass, at the entrance to the Ghubbet Kharab, Gulf of Tejureh, on which the French despatch boat *Penguin* recently struck.

A depth of two feet, at low-water spring tides, was found over it.

As the precise limits of this reef have not yet been ascertained, vessels are, for the present, recommended to use due caution when proceeding in or out of the Large Pass.

1. *Dhubri and Goalundo route to Assam.*—(a).—When emigrants are to proceed *via* Dhubri, the sardar or person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year before the Hospital Assistant at Jaipore Hât, and the Embarkation Agent at Dhubri, who will endorse his remarks on the way-bill, and then either make it over to the master of the steamer should the batch proceed to destination by water, or return it to the sardar or person in charge should the batch proceed to destination by land. In the former case, the master must be careful, when emigrants are being finally landed, to make over the way-bill to the Debarkation or final Inspecting Officer concerned for its return with his remarks endorsed thereon to the sardar or person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta. In the latter case, the sardar or person in charge must, on arrival in the district or sub-division in which the garden where the labourers are to work is situate, place the emigrants, with their way-bill, before the Magistrate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the sardar or person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta.

(b).—When emigrants are to proceed *via* Goalundo, the sardar or person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year, before the Embarkation Agent, or, in his absence, the Magistrate at Goalundo, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Dhubri, must place the way-bill before the Embarkation Agent at Dhubri for his endorsement after inspection of the emigrants, and on the completion of the voyage, or when any batch is about to be landed at its destination, make over the document to the Debarkation or final Inspecting Officer concerned for its return with his remarks endorsed thereon to the sardar or person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

2. *Goalundo route to Cachar or Sylhet.* (a).—When emigrants are to proceed by steamer, the sardar or person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year before the Embarkation Agent, or, in his absence, the Magistrate at Goalundo, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the completion of the voyage, or when any batch is about to be landed at its destination, must make over the way-bill to the Debarkation or final Inspecting Officer concerned, for its return with his remarks endorsed thereon to the sardar or person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Goalundo, for information and transmission to the Superintendent of Emigration at Calcutta.

(b).—When emigrants are to proceed by country boat, the sardar or person in charge must place them for inspection, together with their way-bill, during five months of the year (15th January to 15th June), before the Medical Officer at Mugra, if taking the Mugra and Kanchrapara route, and throughout the year before the Embarkation Agent, or, in his absence, the Magistrate at Goalundo, the Sub-divisional Officer at Naraingunge, and the Magistrate of the district or sub-division in which the garden where the labourers are to work is situate, who will, after endorsing his remarks on the way-bill, and filling in abstract, return it to the sardar or person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent or Magistrate concerned in the embarkation for information and transmission to the Superintendent of Emigration at Calcutta.

3. *Calcutta route to Chittagong.*—When emigrants are to proceed to Chittagong or Chittagong Hill Tracts *via* Calcutta, the sardar or person in charge must place them for inspection with their way-bill before the Superintendent of Emigration at Calcutta, who will endorse his remarks in the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Chittagong, must place the way-bill before the Magistrate at the place of disembarkation, who will, after endorsing his remarks thereon, and filling in abstract, return it to the sardar or person in charge of the batch for delivery to the employer. After perusal and

entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Superintendent of Emigration at Calcutta for information.

4. *Treatment of emigrants on the journey.*—The sardar or person in charge must take every care of the emigrants during the journey. He must give them a cooked meal before they start; and, if the journey is likely to occupy more than six hours, he must distribute biscuits and sugar in the proportion of two biscuits and one ounce of sugar to each emigrant of and above ten years of age, and one biscuit and half an ounce of sugar to each emigrant under the age of ten years; and if more than eight hours, dry provision must be supplied, such as choora, suttoo, and the like, in such quantity as may be determined by the Superintendent of Emigration or other authorized officer. It must be seen that the clothing provided is worn by the emigrants whenever the weather renders such a precaution necessary. At the close of every day's march, or of a train journey, the emigrants must be properly housed, and provided with a cooked meal and wholesome supply of water for drinking and ablution purposes.

5. *Any special instructions.*

6. *Obedience to instructions.*—The instructions on the way-bill must be strictly complied with; and any failure to do so, or ill-treatment of any emigrant, will render the sardar or person in charge of the batch liable to punishment under the provisions of section 153 of Act I of 1882, or, in case he is a sardar, to refusal of recruiting certificate thereafter.

(1) Buoys marking entrance to Port.

The Officer Commanding the French Gun-boat *Meteor* through the French Consul at Aden has given notice that the *two small* buoys, which hitherto marked the entrance to the port of Obokh have been replaced by *two large* nun buoys, each surmounted by a *staff* and *ball*.

The *buoys*, which are easily discernible at a considerable distance, are moored about 12 feet from the edge of the Reefs; the *black* buoy on the port hand, entering the harbour, and the *red* buoy on the starboard hand.

(2) GHUBBET KHARAB.

Reef in large pass.

Also that information has been received of the existence of a reef lying in the middle of the Large Pass, at the entrance to the Ghubbet Kharab, Gulf of Tejureh, on which the French despatch boat *Penguin* recently struck.

A depth of two feet, at low-water spring tides, was found over it.

As the precise limits of this reef have not yet been ascertained, vessels are, for the present, recommended to use due caution when proceeding in or out of the Large Pass.

Students who have failed to pass their final examination, and who, under the regulations of the University, are required to attend a further course of lectures and, of hospital practice before being allowed to present themselves again for examination, will pay for such further course an annual fee of Rs. 45 in two instalments of Rs. 80 and Rs. 15, payable at the beginning of the summer and winter sessions respectively.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following:—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student shall be deducted.

8. Any person not being a matriculated student of the College, who may be desirous of attending any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 6.

If such student has passed the Entrance Examination of the University, he may receive certificates of attendance at lectures, provided the Professors are satisfied that he has attended the full course of lectures, and has mastered the subjects taught.

A student who has not passed the Entrance Examination will be entitled to no certificates of any kind.

9. College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospital Apprentice and Female Certificate class.

A gold medal and certificates of honour are awarded to the best students in each subject.

Goodeve and Macnamara silver medals are given to 1st-year student in Anatomy and Chemistry.

10. College scholars, who receive less than Rs. 20 per mensem, are not required to pay Rs. 30 per session.

The holders of the Doorga Charan Laha and all other scholarships will be required to pay fees as a matriculated student. These scholars may pay their fees in advance, or have their scholarship money deducted till the full amount is received.

11. Any student holding a Medical College scholarship will be permitted to draw the stipend of the said scholarship at any recognized Medical School in the United Kingdom, provided he furnishes from the head of such school a certificate of good conduct and diligent prosecution of his studies.

12. The class assistants of Pathology, Physiology and Comparative Anatomy can be held only by matriculated students of the College.

Hooghly Collectorate, the 14th May 1886.

RADHA SYAM SINHA DE, for Collector.

NOTICE is hereby given that the proprietary right of Government to the undermentioned lands, known Government Lottery Committee lands, situated in the town of Calcutta, will be put up to sale by public auction at the Calcutta Collectorate at 12 A.M. on the 21st June 1886, corresponding with 8th of Ashar 1293. The purchaser will be subject to the following conditions of sale:—

Conditions of Sale.

- 1st.—The lands to be sold to the highest bidder above the upset price. The purchaser of the lands will be considered as the proprietor of the lands, and the entire proprietary right of Government in such lands will be transferred to him subject to the payment of Government revenue of 3 annas per kuttah.
- 2nd.—The sale to be subject to existing leases.
- 3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid at once.
- 4th.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, if that be a close holiday, then by the noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government) and the land to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

Without postage. With postage.

REPORT OF THE HEALTH OFFICER OF THE PORT OF CALCUTTA FOR 1885.

MARINE.

Darjeeling, the 27th April 1886.

RESOLUTION.

READ—

A letter No. 934RA, dated the 28th February 1886, from the Sanitary Commissioner for Bengal, submitting the Report of the Health Officer of the Port of Calcutta for 1885.

Dr. Lynch was the Health Officer of the Port of Calcutta throughout the year, and his report is forwarded by the Sanitary Commissioner.

2. During the year the Health Officer inspected 780 in-coming vessels, of which 646 were engaged in the foreign trade and 134 were coasters. The total number included 387 steamers and 393 sailing vessels, which, classified according to nationality, were 665 British, 39 French, 12 German, 6 Norwegian, 4 Swedish, 17 American, 9 Austro-Hungarian, 5 Italian, 1 Danish, 15 Arab and Turk, 4 Zanzibar, 2 Maldiva, and 1 Siamese. The crews amounted to a total of 35,879, of whom 18,989 were Europeans and 16,890 natives. The out-going vessels inspected were 626 in number, of which 551 were in the foreign and 75 in the coasting trade. They carried a total number of 15,882 European and 10,134 native seamen. Compared with

the previous year, the number of vessels inspected shows an increase; 715 in-coming and 482 out-going, or a total of 1,197 vessels, having been inspected in 1884. The increase is reported to be partly due to the new system introduced in September last of granting bills-of-health on board after inspection of vessels.

3. The health of the European seamen was exceptionally good during the year. The average number admitted into the hospital was 1,167 against an average of 1,254 for the five previous years. The death-rate, 23·6, fell also to nearly one-half of what it was in 1884. The mortality from cholera during the past year appears to have been the lowest ever recorded in the port, the ratio per mille being 4·13 against 21·37 in the previous year, and 19·91, the mean of the quinquennium 1880-84. The distribution of this disease on the river seems to very nearly coincide with its distribution on shore, and the decline in mortality from this cause among the seamen corresponds very closely with the figures for the whole town. There were no deaths from diarrhoea during the year, but there was an increased prevalence of dysentery as compared with the two preceding years, the death-rate being 3·54 against an average of 2·34 for the five previous years. Fevers were more numerous than in the previous years. There were three cases of small-pox, but none terminated fatally. The number of cases of sunstroke admitted into the hospital fell from 13 in 1884 to 5 in 1885, which shows that endeavours are made to prevent unnecessary exposure of sailors on board ships. There has been no increase of venereal disease among the European seamen, notwithstanding the withdrawal of the Contagious Diseases Act from Calcutta.

4. The total mortality afloat and in hospital among the native population of the port, numbered at 25,000 in the census of 1881, gave a rate of 4 per 1,000 as compared with 7 in 1884, the decrease being due to a falling off in the number of deaths from cholera. In 1884, 138 deaths from cholera occurred, while in 1885 the number fell to 59—a lower mortality than has been recorded in any year since 1880. Bowel-complaints were more numerous than in 1884. Fevers and small-pox, however, caused fewer deaths.

4. Thirteen cases of scurvy among European seamen, against 24 in 1884, were treated in the past year. The disease was in no case due to improper food or neglect of rules. Seven cases of scurvy were found on board a vessel from New York carrying a lascar crew. It appeared from enquiries made that the vegetables supplied to them were not in accordance with the terms of their agreement. They were, moreover, supplied with two indifferent and suspicious kinds of lime-juice—one containing an insufficient quantity of citric acid, and the other an excess over the authorized standard.

5. The sanitary condition of both banks of the river seems to have been to some extent unsatisfactory; but measures were taken for the removal of the more serious nuisances. A great number of floating bodies are still met with in the river. Last year 50 human bodies and 4,136 carcasses of animals were removed by the conservancy establishment of the River Police, against 86 bodies and 3,975 carcasses in the previous year. There were no complaints during the year regarding the quality of the filtered water supplied to the shipping by the Municipality, but the Health Officer objects to the manner in which the water is conveyed to the shipping. The attention of the Municipality will be called to the remarks made by him on the subject.

6. The usual inquiries were made as to the health and treatment of lascar crews. Only one case of ill-treatment was brought to notice, in which no lime-juice was supplied at sea to the crew of a sailing vessel, and compensation was subsequently made to the crew. The Compulsory Vaccination Act was, owing to the absence of small-pox in the port, and pending the passing of the new Act, not put in force.

7. The suggestion made by the Health Officer that it is inexpedient to withhold the bill-of-health in the case of a vessel carrying an excess number of passengers, when other and more obvious means of insisting on compliance with the provisions of the Native Passengers Ships Act are available, and his proposal to withdraw the discretionary power exercised by pilots under the Medical Inspection Rules, of bringing vessels carrying pilgrims into port, and allowing

the pilgrims to leave the vessel, should be made the subject of separate communications. The attention of the Port Officer will be drawn to the complaint made by the Health Officer regarding the insecurity of the boats which he and his Native Inspector have to employ in the performance of their duties.

8. The inspection of the native population afloat was in the hands of the Native Inspector, who is stated to have sought out cases of sickness and to have endeavoured to get the sufferers removed to hospital. He appears to have shown zeal and activity in his work.

9. The thanks of the Lieutenant-Governor are due to Dr. Lynch for his efficient supervision of the sanitation of the port during the past year.

By order of the Lieutenant-Governor of Bengal,

R. H. WILSON,

Offg. Secretary to the Government of Bengal.

BUDGET ORDERS FOR 1886-87.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

IRRIGATION ACCOUNTS.

No. 685I.A., dated Calcutta, the 28th April 1886.

READ—

Government of Bengal, Financial Department, memorandum No. 584, dated 18th February 1886, showing the revised estimates for 1885-86 and the estimates for 1886-87 under the several heads of the Public Works Department as finally accepted by the Financial Department.

Government of India, Public Works Department orders No. 294I., dated 23rd March 1886, on the Irrigation Branch, Bengal, budget estimate for the year 1886-87.

REMARKS.—The budget estimates of Irrigation and Navigation works for the year 1886-87 have been prepared in the revised forms issued with Public Works Department Circular No. X of 1886. They are of the following works:—

- (1) Irrigation and Navigation Productive Public works.
- (2) Irrigation and Navigation works not classed as Productive.

Irrigation and Navigation Productive Public Works

2. The following statement shows under the three main heads of "Water-rates," "Navigation," and "Miscellaneous," the revenues estimated to be realized in 1886-87 compared with the revised and budget estimates for 1885-86 and the actuals of 1884-85 from the "Productive" Irrigation Works:—

GRAND TOTAL ...	13,30,000	13,50,000	12,00,000	13,07,521

3. The revised estimate for 1885-86, compared with the budget estimate for that year, shows an increase of Rs. 1,50,000, principally due to increased

water-rates expected from the Sone Canals. The budget estimate for 1886-87, however, shows a slight falling off, compared with the year 1885-86, as decrease in collections of balance of water-rates in arrears on account of the Sone Canals is expected.

It is now known that the collections in the Sone Canals will be in excess of the revised estimate, a considerable portion of "arrears" having been realized; this may still further reduce the collections for the current year.

4. The two statements given below show the distribution, by projects and departmental heads, of the grants sanctioned for 1886-87 compared with the revised and budget estimates for 1885-86 and the actuals of 1884-85:—

Capital expenditure on Public Works (not charged against Revenue).

8. The estimate of receipts is the same as in the preliminary issue, and shows, compared with the revised estimate for 1885-86, a slight increase of Rs. 14,000 under Provincial due to probable enhancement from the Calcutta and Eastern Canals and Orissa Coast Canal lately partially opened.

9. The estimate of expenditure in the final issue has been altered, and the amounts shewn are those sanctioned, viz. Rs. 5,31,000 for Imperial Agricultural works, which is less than the provision in the preliminary issue by Rs. 34,000, and Rs. 8,40,000 for Provincial works as fixed in the Financial Department memorandum No. 584, dated 18th February last, which is Rs. 85,000 less than the amount in the preliminary issue accepted by the Government of India.

10. The statements of revenue and expenditure as given in the orders of the Government of India include certain sums on account of works in charge of civil officers. These sums have not been included in the foregoing statements, not being shown in the budget estimate of the Irrigation Branch.

11. With reference to the remark of the Government of India, requesting an early report explaining the steps that are being taken for the preparation of a revised estimate for the Orissa Coast Canal, an estimate giving full information, together with a supplementary estimate for the Hidgellee Tidal Canal, was submitted in March last.

12. Superintending Engineers are expected to be careful that no expenditure is incurred without properly sanctioned estimates.

Ordered that a copy of this Resolution, together with thirty-five copies of the budget estimates (final issue), be forwarded to the Government of India, for information.

Ordered also that copies of this Resolution and of the orders of the Government of India, together with the budget estimates, be forwarded to the Financial Department of this Government and the Accountant-General, Bengal, for information; also to the Superintending Engineers of the Orissa, South-Western and Sone Circles, and the Examiner of Public Works Accounts, Bengal, for information and guidance.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILLE, *Col.*, R.E.,

Joint-Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON ROAD AND PUBLIC WORKS CESS OPERATIONS FOR THE CESS YEAR 1884-85.

FINANCIAL DEPARTMENT—ROAD AND PUBLIC WORKS CESS.

Dated Darjeeling, the 1st May 1886.

RESOLUTION.

READ—

The Report of the Board of Revenue on Road and Public Works Cess operations for the cess year 1884-85, terminating on the 30th September 1885.

Read also—

The Report for 1883-84, and the Resolution recorded upon it.

THE Lieutenant-Governor regrets to notice the want of punctuality in the submission of the Commissioners' reports to the Board. On the present occasion, none of these were received by the Board till after the prescribed date, the 15th January; while that of the Commissioner of Burdwan had not been received by the 1st March, when the Board's report was submitted. Greater punctuality must be observed in future, and an explanation should be submitted of the extraordinary want of punctuality in the Burdwan Division.

2. No change was made in the rate at which either of the cesses is levied, the maximum rates having been levied in all the districts in which the Act is in force except Backergunge, where, as hitherto, the road cess was levied at half rates. The statement below compares the results of the year with those of the three preceding years:—

	DEMAND.			BALANCES.			Deduct remissions.	Net arrears.	Percentage of net balance on gross demand.
	Current.	Arrear.	Total.	Current.	Arrear.	Total.			
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

1882-83	73,10,811	11,42,206	84,53,107	10,09,330	1,77,390	11,86,720	27,040	11,58,780	13.7
1883-84	79,75,697	12,60,272	92,35,969	13,66,778	2,64,196	16,30,974	20,933	16,10,041	18.4
1884-85	74,36,830	15,93,317	90,30,147	11,00,097	3,07,191	14,07,288	38,657	13,68,631	15.8

The current demand of the year rose to Rs. 74,36,830 from Rs. 73,75,697 in 1883-84. This increase is explained to be due to revaluations and the valuation for the first time of rent-free holdings under the provisions of Chapter IV, Part II of the Act. The gross demand, which was Rs. 86,35,969 in the previous year, increased to Rs. 90,30,147. Nevertheless, there was an improvement in the net outstanding balance at the close of the year, which fell from Rs. 15,93,981 to Rs. 14,28,631, representing a reduction from 18.4 to 15.8 in the percentage on the gross demand. The arrear balance, however, rose from Rs. 2,64,196 to Rs. 3,07,191, and this must be regarded as unsatisfactory, although it was partly due to the larger arrears with which the year opened. The Lieutenant-Governor is glad to notice that the percentage of arrear collections on arrear demand rose from 71 to 80, and he hopes that district and divisional officers will bear steadily in mind the sound dictum of the Board that "the absence of an arrear demand is the best evidence of efficient collections, and that a Collector's first attention should be given to the adjustment of arrear balances." The figures in the last column of the above statement show that the standard of the year was still below that of 1881-82 and 1882-83. This is explained as due partly to the growth of the gross demand, and partly to the distress caused by the floods in many districts. The Lieutenant-Governor is unwilling to acknowledge the first cause as a reason for an increase in the net balance relatively to the gross demand, and he hopes that the Board will be able to overcome it by increased vigilance. The second cause is valid, and justifies some postponement of collections. As affecting the question of unrealised balances, it is recognised that the provision of section 45 of the Act, which allows 15 days' grace after the latest date for payment, will always throw the payments due in the last quarter ending on the 28th September into the next year. The results of operations as regards collections between October and the end of December 1885 are shown in paragraphs 16 to 18 of the Board's report, and indicate considerable reductions in outstanding balances.

3. Proceeding to details, the collections are subjected by the Board to the three tests prescribed by Government to measure the success or failure of the year's operations, viz.—(1) comparison of the arrear collections with arrear balances; (2) comparison of current collections with net current demand; and (3) comparison, of advance payments with those made in the previous year. In the following districts the arrear collections were less than 90 per cent. of the arrear demand:—

				Percentage of arrear collection on arrear demand.	Percentage of current collection on current demand.
Burdwan	...	...	...	43·	81·9
Moorshedabad	...	...	...	59·1	87·9
Hooghly	...	...	...	61·3	70·6
Bankoora	...	...	...	63·5	86·9
Cuttack	...	...	...	69·2	90·6
Balasore	...	...	...	69·9	85·7
Durbhunga	...	...	...	70·6	86·9
Furreedpore	...	...	...	74·6	63·7
Mozufferpore	...	...	...	75·6	77·6
Shahabad	...	...	...	81·2	79·1
Backergunge	...	...	...	81·3	71·3
Bhagulpore	...	...	...	81·5	91·4
Maldah	...	...	...	85·1	83·4
Patna	...	...	...	86·6	80·3
Monghyr	...	...	...	86·6	87·4
Midnapore	...	...	...	87·1	68·1
Pubna	...	...	...	87·8	90·5
Dacca	...	...	...	89·1	72·1
Nuddea	...	...	...	89·5	87·2

Of these 19 districts, 16 are the same as those which appeared in the list last year. Chittagong has gone out, and Backergunge, Maldah, and Pubna have been added. In Pubna, however, the arrears were small and the current collections good, having been 90·5 per cent. on the demand. In the resolution recorded last year, it was noticed that collections had been unfavourably affected in the districts of Burdwan and Hooghly by the inclusion of three years' arrear demand from petty lakhiraj holdings brought for the first time under assessment under section 70 of the Act. The same cause was at work during the year under review. The arrear collections in Burdwan showed some improvement, having risen from 33·3 to 43 per cent., but in Hooghly the percentage fell from 63·4 to 61·3. At the same time, however, there was an improvement in the current collections in both districts. The Lieutenant-Governor will await the explanation called for by the Board regarding certain orders said to have been passed by the Commissioner, the effect of which has been to stop the collection of Rs. 87,774 in Burdwan. The failure of the Burdwan Raj Estate, which is now under the Court of Wards, to pay in a large sum within the year, is mentioned as a further cause of the very unsatisfactory collections in that district. No explanation is given of this failure. In Nuddea and Pubna also the collections are said to have been affected by the inclusion of the three years' demand. In the former district the inundations, too, appear to have prejudiced the collections, and this cause also operated in Moorshedabad. In Maldah and Bankoora the arrears are explained to be due to the inclusion of demands for rent-free tenures; in the latter district the usual excuse of default on the part of the sirdar ghatwals is also alleged; in Shahabad, Durbhunga, and Backergunge arrears are attributed to indifferent harvests; in Balasore to confusion in the cess towji accounts, regarding which a special enquiry is being made; and in the remaining districts to delays which are inseparable from the procedure for the realisation of the cesses.

4. Turning to the second test, viz. comparison of current collections with net current demand, the Lieutenant-Governor observes that the results were unsatisfactory in the following 26 districts in which the collections fell short of 90 per cent. of the demand, viz.—Furreedpore (63·7), Pooree (68·), Midnapore (68·1), Hooghly (70·6), Backergunge (71·3), Dacca (72·1), Sarun (74·4), Mozufferpore (77·6), Shahabad (79·1), Patna (80·3), Chumparun (80·7), Burdwan (81·9), Jessore (82·6), Maldah (83·4), Tipperah (84·3), Rajshahye (84·4), Gya (84·6), Beerbhoom (85·1), Balasore (85·7), Chittagong

(36·8), Bankoora (86·9), Durbhunga (86·9), Nuddea (87·2), Monghyr (87·4), Moorshedabad (87·9), and Khoolna (88·4). No explanation has been given of the unfavourable results in these districts, except Midnapore, Burdwan, and Hooghly. In the Patna and Dacca Divisions (except Mymensingh), and in Pooree collections were exceptionally bad; and the Lieutenant-Governor also observes that in the majority of these districts but little had been done by the 31st December 1885 to clear off the outstandings. Sir Rivers Thompson thinks that this point should receive the further attention of the Board. There were 12 districts, against 11 in 1883-84, in which the percentage on both the current and arrear demand exceeded 90 per cent. Rajshahye and Pubna have fallen out of the list this year, while Dinagepore, 24-Pergunnahs, and Rungpore have been added to it. The 12 districts are Purneah, Darjeeling, Hazaribagh, Noakholly, Dinagepore, 24 Pergunnahs, Julpigoree, Bogra, Mymensingh, Manbhoom, Lohardugga, and Rungpore. In the remaining three districts—Pubna, Bhagulpore, and Cuttack—the percentage on the current demand rose slightly above 90 per cent., but the arrear collections fell below that standard.

5. The advance collections made during the year amounted to Rs. 1,40,565 against Rs. 1,33,128 in 1883-84. The districts in which these collections exceeded Rs. 5,000 are Hooghly (Rs. 5,372), Dacca (Rs. 6,095), Mymensingh (Rs. 6,346), Gya (Rs. 6,527), Cuttack (Rs. 6,691), Mozufferpore (Rs. 7,298), Patna (Rs. 7,928), Burdwan (Rs. 9,168), Bhagulpore (Rs. 16,239), and Durbhunga (Rs. 31,636). In future years this comparison need not be regarded as a test of success, though the statement may usefully be submitted.

6. There was a slight increase in the number of certificates filed during the year under the Public Demands Recovery Act. From 74,674 in the previous year the number rose to 77,631, which, with the 39,147 pending at the close of that year, gave a total of 116,778 for disposal against 112,533 in 1883-84. Of these 78,385 were disposed of during the year, leaving 38,393 pending at its close. Except in the districts of Hooghly, Shahabad, Durbhunga, and Pooree, the number of disposals kept pace fairly with the number of institutions. Out of the total number of 78,385 certificates disposed of during the year, payment was made in 31,844 cases on the mere issue of notice, in 3,577 cases on the attachment of moveable property, and in 26,900 cases on the attachment of immoveable property. Of the remainder, 2,806 were struck off and 672 cancelled on objection, leaving 7,586 cases which were discharged without resort to issue of notices or attachment of property. It is reported that the sale of moveable or immoveable property was resorted to only in 426 cases. The total number of objections filed against certificates was 4,171, of which 3,906 were disposed of. In 672 cases the certificates objected to were, as already stated, cancelled, and in 426 cases the amount certified was reduced. The smallest number of certificates was filed in the Chota Nagpore Division, viz. 559; Rajshahye came next and then the Presidency Division, 3,601 having been filed in the former and 4,489 in the latter. The three Divisions in which the largest numbers were filed were Patna (28,232), Burdwan (14,857), and Dacca (9,914).

7. Complete revaluations are in progress in the districts of Cuttack, Pooree, and Balasore; and sanction has been accorded to the commencement of complete revaluations in Gya and Chumparun. In Midnapore both valuation for the first time of certain estates and tenures, and revaluation of others, were made. The revaluations have resulted in a decrease of Rs. 14,023; while the valuations for the first time gave an increase of Rs. 11,233. The net decrease of Rs. 2,790 is attributed to the low price of paddy and to the exclusion of certain lakhiraj lands which were twice assessed at the first valuation. The result of partial revaluation in Pubna was an increase in valuation of Rs. 17,033, and of Rs. 803 in the cess demand. In Chittagong 630 taluks were assessed for the first time, and with other revaluations, yielded a net increase of Rs. 4,464 in the cess demand. The revision of the revaluations of the Manbhoom district has been completed. The total valuation of the district now stands at Rs. 13,60,921, against the original valuation of Rs. 9,97,170. The valuation of pergunnah Dhalbhoom, in the Singbhoom district, has been completed; but the completion report had not been received by the Board when their report was submitted. There were no summary valuations in Dacca and Mymensingh.

Midnapore summary valuation was resorted to only in the case of 24 petty estates; and in the Chittagong district, all the estates being of a petty character, 7,446 estates were summarily valued.

8. The provisions of chapter VI, Part II of the Cess Act, for the valuation of rent-free holdings, were on the recommendations of Commissioners extended during the year to all districts. The result generally may be said to have been unimportant.

9. During the year 5,704 separate accounts were opened, under section 44 of the Act, for Rs. 88,468 payable as cess. The division in which the largest number occurs is Dacca (1,972), while in the Chota Nagpur Division no accounts at all were opened. In the Dacca district alone 1,568 accounts were opened. At the close of the year the number of accounts remaining open was 25,837 for Rs. 12,27,651 of cess. Fifty-seven separate cess accounts were opened in revenue-free estates under section 46 of the Act—the largest number, 13, being in the Monghyr district.

10. The Board have submitted a statement showing that the number of estates assessed with cess was 272,943, held by 1,245,913 recorded shareholders, and that the number of tenures assessed was 1,170,814, and their recorded shareholders 2,181,229. The imperfection of these statistics was pointed out in the Resolution recorded last year; and although the Board believe that the present figures are on the whole more accurate than those furnished in previous years, they are still very deficient, in the opinion of the Board, for statistical purposes, as the figures only include estates and tenures assessed with cess, while estates within municipalities, and all very petty revenue-free properties and tenures are necessarily excluded. The suggestion of the Board that the submission of these figures should be discontinued will be considered in communication with the Revenue Department of Government.

The Lieutenant-Governor desires to express his acknowledgments to the Board for the efficient supervision exercised by them during the year over this branch of the administration. The names of the Deputy Collectors who are favourably mentioned in paragraph 19 of the Board's report will be communicated to the Appointment Department of Government.

ORDER.—Ordered that a copy of this Resolution, and of the Board's report, be submitted to the Government of India, Finance and Commerce Department, for information.

Ordered, further, that a copy of the Resolution be forwarded to the Board of Revenue, and copies of the Resolution and of the Board's report to the Appointment and Revenue Departments of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

R. H. WILSON,

Offg. Secy. to the Govt. of Bengal.

BENGAL.			
<i>Western Districts.</i>			
BURDWAN DIV.	1 Burdwan, May 1 '86	0.03	Weather—very hot. Rain much wanted for agricultural operations. Price of common rice 16 to 21 seers per rupee.
	2 Ranigunge	0.11	Weather—seasonable. Rain has done much good to standing crops, viz., cotton, <i>til</i> , <i>moong</i> , and mango. Fields being prepared for sowing of early rice, which has already commenced in certain quarters. Public health good.
	3 Bankoora, " 1 "	1.63	Weather—pleasant and fairly cool. High wind and heavy rain on 28th ultimo. Rain has facilitated ploughing. A few cases of cholera in Rampore Haut, otherwise public health good.
	4 Beerbhoom, " 1 "	1.07	Weather—rather cool for time of year. <i>Boro</i> harvest nearly completed. Rain much wanted for cultivation. Public health generally good.
	5 Rampur Haut	0.88	Weather—very hot. Rain badly wanted for ploughing for vegetable and for early rice and jute sowings. <i>Boro dhan</i> being harvested with good outturn in the flooded tracts, which will now pull through without further help. The cholera outbreak at Rishra has abated. General health good.
	6 Midnapore, " 1 "	Nil	Weather—dry and cloudless with high winds. <i>Boro dhan</i> being harvested; outturn satisfactory.
PRESIDENCY DIV.	7 Hooghly, " 1 "	Nil	Weather—very hot. No crops on the ground except sugarcane, which is doing well. Lands being ploughed for early crops. Public health good.
	8 Howrah, " 3 "	Nil	Weather—very hot and dry. Nights are cool. Cultivation and sowing have made much progress. Prevalence of cholera increasing.
	9 24-Pergha, April 4 '86	Nil	Weather—hot and dry. <i>Boro</i> rice harvest continues; outturn good. Rain now wanted for sowing of <i>aus</i> rice and for <i>til</i> crops. Public health fair.
	10 Nuddea, " 1 "	0.04	Weather—very hot. Rain badly wanted. Want of rain has almost stopped sowing of paddy crop. Cholera still raging in the district. Deaths from cholera reported from Magura sub-division.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.
The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 85, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground, Δ dew.

Calcutta, the 4th March 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 30TH OF APRIL 1886.

At the commencement of the week dry westerly winds were blowing at almost all the western stations and rather strong southerly and south-westerly winds at the southern and central stations, while in North Bengal and North Behar a few of the stations reported easterly and south-easterly winds. There was thus a small amount of interaction between those wind systems, which gave rise to a few light local storms. About the middle of the week the easterly winds began to increase in strength, and winds gradually became more easterly until Thursday the 29th, when the great majority of the wind directions over the province had a strongly pronounced easterly component in them. At the same time a feeble but distinct area of barometric depression formed in the Central Provinces, and there was a decided tendency to cyclonic circulation of winds round it at the stations nearest to it. With the advance of the easterly winds and with the formation of the area of low pressure in Central India and the western parts of Chutia Nagpur conditions became a little disturbed, a large amount of interference or interaction took place between the wind systems, and thus a considerable number of local storms, generally accompanied by rain, were reported at the close of the week. These storms have been most general in East and North and South-West Bengal, and in North Behar and Chutia Nagpore; comparatively few were reported from South Behar, and in Orissa they were practically absent.

The changes of pressure during the week have been considerable, and while for the first three days pressure fell steadily, on the Tuesday there was a considerable recovery, followed by a further fall on the next day, and during the last two days of the week the changes were small and variable. During May, however, there is generally a steady decrease of pressure, and the fall during the week has not been so rapid as usual. This is shown by the fact that while during the previous week there was over the province a mean excess pressure above the normal equal to 0.023", during the week under review the excess pressure has increased to 0.056."

Temperature—Was also during the previous week in excess of the normal by a general average of 1.5°. There has been during the present week a slight but decided increase of temperature, and the excess has increased to 1.8°. The variation of temperature in various parts of the province has however become considerable; and while Orissa shows a mean temperature 0.2° in defect of the normal, Chutia Nagpore on the other hand shows an excess of 4.1°. The temperature in East Bengal has been nearly normal, and over the remainder of the province there has been an excess of about 2°.

Rainfall—Has been entirely brought by local storms. North Bengal has received the largest amount of rainfall and averages 0.62 inch for the week against the normal average of 0.97 inch, or in other words the actual fall has been about two-thirds of the normal. The average rainfall reported in South-West Bengal has been 0.32 inch against the normal of 0.80 inch or decidedly less than half the normal fall. In North Behar the rainfall has averaged 0.25 inch against the normal 0.30 inch, in South Behar the actual fall has been 0.11 inch and the normal fall is 0.12 inch, and again Chutia Nagpur averages 0.12 of rain against the normal fall of 0.14 inch, and thus these three divisions have received almost a normal fall for the week. East Bengal has received an average amount of 0.17 inch, but the normal fall equals 1.43 inches, so that the actual fall has only been about one-eighth of the normal. The smallest amount of rainfall is reported from Orissa, where it averages only 0.04 inch, which is only one-ninth of the normal fall for the period.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 30th of April 1886:—

Calcutta, the 3rd May 1886.

A. PEDLER,
For Meteorological Reporter to the Govt. of India.

MEMORANDUM.

DURING the week ending 17th April 1886, the returns of the principal Municipalities in Bengal presented the following results :—

1. That the birth-rate in these Municipalities amounted to 18·8 per 1,000 of population against the same proportion in the preceding week ending 10th April, and the death-rate to 24·3 per 1,000 against very nearly the same ratio, *viz.*, 24·8 per 1,000.

2. That the Municipalities which returned the highest proportion of births and deaths were :—

Births.			Deaths.		
		Ratio per mille.			Ratio per mille.

Notes of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "1/2" the ratios under which have been omitted, inasmuch as years, above alluded to, cannot be employed as a basis of calculation owing to the small number of deaths recorded.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Darjeeling, the 6th May 1886.

RESOLUTION.

SECTION 82 of the Bengal Municipal Act III (B.C.) of 1884 empowers the Lieutenant-Governor to make rules for the purpose of regulating the system of keeping municipal accounts. In accordance with the provisions of this section, a set of rules and forms were prepared and forwarded to Commissioners of Divisions for opinion. These opinions were received and forwarded to the Accountant-General for any remarks he might have to offer. The Accountant-General has now submitted a revised set of rules and forms prepared, as far as possible, in accordance with the opinions of the local officers and Municipal Commissioners. The Lieutenant-Governor approves the revised rules and forms, and directs that they shall come into force in all municipalities from the 1st July next. If in the meantime the Commissioners of any Municipality wish to have any minor modifications made in these rules and forms to meet any special circumstances, they should represent the matter through the local officers for the orders of Government.

ORDER.—Ordered that the above Resolution, together with the rules and forms, be published in the *Calcutta Gazette* and circulated to Commissioners of Divisions for information and communication to District and Sub-Divisional Officers and Municipal Commissioners. A copy should also be sent to the Accountant-General for information and communication to the Examiner of Local Accounts.

By order of the Lieutenant-Governor of Bengal,

R. H. WILSON,

Offg. Secretary to the Government of Bengal.

Account Rules for Municipalities issued under Section 82 of Act III of 1884, the Bengal Municipal Act.

GENERAL.

THE following account rules are issued under section 82 of Act III of 1884, the Bengal Municipal Act.

2. The rules are divided into two parts. Part I contains the rules and forms to be observed and adopted in every Municipality, however small. Part II contains the rules and forms to be observed and adopted wherever the circumstances of a Municipality may render them necessary, and, in addition, certain other account rules and forms which it is desirable should be adopted in the larger Municipalities, but which it is not considered advisable to prescribe authoritatively.

3. It may be found hereafter that the account rules and forms herein prescribed do not conveniently meet the special requirements of a Municipality. In this case they may be modified with the consent of the Accountant-General, Bengal.

4. The cash and account branches of each Municipal Office shall be kept distinct from each other, and under distinct officers, who, for the purposes of these rules, will be termed, respectively, Tax Darogah or Cashier, and Accountant.

In many of the smaller Municipalities the Tax Darogah and Cashier will be one and the same man. Part I of these rules has been especially framed to meet this contingency. In no case, however, shall the same person compile the Municipal accounts and superintend the collection of the rates and other Municipal income.

5. All accounts and registers shall, as far as possible, be maintained in English. All books of account and registers shall be substantially bound and paged before being brought into use, and no accounts shall be prepared on loose sheets or in loosely bound volumes.

6. The set of registers and forms prescribed or suggested in these rules provides for all classes of transactions usually occurring in Municipalities of ordinary size. In some of the larger Municipalities additional books of account may probably be found necessary. In this case the Examiner of Local Accounts in Bengal will advise the Municipality concerned as to the most suitable forms to meet the special circumstances of the Municipality.

7. As, under these rules, the Magistrate or other officer in charge of a Government Treasury, and the Vice-Chairman of a Municipality occupy the respective positions of banker and constituent, it is of the greatest importance that no person connected with a Magistrate's or Sub-Divisional Officer's establishment shall assist in any way in collecting Municipal revenue or in posting the Municipal books.

SECURITY.

8. The Secretary, Accountant, Tax Darogah, Cashier, and tax collecting sircars in the employ of a Municipality shall furnish such security as the Commissioners may think proper.

Nothing in this rule, however, shall be understood to prohibit such security as the Commissioners may think advisable being taken from any other officer or servant in the employ of a Municipality.

CORRECTIONS IN ACCOUNTS.

9. All corrections and alterations in accounts shall be neatly made in red ink, and attested by the initials of the Chairman, Vice-Chairman, or Secretary. Similarly, all alterations and corrections in a voucher shall be attested by the payee. Erasures shall on no account be permitted in registers, statements, vouchers, or accounts of any description.

PART I.

BUDGET ESTIMATE.

10. The Regulations regarding the preparation and sanction of the Budget Estimate are contained in sections 72 to 76 of the Bengal Municipal Act. The Estimate shall be prepared in English in Form No. I by the accountant of the Municipality. The receipts shall be estimated in detail, but the totals only of the estimated expenditure shall be entered in the body of the Budget Estimate against the several headings. A schedule shall be attached to the Estimate in the form annexed, setting forth the full details of the estimated expenditure for the ensuing year.

11. No change shall be made in the major and minor account headings prescribed in Form No. I without proper authority, and the same account headings shall be used in all accounts and returns prepared or issued by a Municipality. In Form No. I the major account headings are shown in *italics* and the minor account headings have numbers allotted to them. The remaining heads of account given in the form are termed "Detailed heads" and are not *prescribed*, but are merely exemplar, and may be altered or added to as the Commissioners may think desirable.

RECEIPT OF MONEY BY CASHIER OR TAX DAROGAH.

12. The Cashier or Tax Darogah shall keep a cash book in Form No. II, in which he shall enter on the Receipt side all sums received by him on account of the Municipality.

The entries shall be in full detail of names and particulars, except in regard to collections made by the sircars (*see* paragraphs 20 and 23 of Appendix A), for which a single entry exhibiting the name of the sircar and the total amount received will be sufficient. The details of the sircar's daily collections will be given in the sircar's daily collection account Form No. XLVII)

13. The Vice-Chairman or Secretary shall, at such frequent intervals as may seem desirable, examine the Cashier's or Tax Darogah's cash book, so as to satisfy himself that all money received has really been remitted to the Treasury or Bank without delay, and that the Cashier or Tax Darogah does not retain in hand sums of money in excess of the security which he may have given.

TRANSACTIONS WITH BANK OR TREASURY.

14. Unless the Local Government shall otherwise direct, all sums received on account of the Municipal Fund shall be paid into a Government Treasury or into any Bank or Branch Bank used as a Government Treasury in or near to the Municipality.

Monies received by the Cashier or Tax Darogah on account of the Municipality shall be remitted to the of Bank or Treasury as often as can be conveniently managed.

15. Whenever a remittance to the Bank or Treasury is made, the Cashier or Tax Darogah shall enter the details of the remittance on the payment side of his Cash Book (Form No. II). In the column "Details of challan" he will enter the different heads of revenue (corresponding with the heads in the Cash Abstract Register of Receipts (Form No. VII), and in the column "Amount of each head" he will enter the amounts to be credited to each of those heads.

He will then fill in Form No. III, the challan to accompany the remittance. In the foil of the form will be entered merely the name of the Municipality on account of which the money is sent, and details of the notes and coin of which the remittance is composed. On the counterfoil will be shown the details of the remittance according to the heads of account to which the amounts are to be credited, *i.e.*, a copy of the entries on the payment side of the Cashier's or Tax Darogah's Cash-Book.

It is especially to be noticed that for statistical purposes the collections for the current year on account of the rate upon the annual value of holdings, or of the tax upon occupiers of holdings, and of the water, lighting, and latrine rates, are to be shown distinctly from the collections on account of the demand for previous years.

16. With the remittances shall be sent the pass book of the Municipality. Upon receipt of the money by the Treasury both sides of the pass book shall

be written up to date by the Treasury accountant, the entry for the remittance just made shall be initialled by the Treasury officer, and the book returned at once to the Municipal office.

The pass book will be supplied gratis by the Treasury. It is not a Municipal account book, but is simply a copy of the account kept in the Treasury of the money paid in and taken out by the Municipality, and must therefore always be written up only by the Government Treasury department, by whom the original account is kept.

No entries or marks may, under any circumstances, be made in the pass book by any one connected with or working in the Municipal office. At the close of each month the balance in the pass book shall be struck, the amount written in words, and signed by the Treasury officer.

PAYMENT OF CLAIMS.

17. Claims against a Municipality shall ordinarily be discharged by cheques drawn upon the Municipal banker, that is, in the majority of cases, on the Treasury.

18. The Commissioners, however, may, if they think it desirable, authorize the advance to the Vice-Chairman, accountant, or cashier of the Municipality of a sum of money as an imprest to meet petty expenditure.

The amount of the imprest shall be fixed by the Commissioners.

The rules relating to the recoupment of the imprest, the form in which the transactions are to be recorded, and the periodical exhibition of the charges in the Cash Book of the Municipality will be found in Part II of these rules.

19. No claims shall, under any circumstances, be liquidated out of the cash realizations of the Municipality. All moneys received shall be forwarded intact to the Municipal banker, in the manner prescribed in section 15 of these rules.

VOUCHERS FOR PAYMENTS.

20. Every bill or other claim for payment shall be presented in the first instance to the accountant, who will check and examine the figures, and if they be found correct and in order, will submit the bill for orders to the Chairman or Vice-Chairman. If payment of the bill so presented is to be made, an order for payment shall be endorsed on the document, that is to say, on the bill presented by the person who prefers the claim. The order for payment shall run as follows:—"Pay (Rs.) Rs. only," the amount being written in words as well as in figures, and the order shall be signed by the Vice-Chairman or Chairman, if the amount to be paid do not exceed Rs. 500. An order for the payment of a sum of money in excess of Rs. 500 shall be signed both by the Chairman and Vice-Chairman, or by the Chairman and another Commissioner. No officer of Government or Municipal Commissioner shall sign a payment order for and on behalf of the Chairman or Vice-Chairman. If the Chairman be absent, or from any cause be unable to sign, the Vice-Chairman shall sign; and if the Vice-Chairman be absent, or be unable to sign, the Chairman shall sign. If both Chairman and Vice-Chairman be absent, or be unable to sign, no order for payment shall be made on the bill.

21. If the bill is to be liquidated out of the imprest, the Vice-Chairman shall, before signing the payment order, see the bill stamped with the orders "Paid in cash" in conspicuous type, and shall then make it over to the accountant or cashier for payment. If the bill is to be liquidated by issue of a cheque, it shall be made over to the accountant or cashier and shall be stamped "Paid by cheque No. " in conspicuous type. In the latter case the amount shall be entered, as soon as the cheque is signed, in the appropriate column of the cash book of the municipality (Form No. VI).

22. Every payment made, either in cash or by cheque, shall be covered by a receipt, stamped if necessary, signed by the person to whom the money is due, and to whom it has actually been paid. A receipt signed by another person or by a Municipal employé is invalid.

23. The pay of the Municipal establishment shall be drawn in Bill Form No. IV, and every Municipal employé shall give a receipt in the appropriate column of the form for the sum paid to him. Each Municipal employé who receives a sum exceeding Rs. 20 shall affix a receipt stamp before signing. The cost of such receipt stamp must, of course, be borne by the person who receives the money, and not by the Municipality.

24. One bill, whether for establishment or other charges, shall ordinarily only contain details of charges to be taken against one of the budget heads in the Cash Abstract Register of Expenditure (Form No. VIII). If, however, it be convenient that a bill be presented which contains charges against more than one such head, the accountant shall enface in red ink on the bill itself, above the payment order, the details of the apportionment of the charges. These details shall be also shown in the "Head in cash abstract" column of the Cash Book (Form No. VI).

25. All bills and vouchers that have been paid shall be numbered consecutively for the year in order of payment, and shall be pasted in a guard book.

Sub-vouchers for payments made out of the imprest, however, shall be filed separately, and shall be attached to the periodical account submitted when the imprest is recouped (*see* rule 71).

CHEQUES.

26. Cheques drawn on a Government Treasury or Sub-treasury shall be in Form No. V. Cheque books will be supplied to the Chairmen of Municipalities by the officers in charge of Government Treasuries and Sub-treasuries.

27. On receipt of a cheque book from the Treasury or Bank, the officer whose duty it is to sign cheques shall count the cheques, and the cheque books shall remain in his custody.

28. The cheque book in use may be made over to the accountant or cashier whenever required to fill in the amounts passed and shall be returned for signature along with the orders themselves to the officer whose duty it is to sign the cheques. The latter should then satisfy himself that all unused cheques are in the book, and that none have been surreptitiously extracted.

29. No cheque shall ordinarily be signed unless required for immediate delivery to the person to whom the money is to be paid. The practice of retaining signed cheques in the office should not be permitted, except under very exceptional circumstances.

30. Every cheque shall be drawn in English in favour of the person to whom the money is actually due. Payment shall not be made to any other person except on production of a written authority from the creditor to receive it on his behalf. This rule does not apply in the case of a cheque issued for a sum of money distributable as pay or wages among a number of municipal employés, or in recoupment of the imprest.

31. The amount of every cheque drawn shall be written in words as well as in figures, both on the cheque itself and on the counterfoil, and the counterfoil shall be initialled by the person who signs the cheque.

32. Every cheque drawn for a sum in excess of Rs. 20 shall bear a receipt stamp of the value of one anna, and this receipt stamp shall be affixed before the cheque is signed. The cost of the stamp is payable by the Municipality which issues the cheque, and not by the person in whose favour the cheque is drawn.

CANCELLATION OF CHEQUES.

33. When a signed cheque is cancelled it shall be stamped "Cancelled" and initialled by the Chairman, Vice-Chairman, or Secretary. The cancelled cheque shall be destroyed by the Government auditor as soon as the accounts for the month in which the cheque was drawn have been audited. The amount of the cancelled cheque shall be entered as a receipt on the debtor.

side of the Cash Book (Form No. VI) and shall be treated as a refund (see rule 46).

CASH BOOK.

34. The Cash Book of the Municipality shall be kept in English in Form No. VI by the Municipal accountant. It shall be a substantially bound volume containing a sufficient number of pages to contain at least one year's transactions. It shall be carefully paged before being brought into use.

35. The receipt or debtor side of the Cash Book shall be posted from the counterfoil of the challan (Form No. III) of moneys paid into the Treasury or Bank by the cashier or tax darogah.

36. It may sometimes happen that a sum of money will be found credited in the Municipal pass book which has not been paid in through the cashier or tax darogah of the Municipality. In this case the Vice-Chairman or Secretary shall ascertain the details of the credit, and the same shall be posted into the Cash Book of the Municipality.

In some cases also moneys may be paid direct into the Treasury, for credit to the Municipality, by Court Sub-inspectors or other officers on account of Municipal fines and Pound revenue. In these cases the Cash Book shall be posted from the copy of the challan with which the money has been remitted to the Treasury or Bank. This copy will be furnished to the Municipality by the officer by whom the money was paid in.

37. The payment side of the Cash Book shall be posted from the details of the vouchers and of the cheques drawn. The amount of each cheque shall be entered as soon as the cheque is signed (see rules 29 and 33).

38. The Cash Book shall be balanced at the close of every month, and signed by the Chairman, Vice-Chairman, or Secretary in token of the correctness of every entry made therein. The balance brought out shall be agreed with the balance shown in the pass book of the Municipality, thus :—

					Rs.	A.	P.
Balance as per Cash Book	...	...					
Add cheques drawn, but not yet cashed—							
					Rs.	A.	P.
No.	...						
No.	...						
Total as per pass book	...	...					

CASH ABSTRACT REGISTERS OF RECEIPTS AND EXPENDITURE.

39. All the entries on the receipt side of the Cash Book (Form No. VI) shall be posted by the accountant, one by one, direct from the Cash Book into the Cash Abstract Register of Receipts (Form No. VII), and all the entries on the payment side of the Cash Book shall be posted, one by one, into the Cash Abstract Register of Expenditure (Form No. VIII).

The Cash Abstract Registers shall be kept in English, and shall be posted as often as may be convenient, but in no case later than ten days after the close of the month to which the account relates.

40. Each item of receipt or payment appearing in the Cash Book shall be posted separately into the Cash Abstract Registers. Thus if there be two or three payments in one day on account of the same head of expenditure, there will similarly be two or three entries under the same head in the Cash Abstract Register, i.e., the separate items appearing in the Cash Book (Form No. VI) and

not *the totals* of the daily receipts or expenditure for each head, shall be posted into the Cash Abstract Registers.

41. The columns of the Cash Abstract Registers shall be totalled every month, and the totals of the different heads of receipts and expenditure must necessarily be equal to, and shall be compared by the Vice-Chairman or Secretary with, the totals of receipts and payments in the Cash Book (Form No. VI).

42. The numerous detailed heads given in the Cash Abstract Registers (Forms Nos. VII and VIII) are not *prescribed* heads, but may be abridged or added to as the Commissioners may think desirable. The detailed heads must of course always correspond with the detailed heads shown in the Budget Estimate (Form No. I) (*see rule 11*).

ADJUSTMENTS.

43. At the foot of each month's account in the Cash Abstract Registers of Receipts and Expenditure (Forms Nos. VII and VIII) two lines are left blank for the purpose of entering therein and bringing upon the books of the Municipality the adjustments made during the month.

44. Adjustments are transactions which have to be recorded in the Monthly and Annual accounts of the Municipality, but which are not actual cash transactions, and which therefore do not in all cases appear in the Municipal Cash Book.

45. Adjustments are of four kinds :—

- (1)—The transfer from one head to another of items of receipt or expenditure wrongly classified in the first instance in the Cash Abstract Registers.
- (2)—The transfer of a sum of money from the head "Advances" to a head of expenditure for work done by a contractor or other person, the said contractor having originally been granted an advance to enable him to carry out the work.
- (3)—Refunds of revenue received or of expenditure incurred during the current year of account.
- (4)—The debit to a head of expenditure by credit to "Deposits received" of a sum of money due on a contractor's bill, but not paid, being retained as a security deposit for the due execution of future works.

46. In case (1) the adjustment shall be made by entering the amount in the line for "Adjustments by addition" in the column for the head to which the amount is to be added, and again in red ink in the line for "Adjustments by deduction" in the column for the head from which the amount is to be deducted. Both entries will be made on the Cash Abstract Register of Receipts if the amount is to be transferred from one head of revenue to another, and both will be made in the Cash Abstract Register of Expenditure if the amount is to be transferred from one head of expenditure to another.

In case (2) the adjustment shall be made by entering the amount in the line for "Adjustments by addition" in the column of the Cash Abstract Register of Expenditure for the head to which charges on account of the particular work executed are to be taken, and in the Cash Abstract Register of Receipts in the line for "Adjustments by addition" under the head "Advances recovered." A corresponding entry must of course be made on the receipt or credit side of the Advance Ledger (Form No. XVII—*see rule 63*) of the person by whom the work was executed and to whom the amount adjusted was originally advanced.

In case (3) the adjustment shall be made by entering the amount in the line "Adjustments by deduction" in the column of the Cash Abstract Register of Receipts or Expenditure for the head to which the amount refunded was originally credited or debited and in the Cash Abstract Register of Expenditure or Receipts in the line for "Adjustments by deduction" in the column for Refunds."

This procedure, however, shall not be followed when the refund made during the month is on account of revenue received during a previous year of account. In this case the amount refunded will remain at the debit of the head "Refunds," and no adjustment shall be made.

In case (4) the adjustment shall be made by entering the amount in the Cash Abstract Register of Expenditure in the line for "Adjustments by addition" in the column for the head to which the balance of the charges of the bill from which the deduction has been made has been taken, and in the Cash Abstract Register of Receipts in the line for "Adjustments by addition" under "Deposits received."

In every case of refund of revenue a note of the refund shall be made against the original entry of receipt in the Cash Book or other register, so as to guard against a second refund of the same amount being accidentally made.

47. Adjustments made by deduction in the Cash Abstract Registers shall always be exhibited in red ink.

QUARTERLY AND ANNUAL ACCOUNT.

48. At the close of every month the grand totals under the various heads of account recorded in the Cash Abstract Registers (Forms Nos. VII and VIII) shall be entered in English by the accountant in the separate registers (Forms Nos. IX and X) against the corresponding heads under the appropriate month.

49. These two registers form the Quarterly Statement required under section 71 of the Act to be prepared immediately after the close of each quarter. Columns are provided to show the progressive totals for the half-year, the three quarters, and for the whole year, and, in addition, the figures of the sanctioned budget estimate under each head.

50. As soon as possible after the close of the year, and not later than the 15th April following, the totals of the receipts and expenditure of the year as worked out in the last columns of the registers (Forms Nos. IX and X) shall be posted in English by the accountant into the Annual Account (Form No. XI). The details of the expenditure shall be given in a separate schedule, similar in form to that attached to the Budget Estimate (Form No. I), exhibiting the actual and estimated figures in parallel columns. This statement (Form No. XI) will form the Annual Account required to be prepared by the last paragraph of section 71 of Act III (B.C.) of 1884, and by the Government of India in Financial Resolution No. 283, dated 31st August 1883. A copy of this Account shall be sent not later than the 30th April following to the Magistrate of the District in which the Municipality is situated.

51. To enable the Magistrate and the Commissioner of the Division to make the prescribed comparison between the estimates and the actual receipts and expenditure of the Municipality, the amounts by which the actual figures fall short of or exceed the estimated figures shall be shown in two separate columns provided for the purpose within the body of Form No. XI, and also in the schedule of expenditure to be annexed to the statement.

TAX UPON OCCUPIERS OF HOLDINGS OR RATE UPON THE ANNUAL VALUE OF HOLDINGS, LATRINES RATE, LIGHTING RATE, AND WATER RATE.

52. It is not desirable to prescribe hard-and-fast rules as to the procedure to be adopted in the levy of the above rates, as the circumstances of the Municipalities to which these rules will apply vary so greatly. At the same time, it is necessary to record a general system which shall be more or less applicable to all Municipalities. Appendix A of these rules contains the details of two systems of procedure, both of which are already being successfully worked in Bengal. One or other of these systems should be adopted in every Municipality, with such modifications as may be found locally necessary.

53. The forms attached to the Appendix are *prescribed* forms, i.e., they may not be modified, except with the approval previously obtained of the Accountant-General, Bengal. All the forms, however, need not be adopted. It is expressly stated in Appendix A which of the forms shall be adopted in every Municipality and which are optional.

TAX ON CARRIAGES, HORSES AND OTHER ANIMALS.

54. The register prescribed in section 139 of the Act for the exhibition of the amount of taxes realized on account of carriages, horses, and other animals shall be maintained in Form No. XII.

55. *As soon as a license fee or tax has been paid, and not before,* the license shall be prepared in Form No. XIII and when the necessary particulars have been posted in the register (Form No. XII), both register and license shall be placed before the duly authorised Licensing Officer. The Licensing Officer shall sign the license and initial the register in the proper column.

LICENSES.

56. License forms shall be bound in counterfoil books. No new book shall be brought into use until *all* the license forms and counterfoils have been consecutively numbered. The numbers shall, if possible, be printed.

57. Only one book shall be given out at a time, and until the book thus issued has been used up no new book shall be given out.

On no account shall loose unnumbered licenses be kept in the office.

FEES ON THE REGISTRATION OF CARTS.

58. In lieu of licenses, tin tickets may be issued to owners of carts which have been registered. These tin tickets may be of a different colour for each period of issue. They shall be of a size sufficiently large to be easily distinguishable, and they shall bear consecutive numbers.

59. As soon as the registration fee has been paid by the owner of the cart, the necessary particulars shall be entered in a register in Form No. XIV.

60. A stock book of the tin tickets received from the makers shall be kept in Form No. XV. The Vice-Chairman or Secretary shall, at such intervals as shall seem advisable, compare the balance of the tin tickets as brought out in the stock book with the unissued tickets actually in stock.

MISCELLANEOUS RECEIPTS.

61. For money received by a Municipality on account of the tax upon Occupiers of Holdings, or Rate upon the Annual value of Holdings, Latrines Rate, Lighting Rate, and Water Rate a form of receipt has been prescribed in Appendix A (Form No. XLV). For money received on account of tax on carriages, horses, and other animals, the license issued will be a sufficient receipt.

For all other money received by the municipality under the rules in this part, a receipt shall be granted in Form No. XVI. The total amount received shall be written in words, both on the receipt itself and on the counterfoil: the latter need only be initialled by the officer who signs the receipt.

The forms shall be bound in books, and they shall be numbered before the book is brought into use.

62. For money received on account of fees for the Registration of Carts, a separate receipt book in the same form shall be used, and so also separate books shall be used for any other head of revenue, the receipts on account of which are numerous.

ADVANCES.

63. All moneys advanced to contractors or to the Chairman, Vice-Chairman, Municipal Commissioners, or other individuals under whose personal superintendence a work is being executed, all sums paid without proper vouchers, the amount of the imprest, and any other advance that may be made shall, in the first instance, be charged to the head "Advances" and entered in the Advance Ledger (Form No. XVII). A separate account shall be

64. In the case of advances made to contractors or others for the execution of works, the account shall be credited with the actual value of the work done upon receipt of audited detailed bills and proper vouchers for the expenditure incurred out of the advance. These adjustments shall be carried through the Cash Abstract Registers (*see* rule 45). Before the order for adjustment is made, the bills and vouchers put forward in support of the expenditure shall be passed in the same manner as other bills are passed. The passing order shall run thus:—“Passed for rupees _____; Adjust by credit to Advance account of _____ and debit to _____.”

DEPOSITS.

In such cases the bills shall be passed for the full amount due on the bill, but only the net amount paid shall be entered in the Cash Book (Form No. VI). The amount deducted as security shall be brought upon the Municipal accounts and into the Ledger of Deposits (Form No. XVIII) through the medium of the Cash Abstract Register in the manner described in rule 46. The payment order shall run thus:—

EMBEZZLEMENTS.

PART II.

GENERAL.

69. The rules and forms in this part are of two classes, *viz.* those that are *prescribed* and those that are merely *suggested*. The former shall be adopted wherever the circumstances of a Municipality render them necessary, *e.g.*, the form for the exhibition of the fees for Hackney Carriage Licenses shall be adopted wherever the provisions of Act V of 1866 (Hackney Carriage Act) are in force, and the form of Imprest Account shall be adopted wherever the Vice-Chairman or other Municipal officer has been granted an *imprest* for the liquidation of petty expenses.

The *suggested* forms are those which it is recommended shall be adopted wherever the circumstances of a Municipality permit. Many of the forms are already in use in various Municipalities in Bengal, and have been found to work well.

70. The following is a list of the forms prescribed and suggested under these rules.

IMPREST ACCOUNT—(Prescribed).

71. Whenever the Municipal Commissioners shall decide that an imprest is to be granted to the Vice-Chairman, Secretary, or other officer for the payment of petty charges, the account of the expenditure incurred out of the imprest shall be kept in Form No. XIX. Whenever it becomes necessary to recoup the imprest, the accountant shall copy out the detail of the charges on the counterfoil of the form, make an abstract in red ink of the different heads of account to which the charges are to be taken, and submit the account itself, supported by the sub-vouchers, for the signature of the Vice-Chairman or Secretary.

The sub-vouchers shall in all cases be passed by the Vice-Chairman, previous to payment, in the same manner as are other vouchers (*see* rule 20).

72. The cheque in recoupment of the imprest shall be drawn in favour of the Vice-Chairman or Secretary, and the abstract of the charges alluded to above shall be copied into the "Head in cash abstract" column of the cash book (Form No. VI).

HACKNEY CARRIAGE LICENSE REGISTER—(Prescribed).

HACKNEY CARRIAGE DRIVERS' REGISTER—(Ditto).

PALANQUIN LICENSE REGISTER—(Ditto).

PALANQUIN BEARERS' LICENSE REGISTER—(Ditto).

73. Fees on account of the above shall be recorded in Registers Nos. XX, XXI, XXII and XXIII respectively. The rules regarding the custody, issue, and record of cart registration tickets shall apply *mutatis mutandis* to the plates issued under the Acts to owners of hackney carriages, to drivers, and to palanquin bearers.

74. The licenses granted to owners of hackney carriages, to hackney carriage drivers, to owners of palanquins, and to palanquin bearers shall be in Forms Nos. XXIV, XXV, XXVI, and XXVII respectively.

GOVERNMENT SECURITY REGISTER—(Prescribed).

75. All Government securities which shall become by purchase or otherwise, the sole property of a Municipality shall be accounted for in Form No. XXVIII. They shall not be written off this form unless disposed of absolutely by sale or otherwise, *e.g.*, Government Securities merely made over to the Accountant-General for safe custody under the rules contained in Chapter II of the Civil Account Code shall not be written off this account.

LOAN REGISTER—(Prescribed).

76. The transactions in regard to any Loan contracted by a Municipality shall be recorded in Form No. XXIX.

DISPENSARY SUBSCRIPTION REGISTER—(Prescribed).

77. The register for the record of donations and subscriptions for a Charitable Dispensary shall be kept in Form No. XXX. The column "Date of remittance to Municipal office" shall be filled in by the officer who makes the remittance.

MISCELLANEOUS SUBSCRIPTION REGISTER—(Prescribed).

78. It sometimes happens that a Municipality undertakes the collection of voluntary subscriptions to be devoted to a specific purpose, such as the erection of a Town Hall or Market. Subscriptions are frequently promised but are not paid up at once, and unless a systematic plan exists for the record and collection of promised subscriptions the Municipality is likely to incur serious loss.

The following system is therefore prescribed. The Subscription Book or books to be sent round with the appeal for subscriptions shall be in Form No. XXXI. If receipts are given to subscribers for their contributions, the Form No. XVI prescribed in these rules for the grant of miscellaneous receipts shall be brought into use. The contributions shall be credited to a distinct head in the Cash Abstract Register of Receipts.

At the end of each month or quarter the amounts (whether paid up or not) shown in the Subscription Books (Form No. XXXI) shall be totalled, and the total posted into an abstract in Form No. XXXII. The abstract shall be checked and signed by the Vice-Chairman or Secretary. The officer who signs the abstract shall at the same time satisfy himself that steps are being taken to realize the promised subscriptions. •

RECEIPTS ON ACCOUNT OF MUNICIPAL POUNDS.

RENT OF MUNICIPAL BUILDINGS, LANDS, &c.

Separate registers shall be opened to show the details of each source from which periodical Municipal revenue is derived, for which there is a fixed monthly, quarterly, half-yearly, or annual demand.

The registers shall have columns to show—(1) serial number; (2) name or number of pound, building, plot of land, &c.; (3) term of lease; (4) name of lessee; (5) amount of monthly, quarterly, half-yearly, or annual rent; (6) number of bill; (7) initials of Vice-Chairman; (8) date of payment; (9) remarks, together with columns for any other particulars, which the special circumstances of the case may render necessary.

80. Whenever the number of buildings, land, &c., is large, it will be necessary to prepare a periodical abstract similar in form to Form No. XLIX (Progress Statement of Demands, Collection, &c., on account of the Tax upon the Occupiers of Holdings), so that the Vice-Chairman or Secretary may be enabled to exercise an efficient check over the outstanding dues.

REGISTER OF SECURITY DEPOSITS OTHER THAN CASH.—(*Prescribed*).

81. Security deposited in *cash* shall be credited at once in the Cash Book of the Municipality to the head "Deposits received," and paid into the Bank or Treasury like revenue. All other forms of security, such as Government paper, Savings Bank balances deposited under the rules in paragraph 17 of Chapter 19 of the Civil Account Code, bonds for landed property, and the like, shall be recorded in a Register in Form No. XXXIII. When the security is surrendered the depositor shall give a receipt in the column provided for the purpose.

BILL FORM—(*Suggested*).

82. It is suggested that miscellaneous bills for work done for, and for supplies made to, Municipalities should, as far as possible, be of a uniform pattern. Form No. XXXIV is suggested for this purpose. The bill may, of course, be prepared either in English or in the vernacular, and creditors of a Municipality might be invited to make out their bills in these forms, which would of course be supplied by the Municipality free of charge.

SANCTION REGISTER—(*Suggested*).

83. Under section 78 of Act III of 1884, the Municipal Act, the Commissioners are required to sanction at a meeting, by a general or special resolution, the expenditure of any or every sum provided in the Estimate for the year.

84. In most Municipalities it is the practice to sanction in one resolution the expenditure of the whole of the sum provided in the Estimate. In this case no separate Sanction Register will be necessary, but in Municipalities where portions of the expenditure provided in the Estimate are sanctioned from time to time it will be advisable to open a register to record these sanctions. Form No. XXXVI is recommended as suitable for the purpose.

ADJUSTMENT REGISTERS—(*Suggested*).

85. When the adjustments of Advances by bills for work executed (*see* rule 64) and the credit to Deposits by deduction from the total amounts of bills presented by contractors (*see* rule 67) are numerous, it will be advisable to open two Adjustment Registers for the daily record of these transactions as they occur, so that none may be omitted when the Cash Abstract Registers are posted at the end of the month.

86. It is suggested that the register to show adjustments of advances by bills for work done should be in Form No. XXXVI, and that the register to show the credits to deposits by debit to the different heads of expenditure should be in Form No. XXXVII.

Both registers should of course be totalled monthly.

NOTICE TO OWNERS OF CARRIAGES, HORSES, AND OTHER ANIMALS.—(*Suggested*).

87. Under section 133 of Act III of 1884, the Bengal Municipal Act, owners of carriages, horses, and other animals liable to the tax are required to forward to the Commissioners statements in writing containing descriptions of the carriages, horses, and other animals for which they are bound to take out licenses. To facilitate this procedure it is recommended that a supply of printed statements in Form No. XXXVIII should be obtained and distributed to the owners of vehicles which are taxable. These forms might with advantage be circulated by post to the owners of the different carriages, horses, &c., for which taxes were paid during the preceding half-year.

MISCELLANEOUS BILL REGISTER—(*Suggested*).

88. When the number of Miscellaneous Bills, for the record of which forms have not been prescribed or suggested in these rules, is large, it is recommended that Form No. XXXIX should be utilized. The Vice-Chairman or Secretary should initial the Register when he signs the bills, previous to their being issued, and again when the amounts are realized.

SERVICE BOOKS—(*Suggested*).

89. As, under section 47 of Act III of 1884, the Bengal Municipal Act, it is within the competence of the Commissioners, subject to the approval of Government, to make rules regulating the grant of pensions and gratuities out of the Municipal Fund, it is advisable, whenever such rules shall have been made and approved, that Municipal employés be required to keep up Service Books.

90. The opening page of the Service Book should be divided for entries in the following form:—

- (1) Name.
- (2) Race.
- (3) Residence.
- (4) Father's name and residence.
- (5) Date of birth by Christian era, as nearly as can be ascertained.
- (6) Exact height by measurement.
- (7) Personal marks of identification.
- (8) Signature of officer.
- (9) Signature of Vice-Chairman.

The entries in this page should be renewed or re-attested at least every five years.

The remaining pages should be divided for entries in the following form:—

- (1) Name of appointment.
- (2) Whether substantive or acting.
- (3) If acting, state the substantive appointment.
- (4) Pay.
- (5) Acting allowance.
- (6) Date of appointment.
- (7) Signature of officer.
- (8) Reference to any recorded punishment or censure or reward or praise of the officer.

- (9) Signature of Vice-Chairman.
- (10) Date of termination of appointment.
- (11) Reason of termination (such as promotion, dismissal, &c.)
- (12) Signature of Vice-Chairman.

All the headings in the Service Book should be printed both in English and in the vernacular.

91. Service books should be maintained by every Municipal officer or servant in permanent employ. Every appointment, leave of every description (except casual), every period of suspension from employment, and every other breach of service should be noted in them, the date of the beginning and end of every employment or absence being certified at the time by the signature of the Vice-Chairman or Secretary. The Service Book should be a contemporary record in minute detail of a person's official career.

The Service Books should be kept in the custody of the Vice-Chairman or Secretary.

APPENDIX A.

Procedure to be adopted by Municipalities in Bengal for the collection of taxes upon occupiers of holdings, rates upon the annual value of holdings, latrine-rates, lighting-rates, and water-rates.

GENERAL.

1. The object of the rules detailed in this Appendix is to ensure the punctual and systematic delivery and service of all bills *once* in the course of the first month of the quarter for which the bills are due, and the collection and adjustment of the whole demand within the quarter for which the bills are issued.

2. Laxity in the supervision of the collections of the above rates, and the consequent accumulation of a heavy sum total of arrears, are the causes of nine-tenths of the embezzlements of Municipal funds, which are brought to light. If the collection of the rates is once allowed to fall into arrears, it becomes almost impossible even for the official auditors appointed by Government to detect misappropriations by the tax-collecting staff.

It is imperatively necessary, therefore, that Municipal Commissioners should enquire promptly into applications for revision or exemption from assessment under section 113, into the lists of irrecoverable taxes prepared from time to time by the tax darogah under section 130, and further that they should avail themselves, to the fullest extent, of the machinery provided in sections 120 to 129 of the Act for the realization of taxes from defaulters.

3. Taxes must either be collected or remitted, and if the Commissioners decide that a tax due by a defaulting owner or occupier of a holding is not to be remitted, they must take prompt steps for its immediate realization.

4. It is to be observed that applications for review of, or exemption from, assessment under section 113 can only be received, either before the expiration of one month from the date of publication of the notice required by section 112, relating to the list containing the assessment valuation or rating in respect of which the application is made, or after the expiration of fifteen days from the date of service of the first notice of demand for payment, at the rate in respect of which the application is made, whichever period shall last expire.

It follows, therefore, that the only time at which applications for revision of, or exemption from, assessment are likely to be numerous is within a month or six weeks of the publication of the list containing the assessments.

It is, therefore, recommended that, whenever a new assessment is made in a Municipality, a Commission, of not less than three Commissioners, be appointed under section 114 to enquire promptly into and decide applications.

DIVISION OF MUNICIPAL AREA INTO CIRCLES.

5. Each Municipality shall be divided into collecting circles by a calculation based on the area of ground to be traversed and the number of hills to be delivered, and to each circle shall be appointed a sircar. Endeavours should be made to render the collecting circles as compact as possible, and, as a rule, no collecting circle shall contain more houses than can be visited by one sircar during the working days of a month.

6. Under the general control of the tax daregah, each sircar shall have entire charge of, and be responsible for, the collection and disposal of the amounts of bills connected with the particular collecting circle assigned to him.

ASSESSMENT.

7. Assessments of the rate upon the annual value of holdings, or of the tax upon occupiers of holdings, are customarily framed for a period of three years, and, as it is unnecessary labour to copy year after year so bulky a volume, it will be more convenient if a permanent Assessment Register of the tax upon occupiers, or a permanent Valuation Register of the rate upon the value of holdings, be prepared for the period for which the assessment has to run.

8. Forms for these registers are prescribed (Form Nos. XL and XLI) and are attached to these rules. One or other of these registers shall be maintained in every Municipality. The registers are self-explanatory, and provide for the various stages of the procedure laid down in the Act for the preparation of the assessment. The registers shall be kept in detail of collecting circles—one volume for each collecting circle—sub-divided into roads, villages, or streets as may be found most convenient. The amount assessed for each road, village, or street shall be separately totalled, and an abstract prepared at the commencement of the volume, bringing together these separate totals into one view. As the tax upon the annual value of holdings is leviable from the owners of holdings, while the water-rates, latrine-rates and lighting-rates are leviable from the occupiers of holdings, a separate set of all the registers and forms prescribed or suggested in this appendix must be used for the record of the collection on account of the latter descriptions of tax, i.e., one for owners and one for occupiers.

9. The Assessment Register shall be carefully compared by the Vice-Chairman, Secretary, or a Commissioner appointed for the purpose, with the assessment list or the valuation and rating list published under the Act, and each register shall be signed by the person by whom the comparison has been made. The original assessment list or valuation and rating list will have included the names of all occupiers of holdings or details of every holding in the Municipality, whether the occupiers or owners are required to pay the tax or not. The Assessment Registers, however, will only contain the names of those occupiers or owners of holdings who it has been decided by the Commissioners shall pay the tax.

10. The Assessment Registers are the original records of the demand of the most important of the Municipal taxes, and it is essential, therefore, that they be neatly kept, that erasures in them be absolutely prohibited, that all alterations be initialled by the Vice-Chairman or Secretary, and that the officer who signs the bills for the quarterly demand shall compare the amount of the bills with the corresponding figures in the Assessment Registers.

11. Petitions against the assessment should, if possible, be presented in forms of a uniform pattern. The use of Form No. XLIII is suggested for this purpose.

12. All new assessments made after the publication of the list under section 112, and all increases to the original assessments, shall be posted in a prescribed register in Form No. XLIII under the initial of the Vice-Chairman or Secretary. The two money columns headed "Amount of former quarterly instalment" and "Amount of future quarterly instalment" in this register shall be totalled at the end of every quarter, and the details of the new and increased assessments posted into the assessment or valuation registers in the section or sections devoted to the road, street, or village where the new or improved holdings are situated.

13. It must be remembered that the new and enhanced assessments can, under section 93 of the Act, only take effect from the beginning of the quarter next following that in which such new assessments or enhancements are made.

REMISSIONS.

14. Decreases in the assessment take the form (1) either of reduction of assessment caused by the holding becoming uninhabitable; or (2) of a permanent remission in consequence of the extreme poverty of the occupier; or (3) of a temporary remission in consequence of the holding being vacant or unoccupied. In cases (1) and (2) the details of the remission granted must be posted from the Remission Register, Form No. XLIV (see next paragraph), into the Assessment or Valuation Register. In case (3) the details of the remission granted need not be posted into the Assessment or Valuation Register, the entry in the Bill Register, Form No. XLVI, being sufficient.

15. In all three cases full particulars of the remissions granted shall be entered in a register in *prescribed* Form No. XLVI, the Register of Remissions, under the initial of the Vice-Chairman or Secretary. The columns headed "Amount of original quarterly tax," "Amount remitted" and "Amount of future quarterly tax" shall be totalled at the end of every quarter, and as often as it may be found desirable to prepare the *prescribed* statement of demands, collections, remissions and outstanding balance (see Rule 23). The amount remitted for *each quarter* for each holding shall be shown in the column provided for the purpose in the Remission Register, but of course only one entry as to the amount of the future quarterly tax need be entered for each holding.

16. The only really effectual way of supervising the collection of the tax on holdings or on persons, and the latrines, lighting, and water-rates is to compare the balance of the rates shown to be outstanding according to the Municipal books with the actual aggregate of the counterfoil red receipts in the hands of the collecting agency. It is imperatively necessary, therefore, *first*, that the counterfoil bill forms (see Rule 18) be kept in a place of safety until required for use, so that none may be surreptitiously abstracted and filled in, and, *secondly*, that whenever a remission is granted, the counterfoil bill receipt upon which the remission has been made be put up with the list of remissions and stamped "*Cancelled*" in large type. It will then be impossible for the collecting agency either to prepare fraudulent receipts or to put up receipts which have really been remitted in support of the account of the outstanding balance of the demand.

BILLS FOR RATES AND METHOD OF THEIR SERVICE.

17. Bills, in cheque form, of three parts, printed either in English, or in the vernacular, or both, shall be prepared in the *prescribed* Form No. XLV. They shall be filled up from the information recorded in the Assessment Registers, and they shall bear consecutive numbers, where possible, printed. The bills shall be signed or stamped with a *fac simile* signature by the Chairman, Vice-Chairman, Secretary, or the Municipal Commissioner for the Ward in which the bills are issued, and the details shall be entered in the Bill Register (*prescribed* Form No. XLVI). If a *fac simile* stamp be used for signing bills, care must be taken that it is always kept in a place of safety.

18. The Bill Register shall be totalled every quarter under the initials, of the Vice-Chairman or Secretary.

19. The bills for each collecting circle shall be arranged in parcels, one for each sub-division as defined in Rule 8, and upon the last day of the quarter the collecting sircars shall present themselves at the Municipal office and each shall take away one or more parcels of bills for delivery. Should the tax be paid upon demand, the bill and the receipt duly receipted by the sircar shall be made over to the tax-payer, the date of payment noted by the sircar in the counterfoil of the bill, and the details for each paid bill entered in the sircar's Daily Receipt Register (*prescribed* Form No. XLVII).

20. If the tax be not paid upon demand, the sircar shall separate the bill from the receipt, which is printed in red ink for the purpose of reducing the chance of a mistake to a minimum, and serve the bill upon the assessee in

the manner prescribed in section 356 of the Act. At the same time he shall, whenever possible, mention the date on which he will call again for the amount (*see* Rule 25).

21. When the sircar shall have served all the bills which formed the parcel or parcels received by him, he shall return to the office and deliver to the tax darogah all the money collected, together with the counterfoil bill book, and the receipts of the bills in his parcel which have not been paid, and also his account in Form No. XLVII duly totalled, and provided with an abstract at foot of the account, showing how much has been collected on account of the demand for each quarter separately. The total of his account should of course agree with the amount of money paid in and with the aggregate of the counterfoils of the bills which are missing from the bill cheque book. The tax darogah shall at once test the account by these counterfoils, also by counting the money paid in, and by checking the totals. If all is in order, he shall initial the account in token of having received the money. The parcel of bills appertaining to the next sub-division shall then be made over to the sircar for collection.

22. Each sircar shall be provided with two Daily Receipt Registers (Form No. XLVII), in which to exhibit his receipts; he shall take one book with him on his collecting rounds and leave the other in the office to enable the tax darogah to post up the necessary entries as to the date of payment of bills, &c., in the Bill Register (Form No. XLVI), and to prepare his Register of Collections and Remissions on account of the demand for each quarter (*prescribed* Form No. XLVIII) *see* next Rule.

TAX DAROGAH'S REGISTER OF COLLECTIONS AND REMISSIONS ON ACCOUNT OF THE DEMAND FOR EACH QUARTER.

23. A separate register, in prescribed Form No. XLVIII, shall be maintained by the tax darogah for the demand for each quarter. From this register the tax darogah shall prepare and lay before the Vice-Chairman, at not less intervals than once a month, the statement (*prescribed* Form XLIX), showing the progress made in the collections of the rate for each quarter. These statements shall be verified by the Vice-Chairman or Secretary, and Accountant, and shall be laid before the Commissioners each month at their ordinary monthly meeting held under section 38 of the Act.

SERVICE OF DUPLICATE BILLS AND NOTICES OF DEMAND AND THE ISSUE OF DISTRESS WARRANTS.

24. On the first day of the second month of the quarter, the sircar shall again serve, in the manner before described, the unpaid receipts together with notices of demand, which will, in the interval, have been attached to the receipts by the tax darogah in the office. If the demand still remains unpaid, the notices of demand shall be left with the assesses, and the unpaid receipts shall be returned to the tax darogah for the preparation of distress warrants, with a note of the date on which the notices of demand were served. When fifteen days shall have elapsed after the delivery of a notice of demand, the sircar shall proceed with the warrant of distress, and if the demand as well as the fee prescribed by law for the warrant expenses, be not then satisfied, he shall make an attachment of the defaulter's property, preparing an inventory of all goods and chattels so attached, and proclaiming a notice of sale by beat of drum.

BILLS PAID AT OFFICE.

25. In the event of any unpaid bill being brought to the Municipal office, and there satisfied, the tax darogah shall take the receipt out of the counterfoil bill-book, and hand it over to the payee, noting the payment on the counterfoil, and entering the amount in a daily account (Form No. XLVII), similar to that used by the sircars. The position of a tax darogah in regard to any collections realized at the office will be precisely that of a sircar in his collecting circle, and he will dispose of the account which he prepares in Form No. XLVII precisely as he does of those submitted to him by the sircars for their out-door collections.

COLLECTION OF TAXES AT THE MUNICIPAL OFFICE.

26. An alternative procedure is also suggested under which the division of the Municipal area into circles, the compilation of the assessment, and the preparation of the bills will be carried out in the same manner as under the procedure described above. The distinctive feature of the alternative procedure consists in the refusal to permit the sircars to collect any money. Their duty will be strictly limited to the service of the bills upon the assessees, and the service of the bills will be carried out precisely as described above; but as each bill will contain a caution against the payment of any money to the server of the bill, and a direction to the rate-payer to proceed to the Municipal office, and there to deposit the amount of the bill, it will only be necessary to arrange for the systematic service of the rate bills by the sircars upon each assessee during the course of the month.

27. At the close of each week the books containing the counterfoils of the bills and the receipts will be returned by the serving peons to the Municipal office with a certificate that every bill missing from the book has been properly served upon the assessee.

28. The tax darogah, assisted by any number of additional clerks, should remain in the Municipal office, at a counter, during certain fixed hours of each day, and upon presentation of a bill which has been served upon an assessee by the sircar, he should receive the amount tendered and make over to the tax-payer the receipt which corresponds to the number of the bill. The amount so received should be entered in a day book in Form No. XLVII, one book being used for each description of rate or tax. If two or three receiving clerks are employed to receive taxes, each should have a separate day book.

FORECAST OF CROPS IN BENGAL.

No. 161T—R, dated Darjeeling, the 3rd May 1886.

From—P. NOALN, Esq., Offg. Secy. to the Govt. of Bengal, Revenue Dept.
To—The Director of the Agricultural Department, Bengal.

I AM directed to acknowledge the receipt of your letter No. 321, dated 20th March 1886, in which, after discussing various suggestions which have been made for the preparation of forecasts of the rice and jute crops of Bengal, you propose that the Commissioners of the principal Divisions in which jute is grown, namely, Rajshahye, Dacca, Chittagong, the Presidency, and Bhagulpore, should be called on to select those gentlemen, European and native, who have the best means of giving the desired information, and that these gentlemen should report to you both as to the area sown and the prospects of the crop between the time of sowing and reaping; that the information thus collected should be edited in your office in communication with the Chamber of Commerce and Council of the Horticultural Society; and that it should then be published in the *Calcutta Gazette*, copies being supplied gratis to the reporters.

2. In reply, I am to state that the Lieutenant-Governor approves of your proposal, and desires that the steps necessary for giving effect to it may be taken at once, so that all the requisite arrangements may be made in time to publish a forecast of the coming jute crop. A copy of the correspondence will be forwarded to the Commissioners of the Divisions specified in your letter, and they will be requested to afford you such assistance as you may require.

3. In the eighth paragraph of your letter, you sketch a plan by which the quantity of jute produced in these provinces may be estimated on the basis of the imports into Calcutta and Chittagong, adding a percentage for consumption in the interior, and deducting the amount received from Burmah and Assam; and from the quantity produced the area under cultivation can be calculated, on the assumption that $15\frac{1}{2}$ maunds represents the average outturn per acre. Upon this point I am directed to observe that what is at present required under the instructions of the Government of India is a prospective indication of the outturn of the jute harvest in Bengal, and that this purpose cannot be attained by an estimate, which would be approximate only, made after the fibre had reached the exporting marts.

4. As it is important to secure the best possible forecast of the jute crop for the coming season, the Lieutenant-Governor wishes to limit your enquiries to that crop for the present. If the plan which you propose has in it the element of success, it can afterwards be extended so as to include rice, wheat, and perhaps other products.

5. The weekly reports at present submitted by Collectors on crops, weather, and prices should, under existing orders, show the agricultural condition of every district in Bengal, including the prospects of jute and rice. I am to request that you will at once arrange to make those reports serviceable as materials for forming for casts of the extent of rice under cultivation, and of the prospects of the different harvests. Upon this subject you can address the Commissioners of Divisions.

No. 321, dated Calcutta, the 20th March 1886.

From—M. FINUCANE, Esq., Director of the Agricultural Department, Bengal,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to acknowledge the receipt of your endorsement No. 1800—107Agri., dated 13th August, forwarding Mr. Bayley's letter No. ⁶⁴⁹⁻⁵⁰₆₋₁₈₀A, dated the 14th July, and calling for an expression of my opinion as to the possibility of supplying forecasts of rice and jute crops in Bengal, similar to those furnished for the principal crops in other provinces of India.

2. With their letter No. 904-6—194A, dated the 22nd October 1885, the Government of India sent the Revenue Department of the Bengal Government a copy of a despatch No. 92, dated 10th September 1885, from Her Majesty's Secretary of State, with which was forwarded a letter from the Dundee Chamber of Commerce, dated 12th of August 1885. In that letter

the Chamber represented that in 1873 a memorandum regarding the growth and cultivation of the jute crop was placed before the Hon'ble Sir George Campbell, Lieutenant-Governor of Bengal in 1873, in which it was represented that the publication by Government annually, between the sowing and reaping of the jute crop, of statistics of the quantity likely to be produced would be of very great importance. The Directors of the Chamber expressed themselves to be strongly of opinion that such statistics would be of great advantage to the trade. They understood, they added, that the proposal to publish such statistics was carried out at the time, but they were not aware whether such publication has been continued, and they requested that they should be furnished with the latest information on the subject. The Right Hon'ble the Secretary of State enquired, *first*, whether the statistics referred to by the Dundee Chamber have hitherto been compiled by the Government of Bengal; and *secondly*, can such statistics now be furnished. The Government of India has asked what steps the Government of Bengal propose to take in order to give effect to the requisition, and I have accordingly been asked to report on the subject. I now beg to reply to your communications of the 13th August and 10th of September, premising that I have hitherto been unable to do so, because I awaited an opportunity of ascertaining the views on the subject of the principal merchants interested in the jute trade, of which during the course of a recent visit to Naraingunge I have been able to avail myself.

3. The answer to the first question put by the Secretary of State is that no statistics of the area under cultivation with jute have been collected by the Bengal Government since the report of the Jute Commission, referred to by the Dundee Chamber of Commerce, was published in 1872-73, and that no such statistics were possible without a village agency for the purpose, such as exists in all other provinces of India, or at least without the imposition by law on landholders of an obligation to file returns of cropped areas in some public office, or otherwise to give information regarding the areas sown under jute or other crops. No such agency exists at present, and landholders are under no obligation to give any information regarding the areas sown with any particular crop. It is therefore impossible, without special legislation, and without the creation of some sort of special agency for the purpose, to give any statistics, worth the name, of the kind called for, showing areas sown in Bengal under jute, rice, and other crops.

4. It has been suggested that such statistics might be collected through the police or the Revenue authorities on the principle of showing for each village whether it grows much, little, or none of each product. The plan of collecting such information through the present staff of Revenue authorities on this principle seems to me to be impracticable. There are at present not more than some ten or twelve Revenue officials in an ordinary Bengal district, and they are responsible for the entire work of administration, extending over an area, on an average, as large as half of Wales, and for the government of a population equal to two-thirds of that of all Scotland. That these officers, already overburdened with work, should be able to devote their time to the ascertainment of the fact whether there is much, little, or none of a particular crop grown in every village in the vast areas under their control, is therefore, it will be seen, entirely out of the question. The magnitude of the task which would have to be undertaken in the compilation of such returns for the entire province will be understood from the fact that there are 264,765 villages in these provinces, and that a mere list of these villages, with the names written down an inch apart one from the other, would extend beyond a distance of four miles. But assuming that Revenue officers might show for each village, whether it contained "much," "little" or "none" of a particular crop, the information when obtained would not afford the means of preparing estimates of the areas under that crop, and would be of little practical value. A Collector of a district or Sub-Divisional Officer can now say in a general way whether his district or sub-division grows much, little, or none of any particular crop, and we should get no further by saying the same thing at the cost of much labour for each village.

5. Nor, it appears, can such statistics be collected through the agency of the Police. Apart from the consideration that it would be highly inexpedient to allow the Police to institute inquisitorial investigations in

matters of the kind, and setting aside the objections which the Police authorities would certainly urge against the diversion of police constables from their legitimate police duties, there is the further objection that any statistics which the Police could collect would be mere guesses entirely unworthy of trust, and they would have the defect, as compared with the estimates of Revenue authorities, that they would be the guesses of untrustworthy and unintelligent persons instead of being the guesses of intelligent and disinterested authorities.

6. The position then is this, that there is not in Bengal any village agency for the collection of statistics of cropped areas such as exists in other provinces; that such statistics cannot be collected through the ordinary executive Revenue agency, nor through the Police. If, therefore, such statistics are to be collected at all, it follows that either an agency must be created and paid by Government for the purpose, or an obligation must be imposed on landholders to file returns in some public office, showing approximately the areas sown under such crops as may be desired, Government supplying the staff necessary for the examination and compilation of such returns. Legislation in this direction is now pending before the Bengal Council, and need not be discussed here. Without such legislation, it seems to me that the answer to the second question put by the Secretary of State must be that trustworthy statistics regarding the area under jute, or any other crop in Bengal, cannot be given. It may be said that forecasts of the area under wheat and other staple crops are prepared in the North-Western Provinces from information supplied by private landholders, and there would at first sight seem to be no reason why the same thing should not be done in Bengal. But I would beg to point out that the normal area under each crop is known from the settlement and putwari's record in the North-Western Provinces. When, therefore, we are told that the area in any particular year is so many annas, more or less, than the normal area, a definite idea of area is conveyed, and figured estimates can thus be formed; but there being no field maps, survey records, or returns of cropped areas in Bengal, the total area under cultivation is not known, much less is the normal area known which is sown under any particular crop. Therefore it is that information such as is supplied by private zemindars in the North-Western Provinces would not, if supplied in Bengal, afford the means of arriving at any conclusion as to the area under jute, rice, or any other crop at any particular time.

7. But though statistics of the area under jute or rice or other crop cannot be given, it does not, in my opinion, follow that no information whatever can be furnished which may be of value to persons interested in the jute trade, and this leads to the consideration of what may be done in this direction.

8. A systematic registration of the traffic of the imports to Calcutta and Chittagong was begun in 1876-77; the quantities imported since that time to these ports (which in reality represents the bulk of the total production of these provinces and of Assam) can therefore be ascertained. If to this quantity a certain percentage for the quantity consumed in the interior be added, and the quantity imported from Assam and Burmah, which is also known be deducted, the total quantity produced in these provinces year by year can be estimated. Allowing 15½ maunds—the quantity estimated by the Jute Commission of 1872-73—as the average outturn per acre, the total area grown under jute in each year can thus be ascertained with some approximation to truth; but the figures given can only be an approximation. They may be taken for what they are worth, and are of value only to this extent, that they indicate whether the area grown in any year is more or less than the area for any other year shown in the statement.

9. Working out the figures from these data, the area estimated to have been under cultivation with jute is shown in the note annexed, which contains all the information of the kind now called for which it is possible to give with the very imperfect materials at our disposal.

10. Turning to the subject of forecasts, it will be gathered from the preceding remarks that it is, in my opinion, totally impossible, as things now stand, to give anything like exact estimates of the areas cultivated with

rice, jute, or other staple crops for every or any district in Bengal; but it does not appear that any such exact estimates are required in the interests of persons concerned in these articles of trade. What merchants really want to have is early and trustworthy information from disinterested sources as to whether more or less than the normal area, whatever that normal area may be, is sown in each year, and knowing the area sown to be more or less than the normal, they desire to be informed whether the prospects of the crop at the various stages of its growth are better or worse than usual.

11. Having personally ascertained the views of the principal jute merchants in Naraingunge, and consulted the Bengal Chamber of Commerce and the Council of the Agri-Horticultural Society regarding the possibility of furnishing information of this kind, and also on the point whether, when gathered, such information would be worth the labour involved in the collection of it, I am of opinion that there will be no great difficulty in collecting this kind of information, and to this extent publishing forecasts of the prospects of the jute crop, it being always understood that all that can be ascertained and published is, first, roughly, whether more or less than the normal area is sown each year, if so, by how many annas the area sown is more or less than the normal; and secondly, whether the prospects of the crop at the different stages of its growth are better or worse than usual.

12. If information of this kind is thought to be of value to the trade, as I am informed it is, then the arrangements I would suggest for the collection and publication of it is that the Commissioners of the principal divisions in which jute is grown, namely, Rajshahye, Dacca, Chittagong, Presidency and Bhagulpore, should be called upon to select those gentlemen—European and native—in their several divisions who have the best means of giving the desired information for the various local areas in which the crop is extensively grown; that these gentlemen should report to this office direct, or, if thought necessary, through the Commissioners of Divisions, both as to the area sown and the prospects of the crop between the time of sowing and reaping; that the information thus collected should be edited in my office in communication with the Chamber of Commerce and the Council of the Horticultural Society, and that it should then be published in the *Calcutta Gazette*, copies of the forecasts being supplied gratis to the reporters. It has been ascertained that the merchants at Naraingunge, the Chamber of Commerce, and the Council of the Horticultural Society, are willing to co-operate in carrying out these arrangements both by way of collecting the desired information, and by suggesting the names of persons who are competent and willing to report on the prospects of the crop; and as regards the latter bodies, also, by examining and collating the mofussil reports when received. If Government approves, action in the direction now indicated can be taken without delay.

13. Similar action might possibly be taken as regards the preparation of forecasts of the wheat crop. It has been suggested that forecasts of the rice crop might be prepared in the same way working through the agency of local unions; but the area covered under that crop is so vast, and the organisation of local unions is necessarily as yet so far from being in complete working order, that any attempt to prepare forecasts of that crop through the agency of local unions seems to me to be premature.

14. As regards tea and indigo, it would appear that sufficiently accurate returns of the estimated outturn and of the prospects of these crops are already compiled by Messrs. William Moran and Company, Calcutta, and the Bengal Chamber of Commerce, and no action for preparation of forecasts of these products on the part of Government would seem to be required.

15. In conclusion, I would add that, though I think it possible to prepare forecasts of crops in Bengal to the extent and upon the data mentioned in this letter, I am at the same time of the opinion that there is great danger that the limitations, subject to which such forecasts can alone be prepared in these provinces, are likely in time to be lost sight of; that a fictitious importance may be attached to these forecasts as being issued under official authority, and therefore that it may be questioned whether it is worth while to attempt to prepare them at all, unless and until a suitable agency is provided for the purpose, such as exists in all other provinces of India.

FORECASTS AND STATISTICS OF THE JUTE CROP IN BENGAL.

1. With their letter No. 904-6—194A, dated the 22nd October 1885, the Government of India sent the Revenue Department of the Bengal Government a copy of a despatch, No. 92, dated 10th September 1885, from Her Majesty's Secretary of State, with which was

7. Having personally ascertained the views of the principal jute merchants in Naraingunge, and consulted the Bengal Chamber of Commerce and the Council of the Agri-Horticultural Society regarding the possibility of furnishing information of this kind, and also on the point whether, when gathered, such information would be worth the labour involved in the collection of it, I am of opinion that there will not be much difficulty in collecting this kind of information and publishing to this extent forecasts of the prospects of the jute crop, it being always understood that all that can be ascertained and published is—*first*, roughly, whether more or less than the normal area is sown each year; if so, how many annas more or less; and *secondly*, whether the prospects of the crop at the different stages of its growth are better or worse than usual. If information of this kind is thought to be of value to the trade, as I am informed it is, then the arrangements suggested for the collection and publication of it, is, that the Commissioners of the principal divisions in which jute is grown, namely, of the Rajshahye, Dacca, Chittagong, Presidency and Bhagulpore Divisions, should be called upon to select those gentlemen—European and Native—in their several divisions who have the best means of giving the desired information for the various local areas in which the crop is extensively grown; that these gentlemen should report to Calcutta direct, or, if thought necessary, through the Commissioners of Divisions, both as to the area sown and the prospects of the crop between the time of sowing and reaping; that the information thus collected should be edited in this office in communication with the Chamber of Commerce and the Council of the Horticultural Society, and that it should then be published in the *Calcutta Gazette*, copies of the forecasts being supplied gratis to the reporters. It has been ascertained that the merchants at Naraingunge, the Chamber of Commerce, and the Council of the Horticultural Society are willing to co-operate in carrying out these arrangements both in the way of collecting the desired information, and by suggesting the names of persons who are competent and willing to report on the prospects of the crop; and as regards the latter bodies, also, by examining and collating the meagre reports when received. Similar action might possibly be taken as regards the preparation of forecasts of the wheat crop. As regards the rice crop, it has been suggested that forecasts might be prepared in a similar manner working through the agency of local unions, but the area covered under that crop is so vast, the organisation of local unions is as yet necessarily so far from being in complete working order, that any attempt to prepare forecasts of the rice crop through the agency of local unions seems to me to be premature.

8. With reference to the requisition for the latest statistical information on the subject

Latest information available regarding quantity produced.

of area sown under jute, the figures worked out from the data and according to the method described in the preceding paragraphs will be found in the sequel.

The great bulk of the jute produced in Bengal is brought down to Calcutta by country boats, by steamer, and by railway. Of late years Chittagong has also begun to play an

* This is the average outturn per acre estimated by the Jute Commission of 1872-73. Other authorities give a higher estimate of the average outturn. As, however, the figures are only intended to show the relative increase or decrease of one year as compared with another, exactness in the estimate of outturn per acre is not material.

Important part in the export trade, and considerable quantities of jute are now carried from the district direct to that port. Some jute is also taken to Bhuddessur in the Hooghly district, where a bazar exists which serves to meet the demands of the Calcutta market. There was no system of import traffic registration established in Calcutta before 1876-77, and there were no trustworthy data for even an approximate estimate of the total yield up to that year.

In 1876 an attempt to establish a system of traffic registration, internal and inter-provincial, was made under Sir Richard Temple's orders, but the attempt to register internal traffic was abandoned in 1878, when registration was limited to the imports into Calcutta, Chittagong and Orissa and Nudda rivers and to the principal canals.

The river-borne and road traffic into Calcutta is registered by a cordon of stations round the town; the railway-borne traffic is registered by the Railway Companies, who supply the figures to the Bengal Office. The total quantity imported into Calcutta by all routes is therefore accurately known. The quantity carried to Chittagong and Bhuddessur is also registered and known. The imports to these three centres being known, and a percentage being added for consumption in the interior, the total outturn is ascertained with tolerable approach to accuracy.

The imports to Calcutta, Chittagong and Bhuddessur, ascertained in this way, are shown in the annexed statement:—

YEAR.	To Calcutta.	To Bhuddessur.	To Chittagong.	Total.
	Mds.	Mds.	Mds.	Mds.

1884-85	1,32,37,570	23,119	18,54,951	1,51,15,940

9. The imports being known, it remains to determine what quantity of jute is used for local consumption; by local consumption being meant (1) consumption in producing districts; (2) consumption in districts where jute is cultivated sparingly or is not grown at all; and (3) consumption of Bengal produced jute in districts outside the Lower Provinces. The extent of this local consumption has never been ascertained. The Jute Commission of 1872-73 were unable to furnish any statistics upon this subject. In paragraph 176 of their report (page 62) the following statement regarding the inter-district trade occurs:—

"The Commission has not been able to collect any satisfactory returns of the internal trade in jute. There is evidence enough to show that large quantities of the fibre pass from district to district for local consumption, for manufactures, and for despatch to other places, but no figured statements of the quantities which so circulate have come to hand.

* * * * *

"No record has hitherto been kept of the extent and direction of the internal trade necessarily existing between districts which grow jute largely and districts which needing the fibre, grow it scantily, or do not grow it at all. There is, the Commission remarked, a strong trade jealousy which stands in the way of collecting information on the subject, and they regretted therefore their inability to submit any more detailed statement on the subject."

10. Broadly speaking, however, it will, it is believed, be within the mark to say that three-fourths of the jute produced annually in these provinces is exported, and one-fourth is left to meet demands of local consumption. If therefore to the total quantities imported, which have been given above, twenty-five per cent., be added, and a deduction be made for the quantity imported from Assam and Burmah, the total quantity produced in these provinces can be ascertained with some approximation to truth. Worked out from these data, the figures are as follows:—

YEAR.	Total imports into Calcutta, Bhuddessur and Chittagong from all sources.	Deduct supplies received from Assam, British Burmah and other Provinces.	Net imports from the Lower Provinces of Bengal.
	Mds.	Mds.	Mds.
1876-77	87,02,923	1,33,079	85,69,844

1883-84	1,24,70,824	1,65,041	1,23,05,783
1884-85	1,51,15,940	1,85,518	1,49,30,422

* The quantity required for local consumption would vary according to the price, being larger when prices are low and smaller when prices are high; but it is hardly possible in an estimate of this kind to allow for such variations.

M. F.

11. Adding 25 per cent.* for local consumption in the districts, the total estimated production of raw jute for the whole province in each of those years will be as follows:—

YEAR.	Imports into Calcutta, Bhuddessur, and Chittagong from the Lower Provinces of Bengal.			Add 25 per cent. for local consumption.	Total estimated production of raw jute in Bengal.

1884-85	...	...	...	1,19,30,422	1,86,63,028

It will be seen that the average production for four years ending 1879-80 was 1,30,32,776 maunds, for four years ending 1883-84 it was 1,69,42,425 maunds, while in 1884-85 the yield was the largest since 1876-77, with the exception, however, of 1882-83, when the supply was unprecedentedly large.

12. The total area under jute cultivation in Bengal may now be estimated by a simple arithmetical process, allowing a certain number of maunds as the average outturn of an acre. Adopting the rate of outturn given by Baboo Hem Chunder Kerr in the report of the Jute Commission of 1873, namely, a little more than 15 maunds per acre, the result is as follows:—

YEAR.	Total estimated production of raw jute in Bengal.	Total area under jute cultivation calculated at the rate of five maunds per beegah.	ANNUAL AVERAGE OF THE FOUR YEARS ENDING 1879-80 AND 1883-84.	
			Outturn of jute.	Area under cultivation.

1884-85	1,86,63,028	1,233,913		

13. In the calendar year 1872, the total area under jute, as set down in report of the Jute Commission (page 65), was 925,899 acres, and the total yield of jute 1,35,88,485 maunds; in 1873 the area aggregated 517,107 acres, and the total yield 77,56,105 maunds. These figures, however, include the area grown in Assam. Excluding Assam, the figures for the Lower Provinces stand thus:—

	Area under jute in acres.	Total yield of jute in maunds.
1872	908,225	1,33,03,303
1873	503,183	75,47,245

14. How these figures compare with the totals of the nine years, commencing from 1876-77, may be seen from the following statement:—

YEAR.	AS COMPARED WITH 1872.		AS COMPARED WITH 1873.	
	Increase.	Decrease.	Increase.	Decrease.
Annual average of the four years ending 1879-80.	Area under jute in acres ...	46,554	3,58,488	
	Yield of jute in maunds ...	2,70,527	54,85,531	
Annual average of the four years ending 1883-84.	Area under jute in acres ...	2,11,935	6,16,977	
	Yield of jute in maunds ...	36,39,122	93,95,180	
Annual total of the year 1884-85.	Area under jute in acres ...	3,25,694	7,30,736	
	Yield of jute in maunds ...	53,59,725	1,11,15,783	

The increase shown above in the area under cultivation during 1884-85 is worthy of notice. Compared with 1872, the increase in the total area sown was 35.86 per cent.

15. Mr. Field Wilson, of Naraingunge, than whom no body in Bengal has a more intimate knowledge of the jute trade, has favoured me with an estimate of the total yield of jute year by year since 1877-78. His estimate gives the number of bales of raw jute of 400lb each, exported year by year since 1877-78, to which he adds the quantity estimated to have been consumed in the jute mills in Bengal; but the estimate does not apparently take into account the local consumption of the jute in the interior. Making allowance for this omission, Mr. Field Wilson's figures, though it will be observed they are not based on the Custom House returns nor on the returns of import traffic registration stations, yet closely accord with the estimates above given, and afford confirmation of their substantial accuracy. The comparison stands thus:—

YEAR.	Total shipment of raw jute to all ports according to Mr. Wilson's estimate.		Total quantity of raw jute consumed in the jute mills in Bengal according to Mr. Wilson's figures.		Total of 2 and 3.		Add twenty-five per cent. for local consumption in the interior.		Total crop estimated according to Mr. Wilson's figures.		Total crop as estimated above by Statistical Department. If the annual average of the eight years ending 1884-85 be taken into consideration the difference between the two sets of figures is not considerable, the estimate worked out in this office from the data above described being only 3.97 per cent. less than that of Mr. Wilson.

16. The figures given in the preceding paragraphs relate to the estimated quantity produced, and the estimated area under cultivation for the entire province. It is impossible to distribute them over the producing districts separately with an approach to accuracy.

Although the results of the registration of the Calcutta and Chittagong traffic are tabulated according to districts and marts, the figures for each district represent the quantities shipped from the various marts in the district, which, of course, may or may not, and ordinarily is not, the quantity produced in that district. Therefore it is that it is impossible to give either the total quantity produced, or the area sown with jute in each separate district. All that can be done in the way of distributing the total quantity among the different districts is to give an estimate founded on individual opinion and the best information that could be obtained at the traffic stations regarding the localities in which the imported jute was produced which, as

already remarked, is very imperfect. For this estimate no approach to accuracy can be claimed; it is put forward as being the best available for the purpose of inviting criticisms from local gentlemen whose opinions on the subject are valuable so far as their several districts are concerned, and must be understood to be nothing more than a guess.

from Calcutta to Foreign and Indian ports were registered in the Custom House before 1876, and that the Custom House returns were the only data on which, up to that time, an estimate of the quantity produced could be formed. The exports have continued to be registered since 1876. According to the Custom House returns the total exports of raw jute, gunny-bags and gunny-cloth to foreign ports from Calcutta since 1873-74*, and from Chittagong since 1877-78 were as follow:—

18. During the period of five years, from 1873-74 to 1877-78, the average annual exportation of raw jute was 5,362,934 cwt. of gunny-bags 18,091,385 in number, and of gunny-cloth 3,789,724 yards; from 1878-79 to 1882-83 the average was 7,271,473 cwt. of raw jute, 50,269,287 bags and 3,913,513 yards of gunny-cloth. How these figures compare with the figures for the last two years may be seen from the statement below:—

19. The largest increase in the exports within the last 12 years occurred during the year 1882-83, when the Collector of Customs, Calcutta, wrote as follows:—

Jute, raw.—"The crop of jute in 1881-82 was a very large one, but last year's crop has exceeded it, by far a much greater area having been sown. This increase of supply has necessarily had a lowering effect upon prices, which fell steadily throughout the year. The exports too have in consequence of the large supply available greatly increased, and were about 33½ per cent. in excess of those of the previous year.

"These low prices reducing the cost at which jute fabrics could be produced, caused an increase in consumption, and the trade in Dundee generally has been satisfactory to all concerned. Extensions are being made in many mills, and old concerns that were standing idle have begun work again; paper-makers also are now using the commonest qualities of jute, and are likely to continue to do so if the present low prices are maintained."

Gunnies.—"The jute-mills in Bengal have had a most prosperous year. The crop of jute has been the largest ever known, and the prices the lowest yet reached, so that they have been able to produce at a very low cost, while at the same time there has been a large outturn of grain and wool in the countries that draw their supplies of gunny packing from Calcutta, and the requirements for the export trade of India itself have also been considerable."

In 1884-85 the exports were the largest on record next to 1882-83. The bulk of the year's crop was of inferior quality, while on the other hand there was an overproduction of gunnies in the local mills, which have suffered much loss thereby. On this point the Collector of Customs remarks as follows:—

Jute, raw.—"It was at one time anticipated that the crop would be quite as large as in the year 1882-83, which was the largest ever known, but in the end, though large, it was not up to the level of that year. The quality of the jute was not satisfactory, the bulk of the crop being very inferior."

"The jute trade in Dundee has not been in a flourishing condition in the past year, though the price of the raw material was fairly low during a considerable portion of it. As in Calcutta, a large increase in the outturn, due to additions made to mills already working, resulted in very low prices for both jute yarn and cloths; the supply of these exceeded the demand. The keen competition from Calcutta is no doubt being felt in markets that in former years were principally supplied by Dundee, and the competition of continued mills will also have had an adverse effect."

Gunny-cloth and bags.—"The exports of jute gunny-bags during last year were the largest since the trade began, being in advance of 1883-84, also a year of large exports, by 30½ per cent."

"Under ordinary circumstances such a large development of any trade should indicate that the trade is in a prosperous condition, but this is very far from being the case in this instance. The increase in exports unfortunately represents overproduction; the outturn had some how to be disposed of, but it could not be disposed of profitably. The prosperous condition of the jute-manufacturing industry in 1882-83 brought about more mills and large increases in the producing capacity of those in existence, and the extra quantity of the manufactured article to be disposed of has accentuated the depression that began in 1883-84. The crop of jute last year, though large, did not reduce the cost of production sufficiently to ensure profits, for prices of bags also fell, with the result that nearly all the mills during the past year have been working at a loss, and in one case the company has gone into liquidation."

"Efforts have been made to arrange to work the mills short time, but for want of unanimity this arrangement, I understand, could not be carried out. A smaller production would probably result in higher prices, and might lower the price of raw jute, and both these things would, of course, be of advantage to the mills; but it should not be forgotten that the cost of the manufactured article would thereby be raised, the tendency of which would be to check consumption and place Calcutta at a disadvantage in competing with Dundee. The alternative course to which the force of circumstances has led appears to be to go on producing up to the capacity of the mills, and so spread the fixed expenses which must be met over the largest production possible; but this leads to heavy losses, and it so becomes a question of a mill being strong enough to hold out until the depression of trade which is general all over the world has passed away, when jute manufactures will no doubt again rise in value."

21. The following remarks regarding the condition of the crop in recent years, which have been extracted from the Commissioners' divisional reports, may be of interest to those concerned in the trade:—

DACCA DIVISION.

1882-83.—"The season's crop was an abundant one, and the area under cultivation was greater than in the previous year. Owing to this largely increased cultivation, there was somewhat of a glut in the market, which, combined with the somewhat inferior quality of the fibre produced during the year, caused a falling off in prices. In Dacca prices fell from Rs. 3 and upwards to Rs. 2-2 and Rs. 2-8, and in Farreepore from Rs. 2-4 to Rs. 1-8, and eventually to 12 annas per maund. In Dacca large quantity had to be kept in stock unsold on the chance of better prices being hereafter obtained. The Collector of Mymensing does not state the extent of the falling off in the prices of his district, but there can be no doubt that the market was much affected by the excess of the supply over the demand."

"The Collector of Mymensing writes—'the growers of jute have not done so well during the year under review as in preceding years, on account of there being a glut in the market, but I believe it is now looking up. The jute cultivators have been generally considered to be the most prosperous class among the rural population of this district, but they suffered considerably last year from the falling off in the price, caused by the turning out of an unprecedentedly large crop of jute, and the supply being consequently in excess of demand of the trader.'

"From what I hear, and have observed, I am led to believe that a very much smaller area will be brought under cultivation during the present year. The cultivators have been disgusted by the low prices prevailing, and say it is better to grow rice, which pays nearly as well, and does not give half the trouble that jute does, with its steeping, peeling, drying, and many other processes before the fibre is fit for the market."

1883-84.—"The jute crop was everywhere below the average both in quality and quantity, the result of an unfavourable season and of a smaller cultivation of the plant. In

Dacca it was at most an 8-anna crop, and in Furreedpore the outturn also was not much more than half the average. In Mymensing it was considerably below that of the previous year."

1884-85.—"There was a very good jute crop in Dacca, Furreedpore and Mymensing. None is grown in Backergunge. Owing to the abundant crop grown during the year, prices in the division fell from Rs. 4-12 to Rs. 2-8 a maund. There was no alteration in the course of the trade; most of the jute was exported to Ouittagong by sloops and schooners, and to Calcutta by the Eastern Bengal State Railway, by inland steamers, and by country boats. The trade is in a flourishing condition. There are several jute mills at work at Narsingunge and one at Dacca."

RAJSHAHYE DIVISION.

1882-83.—"Jute turned out a bumper crop in Dinagepore, Bogra, Runpore and Julpigoree, and a good harvest in Rajshahye and Pubna, but a poor one in the Terai. Much, however, of the jute in Dinagepore was lost for want of water for steeping. The cultivation of jute was extended in Rajshahye. It is reported from Pubna that its cultivation was very extensive—probably greater than in any former year—the ryots having been induced to sow it largely by the high prices realized for fibre during the two previous years. It is said that probably the rice produced in the sub-division of Serajgunge was insufficient for the consumption of the people on account of the large area under jute; but this was immaterial, as rice is always imported there from the districts of Bogra and Dinagepore.

"The price of jute fell everywhere owing to abundance of supply, with the result, it is said, that the ryots obtained little profit from the abundant harvest. At the same time the crop was so large that it is difficult to believe that the general result was unsatisfactory to the cultivators."

1883-84. *Dinagepore*.—"The outturn of this crop was good during the year under report, and a large quantity of it was mainly exported to Calcutta by the Northern Bengal State Railway. The jute trade is being developed year by year, solely on account of the facilities for export given by the Northern Bengal State Railway. A large influx of itinerant traders come into the district in October and November of each year, when the harvesting of jute goes on. These merchants make large purchases. The local traders, too, buy as much as they can get hold of, and thus there is always a competition in the market, much to the advantage of the growers. The jute market was very favourable to the cultivators during the year under review. The average selling price of a maund of jute was over Rs. 3."

Rajshahye.—"The outturn of jute was about three-fourths of the average, and less land was cultivated. Jute is extensively cultivated in Nowgong, and exported chiefly from Atrai station (1,98,312 maunds) by railway."

Bogra.—"Jute, which stands next in order of importance to rice, is grown chiefly in the eastern part of the district, i.e., the tract lying on the eastern bank of the Karotva. The outturn was on the whole satisfactory. The principal centres of this trade are Chandaikona, Snerepore, Peehibari, Goshainbari, Ellangi, Mourerchur, Mathurapara, Hashraj, Sonatola, Sui gunge, Hili, Joypore and Sonamukhi. From Hili and other places close to the Northern Bengal State Railway jute is exported by railway. From Mourerchur on the Daokola, from Mathurapore on the Belai, from Sonatola, Hashraj, and other places on the Bengal, and from Chandaikona on the Phuljore rivers, it is exported to Serajgunge by boat, and from there it is ultimately sent to Calcutta *via* Goalundo by the Eastern Bengal Railway. About 1,50,000 maunds of jute were exported from this district. The price of jute during the year varied from Rs. 3 to Rs. 3-2 according to quality."

Runpore.—"The trade in jute was briskly carried on by Burmese and up-countrymen, but no statistics as to the extent of export was collected. The low price obtained for jute during the previous year led to much less being grown during the year under report, but all the land that was sown with it yielded an excellent crop both in quantity and quality. The price of jute varied from Rs. 2-8 to Rs. 3-4 per maund."

Pubna.—"The jute sowings were limited on account of low price of jute in the previous year, and the consequence is said to have been that the price of jute rose considerably; in the course of the year the dealers, however, and not the ryots, reaping most of the profits, as the latter had sold the better part of their produce early. The most important jute market after Serajgunge is Bera, at the junction of Oorasagur, Burral, and Ichamutty. The estimated export of jute from Bera in 1883-84 is 4,50,000 maunds. There is no other place of importance, but jute is stored at many places along the Oorasagur, Phuljore, Burral and Pudma rivers, from whence it is taken by country boats to Goalundo or Calcutta. The prices of the year varied from Rs. 3 to Rs. 6 the maund. The employment given by this trade at various places where jute is collected attracts a great number of labourers, who can earn as much as 10 to 12 annas a day."

Julpigoree.—"The jute trade must have been affected by partial failure of the crops, and that there was a high demand is apparent from the fact that jute had reached the unprecedented price of Rs. 7 and Rs. 8 a maund at the close of the year. The area under cultivation was quite equal to, if not greater than, that of the previous year."

1884-85.—"The trade in jute flourished in the division notwithstanding the deficient rainfall of the year. In addition to a good crop in some of the producing districts, the traders, it is said, had kept in reserve a large stock of the previous year's produce in expectation of high prices, and the demand in Calcutta having risen, an impetus was given to the business.

"From the railway stations in Dinagepore 70,633 maunds were sent, while the produce of the northern tract, where jute is the principal crop, found its way to Damer and Haldibari

stations for export. The Darwani station also attracted some portion of the traffic. The quantity exported from these stations is stated to have been 3,65,049 maunds, but it presumably includes a good portion of the Rungpore jute.

"In Rajshahye, where less jute is grown than in some other districts, the chief centre of the trade is Nowgong, whence 2,31,650 maunds were exported by rail to Calcutta, and about 16,000 maunds from elsewhere.

"At Serajganje there was depression in the trade, for which no sufficient reason has been furnished by the Collector. A portion of the traffic may, however, have been diverted to Bera—a rising place conveniently situated at the junction of the Orasagar, the Burai, and the Ichamutty. The goods from these places are taken by boats or steamers to Goalundo or to Calcutta direct.

"The trade in Bogra seems to have developed during the year beyond expectation: 1,43,960 maunds, or nearly the whole estimated export of the previous year, were carried by railway from the northern part of the district, while the whole produce of the eastern part was borne by water to Goalundo.

"In Rungpore there was also improvement, though the degree of it cannot be ascertained from what the Collector says on the subject.

"The Julpigoree jute seems to be regarded as better in quality than that produced in the southern districts, and this has no doubt contributed to the development of the trade, which is chiefly rail-borne.

"About 40,000 maunds of jute appear to have been exported from Darjeeling during the year."

22. The fluctuations in the price of raw jute since 1876-77 have been as follows:—

YEAR.	Average wholesale price in 12 selected districts in Bengal.			Average declared value as per Custom House returns.		
	Rs. A. P.			Rs. A. P.		
1876-77	...	...	...	3 0 0	4 4 0

1883-84	...	...	...	3 12 0	4 12 0	
1884-85	...	...	...	3 4 0	4 1 0	

Compared with 1876-77, the average price of raw jute in selected districts showed a rise of 8.33 per cent., while in the case of the Custom House figures, the rate shown during the past year was 4.41 per cent. below that ruling in 1876-77. In paragraph 202 (page 70) of the Jute Commission Report, the price per maund of different sorts of jute ruling in Calcutta during the calendar years 1872 and 1873 was shown as follows:—

		1872.		1873.	
		From	To	From	To
		Rs. A.	Rs. A.	Rs. A.	Rs. A.
Uttaria	...	4 0	6 4	2 8	4 0

Baktabadi	...	3 0	3 8	1 14	2 10

23. The average price per maund of all sorts therefore was Rs. 3.8 in 1872 and Rs. 2.5 in 1873. The prices quoted by the Deputy Commissioner of Police for the purposes of trade statistics since 1880-81 are as follows:—

				Per maund.
				Rs. A. P.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL DURING THE MONTH OF APRIL 1886.

The normal meteorological conditions of April in Bengal are very similar to those which were described for March, but with the continuance of the conditions they become stronger and more developed. These conditions, it will be remembered, are steadily increasing temperature over the whole of Northern India, accompanied by reducing pressure, the latter effect being the result of a series of oscillations in which the downward movement is greater than the upward. The wind system over the province in this month, as in March, is usually made up of three components, which vary in strength and persistency from year to year. Easterly winds, the continuation probably of winds down the Assam Valley, prevail along the foot of the hills, and their influence is frequently felt even to the western limit of the province. Southerly and south westerly sea winds blow over the southern districts of Bengal, and as the month advances they gradually penetrate further into the interior of the province. At the same time hot westerly and north-westerly winds blow from Upper India over the greater part of Behar, Chutia Nagpur and the western districts of South-West and Central Bengal. By the interaction of these almost opposing wind systems, which differ in strength, humidity, &c., the hot weather storms of Bengal are almost certainly produced, and with the inland extension of the southerly moist winds, the rainfall brought by these storms advances into the interior of Bengal.

The rainfall of April is practically entirely due to these storms, and the average distribution of the rainfall in Bengal during this month is simple. The lines of equal rainfall run mainly north and south, or parallel to the hills on the borders of Eastern and Northern Bengal. To the east of a line running through Julpigoree, Rungpore, Serajunge, Burisal and Chittagong the rainfall varies from 4 to 6 inches. The rainfall diminishes westwards, and to the west of a curved line running through Bettia, Durbinunga, Doonka, Hazaribagh and the Cuttack hills, the average rainfall of the month of April is less than one inch. It is least in Shahabad, where it is barely a fifth of an inch.

The chief features of the meteorology of the past month have been—

1. An almost normal pressure, the mean pressure for the whole province not varying from the normal more than a thousandth of an inch.
2. Temperature slightly below the normal in all districts except Chutia Nagpur, the mean defect equalling about 0.8° .
3. Humidity and cloud proportion very distinctly below the normal, the defect in each instance equalling about 8 per cent.
4. The comparative absence of hot weather storms or nor'westers, and the lightness of the rain showers brought by them.
5. The very defective rainfall over the greater part of the province, the average rainfall of the whole province only representing 35 per cent. of the normal fall for April.

The early part of the month opened with conditions which were nearly normal except as regards temperature, which was largely below the average for the beginning of April. At this time weather was of ordinary hot season conditions over the province, and the only other point calling for notice was that slightly disturbed conditions existed over East Bengal, resulting in the formation of frequent hot weather storms, and considerable amounts of rain were reported from this district for the first twelve days of the month. With the existence of these disturbances a few local showers were reported from South-West and North Bengal. From this time up to about the 20th, a period of dry hot weather set in over the whole province, during which temperature rose with very great rapidity, and scarcely a single shower was reported; but from the 20th to the 25th a series of small storms occurred in the hill districts of North Bengal and the districts near the hills, which gave considerable amounts of rain. Again, from the latter date the area influenced by these disturbed conditions extended, and a few local storms with rain occurred in East and South-West Bengal, and in the remaining parts of North Bengal, while a few showers also fell in Behar and Chutia Nagpur; but on the whole these hot weather storms have been much fewer than usual, and most of them have been comparatively light in force, and have given only small amounts of rain.

Pressure was in the earlier parts of the month almost normal in all districts except North Behar, where there was an excess of $0.065''$. During the period from the 9th to the 16th an extremely rapid fall of pressure took place, accompanying a very rapid increase of temperature, and for this time the mean pressure became nearly a tenth of an inch below the normal. A reaction then set in, so that for the third week of the month pressure was $0.023''$ above the normal, while for the last week the excess had increased to $0.056''$. For the whole month, therefore, the mean pressure has been practically normal, and, as stated before, the variation is a defect of about a thousandth of an inch.

Temperature was for the first nine days of the month particularly low, and for the period 2nd to the 9th inclusive, the mean temperature of the province was 4.5° below the normal. In South Behar during this time the defect was no less than 8.6° , in North Behar it was 6° , and in Chutia Nagpur 5.4° . A very rapid increase of temperature then succeeded, and for the second week the temperature had become nearly normal, and with the continued rapid increase in the third week, temperature had become 1.5° above the normal, and finally in the last week the excess had risen to 1.8° . For the whole month the only district which shows a slight excess temperature is Chutia Nagpur, where the excess is 0.6° . In South-West Bengal and North Behar the mean temperatures for the month have been practically normal, while in South Behar, East Bengal, and Orissa the defect has varied from 1° to 2° .

Rainfall has been largely below the normal, the actual average fall for the whole province for the month only equalling 35 per cent. of the normal. The fall in the various parts of the province has, however, been very irregularly distributed, and thus, for instance, while East Bengal has received nearly its usual amount of rain, Orissa has been almost rainless. East Bengal has received the largest amount, averaging 3·14 inches against a normal fall of 3·92 inches, or the actual fall has been 80 per cent. of the normal. North Bengal has received an average of 1·16 inches, the normal fall being 2·59 inches, and thus the actual has been only 45 per cent. of the normal. North Behar has received 0·25 inch, while the normal quantity is 0·74 inch, and this district therefore shows 34 per cent. of the normal. South-West Bengal has reported an average fall of 0·65 inch against the normal 2·15 inches, or the actual has been 30 per cent. of the normal. Chutia Nagpur has recorded an average of 0·12 inch against a normal of 0·47 inch, and the fall in South Behar is 0·11 inch against 0·42 inch, and thus both these districts have received 26 per cent. of the normal falls. Finally, Orissa has recorded an average fall of only 0·07 inch, the normal fall being 1·54 inches, and has only received a rainfall equal to 5 per cent. of the normal quantity.

As has been before stated, the rainfall in April is always very local in character, and this year has been no exception to the rule, and there are many districts where practically no rain has fallen during the month. This is the case in Orissa in all districts except Balasore. In South-West Bengal the districts which have received little or no rain are Midnapore, 24-Pargunnahs, Hooghly, Howrah, and Burdwan. In East Bengal the districts receiving the smallest amounts of rain were Chittagong and Furreedpore. In North Bengal, Dinagore and Maldah has received little or no rain, and Bogra and Rajshahye only small amounts. In North Behar, Mozufferpore, Chumparun and Sarun have received practically no rain, and in South Behar and Chutia Nagpur all districts have received very little rain, except Bhagnpore and Singbhoom.

The following small table will show the monthly rainfall over the whole province, from the commencement of the current year, compared with the normal fall for the same period. The numbers which are given are calculated out as percentages of the normal fall; thus 100 will represent a normal fall, a number larger than this an excess fall, and so on :-

	January.	February.	March.	April.	Actual rainfall for first four months expressed as a percentage of the normal fall for the period.
Orissa	122	4	444	5	119
South-West Bengal	71	1	240	30	79
East Bengal	23	0	180	80	96
North Bengal	3	31	126	45	58
North Behar	35	18	92	34	40
South Behar	28	34	237	26	71
Chutia Nagpur	24	2	196	26	80

From the last column of this table, which shows the total actual rainfall for the first four months of the year in each meteorological division expressed as a percentage of the normal for the same period, it will be seen that the only division which has received a fall equal to the normal has been Orissa, and that all other districts show defects varying from 5 up to 60 per cent. of the normal falls.

The following table gives the summary of the temperature and rainfall data of each of the seven Meteorological Divisions of the Province for the month of April 1886 :—

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical averages of means of the readings during the year. The humidity of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 100. The normal means are the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub-divisions of the district (i.e., from the total rainfall at the sub-divisional stations in the district sending in returns divided by the number of stations. A rain gauge means for six days.

for the week ending Friday, the 7th of May 1886.

The number denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head "District" observational stations for the period in question during the past 12 years. The means of the district are the numerical averages of the rainfall return received in day is one on which at least hundredth of an inch fell.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 7TH OF MAY 1886.

The meteorological conditions for the past week have been of the ordinary hot weather character, that is to say, weather has been generally fine, with lightly clouded skies, and very high temperature and low humidity, but from time to time these conditions have been more or less reversed by the occurrence of local storms with rain, which have of course reduced temperature, and increased the humidity and cloud proportion. These local storms are apparently dependent on the interaction of the three wind systems which blow over Bengal during this season of the year. Easterly winds generally blow over North Bengal and North Behar, westerly winds generally obtain in Chutia Nagpur and South Behar, while south-westerly winds blow in South-West Bengal and south-easterly winds in South-East Bengal. By the interaction of these wind systems, which differ in strength, humidity, &c., undoubtedly ascensional air motion must be produced, and this in the presence of moist winds probably gives rise to slight disturbance of the atmosphere, which is followed by the formation of the local hot weather storms called north-westerners.

According to the strength of the three currents, so will be the amount and position of their interaction, and thus local storms accompanied by rain will be produced in various parts of the province depending on the relative strength of the wind systems. But from the nature of their production such storms will be most numerous, and will give the largest amount of rain, in those districts which are most exposed to moist winds, and consequently these storms are most numerous and yield the largest amounts of rain in East Bengal, North Bengal and South-West Bengal, while they occur comparatively seldom and give less rain in Chutia Nagpur, Orissa and Behar. During the week under review all these three wind systems have been present, and storms of this class have been tolerably frequent in East Bengal, North Bengal and South-West Bengal, while there have been storms, but less in number, in Orissa and Behar, and finally in Chutia Nagpur a very small number of storms have been reported. In the reports which have been received, it is also stated that some of the storms have been exceptionally severe, considerable amounts of damage being done at some stations.

Pressure was at the close of the previous week distinctly above the normal, the excess averaging about a tenth of an inch. Considerable barometric changes have taken place during the present week, and for the first three days there was rather a rapid fall. On the Tuesday pressure again fell over the greater part of the province, and on the following day a rapid rise was reported; but this was succeeded on the last two days of the week by large and rather rapid changes of pressure, the tendency of which was certainly in a downward direction, and thus during the week the mean pressure for the province has been very nearly normal, the average variation being an excess of only 0.002."

Temperature—Has been particularly high throughout the week, and in all districts the mean temperature has been above the normal. The excess temperature has been smallest in Orissa, East Bengal and North Behar, where the excess is less than 1°. while in South-West Bengal, North Behar and Chutia Nagpur the excess is about 2°. Very high maximum temperatures have been recorded during the week, and thus at Gya, on the 5th, maximum temperature was 109.6°, and on the same day Raneegunge reported 109°.

Rainfall.—Light to moderate rain, which has fallen during small local storms, has been general in the southern, eastern and northern districts. East Bengal has received the largest amount of rain, and averages for the week at all stations a rainfall of 2.50 inches against the normal 2.36 inches, and has therefore received a fall slightly in excess of the normal. North Bengal has received 1.52 inches against the normal 1.85 inches. South-West Bengal has received 0.92 inch, and the normal fall is 1.34 inches. Orissa has recorded an average amount of 0.52 inch, while the normal fall is 0.75 inch. In North Behar the average rainfall, which has been received during the week, is equal to 0.46 inch, while the normal is 0.69 inch, and in South Behar the fall has been 0.28 inch against the normal 0.37 inch. It will therefore be seen that all these districts have received a fair amount of rain, though in no case equalling the normal. Finally, in Chutia Nagpur the rainfall has been very scanty, and only averages 0.07 inch, while the normal fall is 0.58 inch, and thus the actual fall has only been about one eighth of the normal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 7th of May 1886 :—

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of former years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0°.2 lower; and, finally, the thermometer, which furnished the record of temperature at the Surveyor-General's office during 20 years and upwards, is found to read 0.6 higher than the New standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 8, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph. The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal yield the following results for the week ending 24th April 1886:—

1. The ratios per mille of births and deaths for the period above referred to stand at, for births 18·9 and for deaths at 24·7, the records of the preceding week ending 17th April presenting very nearly the same proportions, viz. 18·8 and 24·3 respectively.

2. In the following Municipalities births and deaths were recorded at the highest rates:—

Births.			Deaths.		
		Ratio per mille.			Ratio per mille.
Durbhanga	...	37·0	Serampore	...	49·1
Purneah	...	34·6	Puri	...	48·3

			Jessore	...	36·7
			Burdwan	...	35·1
			Gya	...	34·2
			Suburbs of Calcutta	...	31·6

3. The mean rates at which the principal diseases proved fatal exhibit no marked variations in comparison with the mortality during the preceding week, thus—

		Ratio per mille during the weeks ending—	
		24th April 1886.	17th April 1886.

**General Remarks on the fluctuation of principal staples carried over the East Indian Railway
during month ended 27th March 1886.**

INCREASES.

Gram and Pulses.—The increase in these staples is attributable to better crops aided by an improved demand.

Rice (husked and unhusked).—An abundant harvest and active markets account for the increase in this commodity.

Sugar. The increase in this staple is due to better crops and good prices in the mofussil markets.

Spices.—This increase is assignable to ordinary fluctuation of trade.

DECREASES.

Coal and Coke.—There was an increase in weight carried and a decrease in receipts owing to large despatches having been made to the Bengal and North-Western Railway, and to less demand on the North-Western and Rajputana-Malwa Railways.

Cotton.—In this staple also there was an increase in the weight carried and a decrease in the earnings, which is assignable to short lead traffic owing to high rates having restricted business in the Calcutta market.

Wheat.—The deterioration and almost entire exhaustion of the old stocks of this staple and the new wheat not being in the market are the causes for this decrease.

Hides and Skins.—There was an active demand in the Calcutta market, principally for North-West hides, but the supplies were scanty, and but little business could be done, which led to the decrease in these staples.

Lac.—Declining prices and want of business in the home markets account for this decrease.

Brass and Copper.—Dull markets in the North-West are assigned as the cause of the falling off in these metals.

Iron.—The decrease in this article is attributable to the mofussil markets having been overstocked.

Opium.—The decrease under this head was owing to fluctuation in despatches from the Government depôts where it is manufactured.

Railway material, Foreign.—Due to less demand from foreign railways which were under active construction last year.

Salt.—The decrease in this commodity was due to heavy despatches having been made in March 1885 owing to a panic among the Calcutta dealers caused by a rumour to the effect that the salt duties were about to be enhanced.

Saltpetre.—This decrease was due to the Calcutta market being quiet.

Seeds.—An increase in weight carried, attended with a decrease in receipts, is due to the traffic having been for shorter distances.

Tobacco.—The decrease under this head is due to fluctuation of trade and competition by other Railways.

Government Stores.—This is accounted for by the heavy despatches to the Punjab made in 1885 having ceased.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during the same period of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 100. The normal means of the rainfall are the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub-divisions of the district (i.e.) from the total rainfall at the sub-divisional stations in the district sending in returns divided by the number of stations. A rainy day is denoted by 1.

for the week ending Friday, the 14th of May 1886.

period for the past ten years. The variations are negative when the mean for the week is less than the corresponding normal mean, and positive when greater. The number denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under each District, observational stations for the period in question during the past 12 years. The means of the district are the numerical averages of the rainfall returns received in day is one on which at least hundredth of an inch fell.

CALCUTTA, the 17th May 1886.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 14TH OF
MAY 1886.**

At the commencement of the week under review a strong westerly wind current commenced to drive back the more or less easterly current, which had previously obtained over a large part of the province. With the strengthening of the westerly wind current, local storms became far less numerous over the western divisions than they had been, though still some few storms occurred in North and East Bengal; the air also became very much drier, and for the first three days at some of the extreme western stations of the province humidity was particularly low, the saturation at Buxar being only 10 per cent. of the possible amount on the morning of the 10th, and on the same day it was only 11 per cent. at Hazaribagh, and 17 and 18 per cent. respectively at Dehree and Patna. From the 10th, however, a change in the wind systems commenced, winds became more easterly at the northern stations, and stronger and more southerly winds set in at the southern stations, bringing up considerable amounts of moisture. At Darjeeling, too, on the 10th, a very strong north-easterly wind was reported; the wind velocity for the previous 24 hours being 20 miles per hour, which is decidedly high for an inland station like Darjeeling. At this time pressure over the province was decidedly below the normal, while temperature was in most districts rather largely above it, the excess at such stations as Calcutta equalling no less than 7.7° above the normal. The northerly wind current which was shown at Darjeeling on the 10th then extended, and on the morning of the 11th it had embraced the whole of North Bengal and North Behar and parts of South Behar and Chutia Nagpur, and with the setting in of this unusual current pressure rose extremely rapidly over the northern and western parts of the province. As moist southerly winds were blowing over the southern and central parts of the province on this day, these northerly winds were of almost opposite direction, and their meeting caused a large amount of interaction or interference, which must have resulted in the usual ascensional air motion, and which was of course followed by heavy rain. On this day rainfall was general and in some cases rather heavy in North Bengal, in some parts of North Behar and over the greater part of East Bengal, but with the continuance of this action on the following day the area of rainfall rapidly extended, and on the 12th rainfall was reported from almost every recording station in the province except at a few in South Behar, Chutia Nagpur and Orissa. In many parts of the province the rainfall was particularly heavy, and falls in excess of three or four inches were rather numerous. The northerly current continued to blow over a considerable part of the province on the 12th and 13th, but on the 14th it was evident the abnormal current was being driven back, and on this day winds were strongly easterly over the whole province, though at the northern stations they were somewhat northerly also, while at the southern stations winds were south-easterly. With the continuance of these conditions, therefore, which could only result in interaction between opposing wind systems, weather conditions remained disturbed, and local storms with rain have been rather frequent for the last part of the week over parts of the province. From a meteorological point of view therefore the week has been decidedly important, and moderate to heavy rain has fallen in all districts except Chutia Nagpur.

Pressure was during the previous week on the average nearly normal; during the present week the changes of pressure have been large and rapid; for the first two days pressure was falling; this was succeeded on the 10th by a slight rise, and with the inrush of northerly winds above referred to on the 11th, an extremely rapid increase took place in the districts affected. This was followed by a period of rather irregular changes, and for the whole week the mean pressure for the province has been about $0.04''$ below the normal. This defect is not quite so equally distributed as it might be, as at two stations, Dacca and Bankipur, pressure has been very slightly above the normal.

Temperature over the greater part of the province has been subject to very considerable and rapid changes during the week. Before the setting in of the unusual conditions, and the occurrence of the heavy rainfall previously described, temperature was for several days largely above the normal, and very high maximum temperatures were recorded. At this time at many stations temperature was from 5° to 7° above the normal for the period, but immediately after the heavy rain, temperature fell many degrees. Thus at Calcutta from 4 p. m. of the 12th to 4 p. m. of the 13th the fall of temperature was 26° . After the rainfall temperature was largely below the normal, the temperature at such stations as Berhampur and Jessore on the 13th being 15° below the normal, while at Burdwan, Dacca, Patna and Gaya the defect exceeded 9° . For the whole week the mean temperature has, however, only been very slightly below the normal in most districts, the average defect being about 0.6° .

Rainfall has been frequent during the week over a large part of the province, and in many districts very heavy. The 12th was the day of most general and heaviest rainfall, and on this day Ghatal reported 6.20 inches, Tajpore 6.02 inches, Bougong 5.71 inches, and Satkhira 5.14 inches, while the following stations received from 3 to 5 inches:—Calcutta, Howrah, Moheesreka, Burdwan, Tumlook, Dum-Dum, Busseerhat, Culna, Cutwa, Raanaghat, Khoolna and Jessore. The rainfall was therefore particularly heavy on this day in South-West Bengal. For the week the largest average fall has been received in South-West Bengal, which has registered 3.06 inches, the normal fall for the week being 1.23 inches.

East Bengal has received an average fall of 2·87 inches, the normal fall being 2·48 inches. The fall in North Bengal has been 1·30 inches, the normal being 1·67 inches. Orissa has received 1·52 inches against a normal of 1·06 inches, and North Behar 1·03 inches against the normal amount of 0·75 inch. Much smaller amounts have been received in South Behar, which only averages 0·42 inch against a normal of 0·47 inch, and finally Chutia Nagpur has only received an average fall of 0·19 inch, while the normal is 0·65 inch, a fall less than a third of the normal. In fact during the week under review good and seasonable rainfall has fallen over the whole province with the exception of Chutia Nagpur.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 14th of May 1886 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph. The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE annexed table, exhibiting the vital statistics of the principal Municipalities in Bengal for the week ending 1st May 1886, furnishes the following results:—

1. That the birth-rate in these Municipalities amounted to 17·2 per 1,000 of population against 18·9 per 1,000 during the preceding week ending 24th April, and the death-rate to 23·8 against 24·7, indicating a retrogression in the registration of both events.

2. That the following Municipalities furnished the highest proportions of births and deaths:—

Births.			Deaths.		
		Ratio per mille.			Ratio per mille.
Bhagulpore	...	30·8	Puri	...	48·3
Naraingunge	...	29·0	Durbhanga	...	40·9

			Suburbs of Calcutta	...	36·8
			Naraingunge	...	33·1
			Beaulah	...	31·5
			Serampore	...	31·4

3. That the casualty rates from the principal diseases specified in the table above alluded to, exhibit no noticeable differences in comparison with the death-rates from the same diseases in the preceding week:—

Ratio per mille during the weeks ending—					
			1st May 1886.	24th April 1886.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "497," the ratio under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

GENERAL REMARKS AND EXPLANATIONS.

The total weight lifted during March 1886 stands at 24,152'82 tons against 14,168'02 carried during the corresponding period of 1885, the net result being an increase of over 70 per cent., as will be seen from the comparative statement given above.

INCREASES.

Ale 2'57 tons.
This traffic, after a protracted depression, is again showing signs of revival.
Food-grain 9,373'45 tons.
Rice and paddy have mainly contributed to this satisfactory result.
Jute 237'31 tons.
The traffic under this head has been 1,396'18 tons against 1,158'87 carried during the corresponding period of 1885, being an increase of 20 per cent.
Miscellaneous 808'57 tons.
Under this head are included numerous articles of traffic, and it is not possible to trace the fluctuation with accuracy. The increase, however, was expected in the face of a falling off last month.
Piece-goods 48'18 tons.
Local markets are being well stocked against the approaching rains, when carting into the interior is difficult.
Railway material 853'19 tons.
There has been a continued falling off under this head for some time, and the present increase is due to conveyance of materials for the Assam-Behar State Railway.
Sugar 16'21 tons.
It is satisfactory to notice the gradual expansion of this traffic.

DECREASES.

Ginger 166'05 tons.
The increased despatches under this head for some time past will explain the present falling off.
Gunny-bags 28'46 tons.
There has been little doing under this head during the month under notice.
Salt 18'62 tons.
The decrease is expected in the face of increased despatches in January and February last.
Seeds 901'68 tons.
It appears from enquiries made that the mustard seed, which principally contributes to this traffic, has not yielded a fair crop this year.
Tea 6'83 tons.
This is the end of the season, and a small sale was held during the month.
Tobacco 233'34 tons.
The decrease is principally due to a falling off in the despatches from Siliguri, 1,932 maunds having only been sent this month from that station against 12,457 maunds in the corresponding period last year, due to indifferent crop in the neighbourhood of that station.

CALCUTTA, the 25th May 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 21st OF MAY 1886.

THE report for the previous week showed that weather conditions over the province were decidedly disturbed, owing to the interaction between more or less opposite wind systems. At the close of the week, however, these conditions were gradually disappearing, but still for the first three days of the present week conditions were sufficiently disturbed to give a large number of local storms, which in most instances brought light rain. At first these storms with rain were general over almost the whole province, but the area affected by them has gradually contracted, and towards the close of the week the rainfall was practically confined to North Bengal. The winds for the second-half of the week became very light and rather irregular over the whole province, and while thus winds were falling off in strength at the head of the Bay, a very strong advance of monsoon winds was taking place in the extreme south of the Bay; heavy rain was also recorded at some of the Ceylon stations. Thus at Galle on the 18th and 19th nearly eight inches of rain were reported. This is the second advance of monsoon winds which has taken place up the Bay during the present month, and it is probable that this second burst will advance further up the Bay than the previous one did.

Pressure—During the first two days of the week was rising at the majority of stations; and it was lowest at the western and highest at the south-eastern stations, but at this time there was also a comparatively low pressure area in the south-west corner of the Bay, and this comparatively low pressure has remained persistent almost throughout the week. Towards the close of the week also pressure generally fell over Bengal, but notwithstanding that the fall was in some cases rather rapid, pressure was at the close of the week largely above the normal over the province, the excess in many instances equalling 0.15". For the whole week the mean pressure of the province has been almost 0.1" above the normal.

Temperature—Changes have been generally small at most stations throughout the week, but with the cessation of rainfall in some districts, and the diminution of its quantity in others, the variations of temperature have generally been in an upward direction. Thus at the commencement of the week temperature was in defect in Chutia Nagpur and South Behar by about 5°, though in other districts the defect was generally not larger than 1° to 2°, while at the close of the week it was only slightly below the normal in almost all districts, while in East Bengal it was even in slight excess. For the whole week the mean temperature of the province has been 2.8° below the normal. In all cases the mean temperature is below the normal, and the extreme variations are from a defect of 6.7° in South Behar to one of 0.3° in East Bengal.

Rainfall—Has been fairly well distributed over the whole province during the first three or four days of the week, while at its close, as previously stated, all divisions were for practical purposes rainless, excepting in North Bengal at the districts in and near the hills. In most divisions rain has fallen at almost every station, and on about one or two days of the week. The largest average rainfall has been received in North Bengal, which has registered 1.76 inches against the normal amount of 2.04 inches. East Bengal has recorded an average fall of 0.71 inch against the normal 1.55 inches. Both these districts have therefore received falls very considerably below the normal. North Behar has registered a general fall of 1.10 inches against the normal 0.53 inch, and has therefore received twice the normal amount. South-West Bengal has received 0.97 inch against a normal of 0.82 inch, and South Behar a fall of 0.65 inch against the normal 0.61 inch; and Orissa has recorded 1.67 inches against the normal 0.57 inch, and thus all these districts have received falls very decidedly above the normal for the week. Finally, Chutia Nagpur has reported a general fall of 0.44 inch, while the normal is 0.50 inch, and thus the actual fall is nearly equal to the normal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 21st of May 1886:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 24th May 1886.

A. PEDLER,
For Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE principal Municipalities in Bengal returned, during the week ending 8th May 1886, the birth and death-rates of 16.1 and 21.5 per 1,000 of population, respectively, as opposed to 17.2 and 23.8 per 1,000, respectively, in the preceding week ending 1st May, indicating a reduction in the record of both events:—

2. These events were returned in the highest proportions from the following Municipalities:—

Births.			Deaths.		
		Ratio per mille.			Ratio per mille.
Purneah ...	...	41.6	Beauleah ...	...	76.2
Beauleah ...	...	36.8	Serampore ...	...	43.2
Comillah ...	...	40.8	Puri ...	...	39.9
Bhagulpore ...	...	30.8	Purneah ...	...	34.6
			Gya ...	...	33.5

3. From the figures in the following table, it appears that during the week under notice the mortality from cholera and the maladies recorded under the head of "Other causes" had diminished sensibly, that the death-rates from small-pox and bowel-complaints exhibit no variations, and that there were no marked differences in fatal results from the rest of the death-causes:—

				Ratio per mille during the weeks ending—	
				8th May 1886.	1st May 1886.
Cholera ...	...	...	...	2.2	3.3
Small-pox ...	...	...	...	.1	.1
Fever ...	...	...	...	9.1	9.7
Bowel-complaints ...	...	...	...	2.9	2.9
Injury ...	...	...	...	.4	.7
Other Causes ...	...	...	...	6.0	7.1

4. Of the abovementioned diseases cholera, fever and "Other Causes" exhibited greatest severity in the following Municipalities:—

Cholera.		Fever.		Other Causes.	
	Ratio per mille.		Ratio per mille.		Ratio per mille.
Beauleah ...	23.6	Beauleah ...	47.3	Serampore ...	21.
Puri ...	10.5	Burdwan ...	22.9	Puri ...	16.

INCREASE.

	Tons.
Edible grains	103
This increase is due to fair crop in this year.	...
Cotton	10
This increase is due to less import during previous month.	...
Seeds of all sorts	253
This increase is due to fair market price of linseed at Calcutta.	...
Coal	421
This increase is due to merchants not laying in stock during the rains as they used to do before; also to extensive brick-burning for repairs of buildings damaged by earthquake.	...
Sundries	100
This increase is due to less import during the previous months; also to fair market price of onion and garlic at Calcutta.	...
Tusser cocoon	5
This is a new traffic from Barakar.	...

DECREASE.

	Tons.
Silk and silk cloth	6
This decrease is due to low rate.	...
Sugar and Jaggree	7
This decrease is due to previous stock not being exhausted.	...
Piece-goods	10
This decrease is due to distress prevailing in the district owing to the last inundation.	...
Salt	14
This decrease is due to carriage by boats.	...
Jute	74
This decrease is due to low rate.	...
